The Secretary-Treasurer said that session a committee had appointed to revise the bye-laws of the Municipality, but as the Councillors so appointed had resigned, he had himself attended to the duty, and was now ready to report to the Conneil.

A motion was made to adjourn, where, upon Coun. Smith said it was desirable that the Council should finish its business to-day if possible, and that it would be well to take up the bye-laws and pass upon them in order.

The motion to adjourn being negatived, Councillor Fish moved that Council take up the revised bye-laws. Carried. A number of the Bye-laws were read and passed. When the bye laws to define the duties of Officers of the Municipality was read, the Sec. Treas, drew attention to the fact that the amount in the Bond given by him to the Counci had been increased from \$5000 to \$8000. Coun. Ryan asked whether the Sec. Treas. had given two bonds, one to cover the County Contingencies and Alms

House, and another for the County School The Sec. Treas. said he had given only the one boad as desired by the Council, and the amount had been increased to \$8000, which sum generally covered amounts in his hands.

Coun. Ryan said the law required two bonds, and he thought we should comply therewith. The amounts named for the School Bend was he thought as much as the sum now named in the Bond given to the Council to cover all the mone vs handled by the Secy. Treasurer.

The Secy. Treas. said Coun. Ryan was right as to the legal point, and if Council required it he was perfectly willing to give two bonds, although he had not been asked to do so hitherto.

Council then proceeded to further deal with the bye laws and a number were passed up to the adjournment at one

AFTERNOON. Council re-assembled at 2, and proceeded with the bye-laws. When the bye-law relating to Municipal Elections was taken up there was a short discussion on the section dealing with town and parish clerks Coun. Stewart contended that the sum of \$4 usually paid to parish clerks was insufficient to pay for personal services, rent of building etc., and he would therefor move that the blank be filled up with \$6. Coun. Ryan said in some instances at least parish clerks received \$4 independent of rent of building. He moved that the matter be referred to a committee, but the motion dropped, not being seconded.

Coun. Stewart said there was no byelaw to provide for rent of building, and to settle the matter beyond dispute he would press his motion that the blank be filled Come to the Wood. Coun. Stewart said, as one of the councillors for Alnwick he had not been requested to present the petition, and he would show good reasons why it should not be adopted. He explained that in the first place David Petrie, the father of the petitioner, had applied for a reduction of his valuation, as the mill property formerly owned by him had passed into the hands of Mr. Wm. Murray of Chatham, of \$1000. David Petrie's valuation was reduced \$1000 accordingly, altho' he had asked that the amount be reduced by \$2000, the valuation he himself placed upon it when the mill passed out of his hands, but to which the assessors would not consent, as they considered \$1000 a fair valuation, and made out their valuation list accordingly. CURE FOR A KICKING HORSE.-At Mc-Farland's stables, on Monday, we saw contrivance to cure a horse from kicking. It was nothing but an old wheat sack filled with hay, and suspended by a rope from the ceiling, so that the sack hung just at the heels of a vicious horse as he stood in his stall. When the sack was first placed in position the kicking equine let fly both feet at it as soon as it touched him, but after ten or twenty minutes of that kind of work he came to the con clusion that the sack would return as often as he struck it, and he finally gave up trying to "knock it out." This same horse, which has a reputation as a kicker, can now be hitched to any vehicle, and he will not kick at anything that happens to strike his heels. John McEnerney, who prescribed the treatment, says that any horse can be cured by it. One good feature about it is its cheapness. - Ex-

An excellent way to build a stack is to set a tall sapling firmly in the ground, with a foundation of payment as the man was poor, but he rails around it; then begin at the centre, and place the hay about the pole gradually spreading, until the edge of the base is reached. Continue building up the stack, the highest in the centre around the pele, the builder standing in the center so as to tread the hay firmly there. As the

PITCHING MACHINES,

made by Walter McFarlane.

All Mowing Machines do good work while new. Some are made to sell quick and wear out quick, but Cossitt's Buckeye Mower is strongly made, runs easy, wears long, and will do good work when any other mower, having done the same amount of work, is useless. The Buckeye has the strongest yet simplest gearing system of any mowing machine made. There are only 4 gear-wheels.

COSSITT'S RAKE is acknowledged by all who have used it to be the best in the market. A boy 10 years old can operate it with ease. It is simply constructed and contains no part liable to get
