### York County Election.

The members of the Liberal party in New Brunswick are, no doubt, well pleased to learn that so able a represen-A SPLENDID OPPORTUNITY TO WIN A FORTUNE. FIRST GRAND DRAWING, CLASS A. AT NEW ORLEANS. Gregory, Esq., is before the electors of York County as a candidate for the House of Commons in the place of the late Mr. Pickard. Mr. Gregory's card is published and has the right sound about it. On the subject of his political creed he says,-

I believe that an economical administration of Government; the limiting of taxation to the necessities of Revenue the maintenance of Provincial rights, and resistance to the centralizing tendencies which now prevail, should be the aim of the Government of Canada, and I believe that these principles are fully recognized and adopted by the Mr. Blake; it is therefore as a Liberal Candidate I will be nominated : and if elected, I will unite with that party in bringing about a predominance of its

On the subject of Protection, or the National Policy as it is called, while recognising the desirability of encouraging such Domestic Manufactures as are adapted to the condition of the country. my view is that the requirements of Revenue will afford sufficient protection to such manufactures, and all that ought to be asked; I would therefore favor limiting protection to the amount of revenue required for the purposes of Government, and development of the

The above is a fair synopsis of the position of every Liberal on the mos important branches of public administration, and, unless York has greatly changed of late, it will be difficult for the high-tariff party to find a man abl to convince that County that Mr. Gregory is not the right man to send t Ottawa. The signs of the times point unmistakeably to the fact that the people, generally, are realising the er-COD LIVER OIL EMULSIONS, ror made in burdening the country with the high tariff now unnecessarily eating into every man's pocket, and the Revenue tariff party's prospects were never more promising than now. It is fitting, therefore, that the ablest representative men we have should go to Parliament to assist in fighting the battle on the people's side against that of monopoly and extravagance, in order that the change so necessary may be brought about with as little loss of time as possible. York will undoubtedly do her duty to the Province and be true to her Liberal traditions.

> We do not believe that the Frederic-SALE LOW! ton Reporter meant to recommend Mr. Gregory to the electors of York, because it had a candidate of its own ready, but the following will do much to suggest the desirability of York sending

> > Mr. Gregory to Ottawa,-"The county of York should send one of the best representatives the Dominion Parliament contains. The Metropolitan County of this Province, containing the capital city, should be represented by a man fit to take his place alongside the first men of the Dominion, and, if necessary, in the counsels of the country. He should be a good speaker, and able to take his part in the debates of Parliament; and particularly in the approaching contest principles before the electors of York.

And everybody who reads the above says "That's Mr. Gregory exactly."

# CHATHAM SKATING RINK.

The illustration herewith is a very correct representation of the Chatham Skating Rink which was erected last season on the corner of Church and St. John Streets. It is the property of a local incorporated Company and one of the best buildings for its purpose in the country. The ice area is 130x60 feet, which is surrounded by a continuous promenade 9 feet wide. The covering over the ice area consists of a clear arch of 60 ft. span, which is 30 ft. high in the centre from the level of the promenade and about 31 ft. 6 in. from the ice. This arched roof runs the whole length of the building-including the end promenades—without support or obstruction of any kind, and is surmounted by a full length "monitor" top, which has louvred ventilating sides. and glass sky-lights for lighting the rink from the top. The side promenades are covered by a lean-to, the framing of which is substantially kneed over-Liberal Party under the leadership of head to assist in supporting the main arches. There is a gallery sixty feet long and nine feet wide at each end, gained by two flights of stairs each. The main arches—sixteen in number—are built of twelve one-inch boards seven inches wide which were bent to form on moulding blocks and nailed and spiked to shape before being raised. These main arches, which are ten feet apart from centres, have purlins placed across them to which the roof-boards are nailed up and down. The lean-to roofs and that of the monitor are shingled and the main roof is covered with painted canvas. The sides have twenty-two windows on the ground or promenade floor and six in the second tier, two of which—one in the centre of each end—are triplet and circular headed. The main front, on Church street, is built out 12 feet from the line of the lean-to for a length of 50 feet, the centre being brought out 3 feet further for a length of about 15 feet and presenting a two-storied front, with gable to the street, flanked by the one-storey dressing rooms covered with hip-roofs

the whole giving a solid and sightly appearance to the Rink. The main entrance doors open outwards and the doors between the vestibule and promenade swing both ways, while there is a door in the St. John Street front hung on rollers at the top, which is easily and readily opened and is capable of letting out 1000 people in less than five minutes. The lighting is by four sets of gas jets dependent from the middle line of the arches, fourteen feet above the ice, each set having ten burners, while the band-balcony, vestibule and dressing rooms are also lighted with gas. An eighty feet flag-staff is placed at the front, and one at each end of the main rink—the latter rising about thirty feet above the monitor.

For size, beauty and convenience the Chatham Rink is second only to that of St. John, while many have expressed the opinion that it is more suitable for skating because of the absence of any central obstruction—the band-balcony being over the main entrance and leading off from a comfortable room used exclusively by the musicians.

The principle on which the Rink is built was embodied in a design procured in Montreal, but the plans and drawings worked from were made by Mr. Peter Loggie, of Chatham, who superintended the work as done by the contractor, Mr. James Carter.

The water-supply is through a 11 inch iron pipe from a spring reservoir located about half way between the Rink and the top of the Chapel Hill. It is sufficient for all ordinary purposes, furnishing about 3000 gallons per day at this exceptionally dry seeson. The Rink was opened for skating this season 22nd Dec. and, although the pastime is not fully shared in by all its patrons until after the first week of the New Year, the season promises to be a very successful one. Among the improvements since last season is the fitting up of the ladies' room, which

has been nicely ceiled and made warm and convenient. The Board of Directors for the present season consists of D. Ferguson, President; Geo. Watt, Secy-Treasurer; J. B. Snowball, E. Hutchison, Dr. J. S. Benson, R. McGuire, John Johnston, J. D. B. F. Mackenzie, D. G. Smith. Mr. Alex. Cantly is caretaker and is assisted in that work by his son. The Rink is opened during the skating season (ice and weather permitting) every week-day, (Saturdays and holidays excepted) from 1.30 to 6, and from 7 to 10 p. m., and on Saturdays and other school holidays, from 10 a. m.

The Rink Band is under the leadership of Mr. John Templeton. It furnishes music every Tuesday and Friday evenings. It is a very efficient organi-

The assailants were armed with sealing guns or hatchets; many, however, carried other and less deadly weapons. A green flag waved above their heads, and they spoke not a word nor offered any challenge as they rushed on the procession. Police Inspector Doyle was the only representative of the law at the scene of riot, and he was quickly rendered unconscious by a blow from a heavy bludgeon.
