SURVEYORS OF LUMBER

Coun. Adams moved, sec. by Coun-Saunders, that the Council suspend business for half an hour to allow Hon. R. Hutchison to be heard on a matter of in portance. Carried.

Resolved that Mr. Hutchison be allowed to address the Council.

Mr. Hutchison then addressed the Council, and claimed that the survey of no' seek, as the St. John Sun does, to lumber had become a farce, and that it elevate our political leaders by be-

opinion of both. The Sun says :rease in the monthly payment being A STATESMAN OUT OF PLACE. One of the cleverest public men now alive is Sir John A. Macdonaid, Prime Minister of the Canadian Dominion. 1 is true his opportunities have been limited but he has proved himself the possessor o true political genius. Since Disraeli and Gambetta are dead, we know of no poli tician, except Bismarck, who can be class ed in the same high category. It Canada had been annexed to th United States twenty years ago, John A Macdonald would have a sphere large enough for the development of his power-

He would have been the leader of a great national party, the foremost magnate o Congress, President, perhaps, during two terms. In a provincial country like Cauada, with its petty interests, its narrow aims, its coarse and unevoluted party

divisions, its petty and uninteresting future, there is no chance for the great intellect and puissant will of a truly giften It is a pity that Sir John A. Macdonal was born in the nineteenth century. Had he waited until the twentieth, and

great Continental Confederation, he migh have made his name immortal. But wh will remember a Canulian ruler twenty years after he is buried?

Any man of intelligence who reads the matter quoted from the N. Y. Sun cannot fail to realize that the opinion of a writer of such impertinent trash is not of much value, and the genuine friends of Sir John A. Macdonald, will, we think, consider personal praise from

ment. Sir John is, undoubtedly, an able and clever man. He may be as able and clever as Gambetta was, but it is sheer nonsense to place him beside

ends with the suggestion of physical parity between the two men. In a country filled with men whose ideas are sampled in the matter quoted from the N. Y. Sun, Sir John would, probably, personal prosperity and the enjoyment of power are, with him, a first consid-

by and loves best the unstinted adulation of those by whom he is surrounded ; he would be the hero of a barricade in Paris if he wer: not the leader ofa "party of gentlemen" in Canada. But let us not be so ridiculous as to place him beside the Beaconsfields and

A Few Plain Words About the Alms house and its Management.

Chatham, Jany. 22nd, 1883 EDITOR ADVANCE:-In the World 17th inst., there appears a report of pro ceedings of the County Council in session on Tuesday, 16th, a considerable portion of which is devoted to a discussion raised by certain remarks made by Coun. Peter Loggie in regard to the Almshonse and is management by the Commissioners. Conn. Loggie, to say the least, must have acted on very inaccurate information, his utterances on the subject are full of misrepresentation and utterly misleading.

unintentially, stated that three people do all the work of caring for the County's poor and get but \$250 a year for it. Now keeper Harrington's salary, as Coun. Loggie might easily have ascertained, had he cured to be correctly informed, is three hundred and fifty dollars per year. When e he was appointed to the position he agreed to take care of the house and perform all agreed to give him \$50 extra for that year.

wire-puller and manipulator, and of the set or ring before alluded to. By doing so he will avoid placing himself again to the position he was in on last Tuesday, in standing up in the Council room and making an exhibition of his ignorance and toadyism, to a common sense public. Did Coun. Loggie, in his character of reformer, say aught of the affairs of the fire department of this town ? Did h show up the state the steam fire-engin was in, and the way it was managed or

the morning of the late fire, when property was at the mercy of the flames, and only fortunate circumstances prevented a large portion of the town from being laid in ashes? Did he call attention to the tw. planked-in air-holes called tanks built last year by the firewards, and to the fa: they are dry and worthless in case of fire ' Or, is he aware of their existence ? If se, why has he not raised his voice in protest? Why, his silence on this subject, when there is such a large scope for his reformatory powers here?
