RIVERS-THE SYSTEM OF LEASING. An American correspondent writing fountain of sparks was thrown for a disfrom Dalhousie, N. B., to the Boston Herald, among other things says:

AMERICANS IN POSSESSION OF PROVINCIAL

"Americans have gained the better, of claiming, "There's a bomb in here." A one 'fishing question' at least; they have the same instant George Brown, an em invaded and taken possession of provin- ployee of the Company, rushed from the cial salmon rivers, and their name is cabin carrying a dark object which still egion. There has never been a season when so many of our countrymen have spread themselves over the northeast in search of this most thrilling sport. The accent of Boston, New York and Philadelphia is heard all the way from the Miramichi to Labrador. There have been no armed cruisers in the way, but the life was placed until he was ashore and natives have made up for their toleration by extracting from their visitors a goodly store of dollars for leases, fishing privleges, services, provisions and various sundries. Among the last may be counted fishing tackle. for the comparative cheapness of the angler's outfit in the provinces induces many Americans to delay their purchases until their arrival in a Canadian city, at a little expense to their patriotism, perhaps, but with less to their pockets. One of the St. John dealers told me that he had sold every salmon rod and every 'silver doctor' fly which he had provided, and the demands of his customers and the answering of letters and telegrams from the river left him no time to

make more. The salmon fishermen, as I have said are many, but the salmon this year are few as compared with last year's run. Or rather they have taken the fly more reluctantly than last year.

There are plenty of natives along the Restigouche who receive more ready money from the rental of their water than they ever get from their farms. The

SYSTEM OF LEASING by the way, has caused considerable dissatisfaction on account of the monopoly of water by a few individuals or clubs. McLeod had already told about the tramp There is nothing to prevent this where who, failing to obtain nutriment at the the land has been taken up, although it house of a wealthy lady, went on all fours would be more advantageous for the farmers to rent good pools by the day or and she asked him why he did it. There is salmon fishing on the Restigouche for 60 or 70 miles above Metapedia, and for much of this distance the river flows through government or crown land. The New Brunswick parliament has considered the advisability of opening the government fishing privileges, and there will be a strong mevement to this effect, I hear, at the next session. This will give scores of anglers opportunities hitherto enjoyed by only a few. Some revenue must be derived from the water to meet the expenses of guardianship and lowa. restocking, but this can be done by issuing licenses for a certain fixed sum by the season. The change would bring many

more people into the provinces and the money of the wayfaring man is very serviceable to the natives. If the crown waters of New Brunswick are opened. many an American angler, ambitious to crown his career with the capture of a salmon, but at present deterred by the cost of leases, may hope to realize his dream."
