'Advance" Scientific Miscellany.

Physicians of Rio Janeiro recommend the oil of anda, a Brazilian tree, as a substitute for castor oil. It is pleasanter to take, and the dose is smaller.

A French Government vessel has recently succeeded in dredging in the Bay of Biscay at a depth of 17,000 feet, or three and one fifth miles. The animals found at that distance beneath the surface are numerous, but of small size.

Logs and planks split at the ends because the exposed surface dries faster than the inside. If muriatic acid be saturated with lime and applied to the ends like whitewash, the chloride of calcium formed, attracts moisture and prevents splitting.

A novel application of the electric light is intended to diminish the risk of collision at sea. The light with a reflector, is placed on a movable arm in such position as to move with the rudder, thus indicating by the direction of its beam the course steered dy the vessel.

An iron chess-board provided with magnetic chess-men is a Berlin novelty. The small magnets concealed in the figures cause them to adhere to the iron board and retain their place in spite of considerable shocks, such, for instance, as are received on shipboard or on rail way trains.

Dr. Fleck, a Dresden chemist, attributes the production of pimples and inflammation on the forehead of some persons, in hot weather, to the presence of fat or fatty acids in the leather lining of hats. By experiment he has lately shown that the fat is contained in all leathers, and although small in quantity, is sufficient to produce the result in question. To avoid the unpleasant effects, he recommends rubbing the greasy leather with burnt magnesia.

Herr Kepner, at Salzburg, in the Tyrol, has observed that heating earths and rocks causes them to become magnetic. With various specimens of baked and unbaked bricks he has tested the accuracy of the observation, which is still further confirmed by experiments with several minerals by two other scientists. The magnetism of newly-heated rocks appears to diminish somewhat in time, but some specimens of slag, perhaps thousands of years old, were found to be still magnetic.

As the use of electricity becomes more and more general, the great importance of some method of storing the current for future use, becomes more widely appreciated. Since the announcement of Faure's electrical accumulator some months ago, this subject has been much studied, and several storage batteries have been produced by eminent electricians. The most promising apparatus of this kind, is said to be one just described by Mr. Henry Sutton, of Australia, to the British Royal Society. It appears, from information now at hand, that Mr. Sutton obtained the best results with a negative electrode of copper and a positive of amalgamated lead —that is, lead coated with mercury. These two elements are placed in a solution of sulphate of copper. When a current of electricity is passed through this cell the solution is decomposed and metallic copper deposited on the negative electrode, while the positive is peroxidized. When the battery is being discharged the action is reversed, the copper element being oxidized, and the oxide combining with the acid again forms sulphate of copper. As the copper is deposited in charging, the solution gradually loses its blue color, being converted into sulphuric acid. It is stated that Mr. Hutton will not patent his discovery.

Prof. Tait describes three forms of mirage. The first, and most common, is that seen in the desert, where the sunlight is reflected from the heated layer of air resting upon the sand to the eye of the observer, and irresistibly gives rise to the impression of a reflecting surface of water at the point in the desert from which the rays are projected. A second form is that observed in the Arctic regions, of which many beautiful illustrations have been given by Scoresby. The principal phenomenon is what is called "looming"—distant objects showing an extravagant increase of vertical height without alteration in breadth. Distant hummocks of ice are thus magnified into immense towers and pinnacles, and a ship is sometimes abnormally drawn out until it appears twelve or fourteen times as high as it is long. The celebrated *fata morgana* of the Straits of Messina is of this character. Rocks are seen drawn up to ten or twelve times their proper height, and houses, as well as human beings and animals, appear in like exaggerated shape. The most remarkable instance of this kind of mirage was observed in 1798, when from Hastings, a portion of the French coast forty or fifty miles away, was seen as plainly as though but a few miles distant, although ordinarily hidden by the earth's convexity. The third and perhaps most extraordinary form of mirage is that observed by Vince in 1799, in which a ship at sea showed three distinct images—a lower and an upper one in an upright position and an intermediate one in which the object stood inverted.

No More Hard Times.

If you will stop spending so much on fine clothes, rich food and style, buy good healthy food, cheaper and better clothing, get more real and substantial things of life every way, and especially stop the foolish habit of employing expensive, quack doctors, or using so much of the vile humbug medicine that does you only harm, and put your trust in that simple, pure remedy, Hop Bitters that cures always at a trifling cost, you will see good times and have good health.—*Chronicle.*

ZOPESA FROM BRAZIL—As a result of the new commercial enterprise just assuming importance with Brazil, is the introduction of *Zopesa*, so justly celebrated where it is known for the cure of all forms of Indigestion. The company have opened a laboratory in Toronto. *Zopesa* comes to us highly endorsed and recommended, its wonderful affinity to the Digestive Organs, its certainty to relieve and cure Dyspepsia and Constipation, makes this remarkable compound a necessity in Canada. The Company makes sample bottles at the trifling cost of 10 cents. Sold by MACKENZIE Co., Chatham, N. B.

GENERAL BUSINESS.

Golden Ball, Shoe Store

—AND—

FURNITURE EMPORIUM.

The Golden Ball Boot and Shoe Store is the oldest established in Miramichi. It is now fifteen years since we commenced business exclusively in the above line, and we can now point with pleasure, to hosts of patrons, who have invariably purchased from us, during that length of time. The reason is plain. We buy entirely from the best manufacturers, consequently our goods give satisfaction. We might purchase cheap, shoddy goods (that are only meant to sell and not to wear) but by pursuing that policy, it would be impossible to retain our customers. The best goods are the cheapest in the end.

We have full lines of

Infant's, Children's Misses', Youth's, Boy's Women's and Men's Boots Shoes, Slippers. etc.,

at the lowest possible price compatible with good quality.

Also a large assortment of

Trunks, Valises, and Hand Bags, Sole Leather and Shoe Findings.

Seven years ago we opened our FURNITURE EMPORIUM, and have witnessed a steadily increasing business. We keep in stock all varieties of BEDROOM, KITCHEN AND PARLOR FURNITURE, LOUNGES, SOFAS, HALL STANDS, WHATNOTS, WARDROBES BOUQUET TABLES, SIDEBOARDS, EXTENSION TABLES, SPRING BEDS, IRON BEADSTEADS, STRETCHERS, ETC.

—ALSO.—

Mattrasses, Bolsters and Pillows of all kinds, Mirror Plates, Excelsior Etc.

—JUST ARRIVED.—

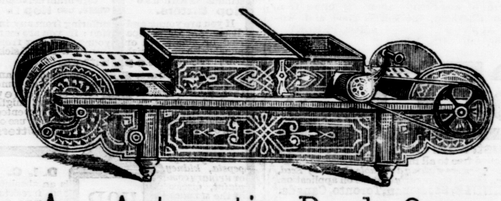
MECHANICAL ORGUINETTE.



An Automatic Reed Organ.

"THE ORGUINETTE may now be called a celebrated instrument. In tone it is akin to the Cabinet Organ, but the organ must be manipulated by an artist in order to produce music; the ORGUINETTE is on the other hand entirely mechanical in its action, and at trifling expense it can be made to furnish an unlimited supply of all kinds of music." *Toronto Globe.*

"THE ORGUINETTE is indeed a musical wonder. It is a miniature reed organ, with as strong and mellofluous a tone as the Cabinet Size. It surpasses the Cabinet Organ, for the reason that the ignoramus in music can play it as well as the most accomplished professor. THE ORGUINETTE is strong and accurate in its mechanism, and consequently not liable to get out of order." *Montreal Gazette.*

"THE ORGUINETTE is the most perfect automatic musical instrument yet invented, its repertoire is unlimited, the tone is remarkably good." *Montreal Star.*

CHAMPION PORTABLE SAW MILLS

George Cook writes, Ft. Anna, Ontario, June 17 1879, regarding his 16-horse power champion portable: "Asked me, on Monday morning three men of us commenced to tear up and to move it. We tore up, moved and set it up and ran 2 cords of stove wood and a log with it. Not quite two days. In one week we moved and set it up, commenced, and sawed to sixty thousand feet. I will write full particulars soon. We sawed six hundred feet in twenty-five minutes—inch lumber." Saw mills—12 H. P. using 44 in. saw, capacity 3 to 4,000 per day. 16 H. P. using 48 in. saw, capacity 4 to 5,000 per day. 20 H. P. using 54 in. saw, No 2 saw runs, capacity 5 to 8,000 per day.

Most simple, efficient and portable mill of its size in the world.

ADDRESS WATEROUS ENGINE WORKS CO., BRANTFORD CANADA.

W. A. Vernon Garret writes from Huntsville Muskoka, Dec. 15th, 79. The 16 H. P Mill runs well. The other day we cut 1,039 feet in 45 minutes. The mill gives me entire satisfaction.

Over 250 Fire Proof Champion Engines sold in 3 years. Only perfect Threshing Engine in the world.
