A NOVEL LAW SUIT. -A novel law suit, in which D A Holms, of Springville, N. S., is plaintiff, and Frank A Robbins, Robbins' circus, is defendant, will come before the Nova Scotia courts. It appears that the circus bill posters, for a consideration, obtained liberty to post their bills on a barn adjacent to the road, and as the p'aintiff and his wife were driving by their horse took fright, whether it was at the picture of the Circassian lady or the fat girl no amount of persuasion would lead the horse to divulge. Both occupants were thrown from the wagon and the latter demolished. The suit is brought merely for the price of the wagon, which was paid under protest, and a law firm retained to defend the case.

AT DALHOUSIE. -Sir John A Macdonald and wife, Hon. J. Carling and family and Mr. Scarth, M. P., of Winnipeg are among the guests at Inch Arran Hotel. A local organ of the Tory party says it is reported that at a meeting of the Liberal-Conservatives of Newcastle a delegation was appointed "to wait upon Sir John. and it adds that he will be glad to see them. We doubt it. He doesn't have a very high regard for adherents who upon. make such a show of the party as those in Northumberland did last winter. Besides, the hotel management, no doubt, has persons employed to wait upon their guests and the Newcastle delegation would be an awkward squad at the business. While they would, perhaps, be glad to do anything he might wish, they will best please him by letting him enjoy his holiday time without volunteering their services as "waiters."

PERSONAL .- H. A. Muirhead, E.q. has gone to England and Mr. John Gray is conducting his ship chandlery business during his absence.

Mr. DesBrisay has built a miniature model, which works like a charm. His engine is single valve motion, one valve controlling the cylinders. The locomotive engines now in ma are double valve, two link valves being employed. Mr. DesBrisay's invention will do away with a considerable amount of machinery and gearing, while there will also be an economy of friction. The model. which was built at the CPR machine shop by the inventor, weighs about eighteen pounds and shows plainly the advantages it possesses over the ordinary locomotives. We hope Mr. Des-Brisay sinvention will prove as great a success as it promises, and that its owner may have his largest hopes more than realized. He has applied for a patent. HALIFAX, July 25 .- A sensation has been produced in official circles by the reports of the seizure of three American fishing vessels. The rumor was based on the following facts: The season hitherto has been so quiet that the seizure of three vessels in one day is a most unexpected event. There was a big strike of mackerel inshore on the Prince Edward Island coast on Sunday. The beautifully fine weather drove enormous quantities of them inshore. There was over one hundred sail of Americans in Souris hargathered in a rich harvest. There was only one cruiser to watch the whole fleet and it was of course impossible to protect the whole school. The great mass of Canadian fishermen refuse to fish on Sunday and the one hundred Americans had almost the whole thing to themselves. There was honesty and frankness on the part of that liquor seller in Newcastle, who was lately brought before the police magistrate charged with violating the Scott Act. He admitted the offence and when asked to state to whom he sold declared that among the purchasers were the Magistrate who was trying him, the attorney who was prosecuting, and the constable who summoned him! The Magistrate with spartan heorism inflicted a fine of \$50 on the offender. Sol Smith Russell.

Our amusement-loving citizens may depend on a first-class entertainment at Aug. 2nd. We take particular pleasure in announcing the appearance of the great comedian, -Sot Smith Russel, in Masonic Hall, and when such attractions visit Chatham we hope our play-goers will turn

In a particular line of humorous representations, the portrayal of peculiar eccentric characters drawn from every-day life and experience, Sol Smith Russell is unequaled, his facial expression is really wonderful, and these, aided by a keen sense of the ludicrous and ridiculous, make him a prime favorite with those who go to the theatre to be amused. As Others See Us.

A long period of government by corruption in Canada has led people outside of him. Hemorrhage of the stomach followed this country to discuss our merits as a community. The pictures which intelli- hours after his body had been brought gent students and experienced and accomplished writers on matters concerning popular government draw of the political condition of Canada are not flattering, and it is one of the unfortunate features of the case that an honest inhabitant of this Dominion is not in a position to deny that the dark shadings have justification in our political history. If any outsider were to say anything reflecting upon the social and domestic intelligence and morality of our population, there would be no difficulty in making comparisons with our critics and censors, whether in the United States or elsewhere, but when it comes to a discussion of the political morality of the coun-Smith to any field of labour. It was the try it must with all sincerity and due humiliation be confessed that our "offences are rank and smell to heaven."

In the July number of the Forum, a leading and influential publication in the United States, Mr. David A Poe, who evidently understands what he is writing about, has an article upon Canadian affairs which should lead reflecting and moral people in this country to a very serious consideration of the means of killing the canker which is knawing the life out of our political affairs. His remarks upon the increase of the public debt of the Dominion, and the very inadequate showing that is made for it, are anything but flattering, and we are bound to admit that he is right. If this country had been run by lunatics for the past nine years a worse result could not have been achieved. Folly and madness characterise the whole business. But when he deals with the carnival of corruption which prevails at Ottawa his remarks are most trenchant and should cause Tories of respectability to blush. It is hard to be told by an outsider, and a most accomplished and intelligent one at that, who has studied our politics, that we have the most corrupt government in christendom, but who in view of the facts, will venture to deny it. rapidity.

Here is the picture he draws: "So deeply has this principle of the plunder of the state for the benefit of the province become implanted in the political affairs of Canada, that, judging by the result at the polls, it is a virtue in the politician to secure the advantage of his province, his constituency, and his own personal and political friends. Sad Drowning Accident.

A report published by the Moncton Transcript last week stating that the parish priest of Campbellton had died hemorrhage or been drowned on Saturday, 16th inst, caused somewhat of a sensation in Chatham where Father McDonald is so well and favorably known, and there was a feeling of relief when it was learned that the Rev. gentleman was alive and well. The report, however, arose from a sad event which took place on the Quebec side of the Bay Chaleur. It appears that Father Dumas, Parish priest of St. Eloi, Quebec, was fishing up the Nouville river, opposite Dalhousie, in company with Father Lavelle and three others. When returning and passing a series of rapids the canoe in which they were, filled and apsized, precipitating the entire party into the water. Father Dumas was un able to swim and was being assisted ashore by one of the party, a man named Carr. When near shore, Carr found him self sinking and to save himself, shook Father Dumas off. After getting ashore Carr waded out to where Father Dumas was and found he had sunk in shallow water, probably from exhaustion. The body was brought ashore, and life not being extinct efforts were made to revive and Father Dumas died in about three

Poisoned Ice Cream. A Portland, Maine, paper reports that t an ice cream saloon in Portland, on Wednesday, a number of persons were poisoned by the use of ice cream of that day's make. The maker at once shut off the sale and put the matter in the hands of the Board of Health. A microscopical examination has been made of a sample of the ice cream that poisoned nearly one hundred of a New York picnic party the other day. The microscope revealed a peculiar formation of vegetable fungus. The fungi were of a vivid green color, and cliptical in form. The chemist says that this fungoid growth, is spontaneously generated in milk under certain conditions, and is poisonous. It is often found in pure milk, and in some cases within a short time after it has come from the cow. The New York Times gives the name tyrotoxicon to the poison. This is a very obscure poison first discovered by Prof. Vaughan of Michigan University. Many cases of poisoning by this substance are on record. Recently, nearly 200 persons in Amboy, Ohio, were affected by it, although the local physicians were at first inclined to assign some other cause. The poison is a product of decomposition, but it seems to be developed sometimes in spite of all ordinary precautions on the part of the manufacturer. It is assuring, however, to know that all the New York victims of the poison recovered, although they were very sick. An analysis of the New York cream established the fact that the poison was a result of decomposition of the cream began before the process of freezing. Freezing averted the production of the poison, but as soon as the cream was heated by the digestive organs the averted process was set free again and proceeded with great

To the Electors of the County of Kent. GENTLEMEN:-I beg most respectfully to | want a liberal policy pursued towards our announce to you that I will be a candidate hardy pioneers of the forest, and would or your suffrages at the approaching elec- secure to them greater privileges than they tion of a member to represent you in the possess under the present system, and

It seems to be conceded all round that on the Crown Lands. Under the present in justice to the English speaking people of | plan it often happens that improvements the County, one of their number should be bona fide made by one person are afterreturned as your representative at this wards granted to another without adequate time, and that the choice should be left to compensation being made.

While I believe that neither race nor creed should be considered a qualification I feel assured that in order that we may for a representative of the people in this free country composed of all nations and creeds, yet, perhaps, all other things being | is necessary that some combination of the equal, it would only be graceful that the lower provinces be entered into to give vacant seat should be conferred upon one speaking the English language as his in the general Legislature at Ottawa that mother tongue. If this be so then the choice of the Can-

didate would seem fairly to belong to the English speaking people themselves and our Acadian brethren should loyally assist them in returning the man of their choice. I have endeavoured, in the short time that has elapsed since the announcement of the election, to obtain a meeting in convention of the people for the purpose of making a choice of a candidate, but

ment of that object. I know that my Candidature is approved, however, by a large number of the electors, and from the support I have received in the past I can fairly assume that my claim to be the choice of the English-speaking people of the County is

time has not permitted the accomplish-

well founded I have run several election contests in the County, and have had the honour of representing you for one term in the General Assembly and in every contest I had the proud boast to make that I received a large majority of the votes of the Engmy hands the best attention which my

glish-speaking people. At the very last election, a little more than a year ago, I led the poll in every English-speaking polling district in the

County. I am induced to believe that I will receive a generous support from my Acadian friends also, as many of them especially from Dundas, where I had the honour last election of being placed at the head of the poll, have strongly urged me to of. fer at this election and assured me of a liberal support.

With those preliminary explanations gentlemen, I now most respectfully solicit your votes and influence in the coming

I need not inform you that in politics I ernment that will carry out the great p inciples of the Liberal Party. to a license obtained from the Judge of Probates for the said County of Northumberland, the lands and premises following, that is to say:—All that lot or parcel of land situate, lying and being on the South side of Napan River in the said Parish of Glenelg and bounded northerly by the said River. Easterly by land presently owned or occupied by James Tallon, Westerly by lands presently owned or occupied by Thomas; Jardine and extending in rear to the extent of the original grant, with the buildings and improvements thereon. I am now, as I have ever been, an ad-

vocate of the extension of railways, believing that the time has come when they are as essential to the business and commerce of the Country as the common highways formerly were. 1 will, if elected, do my best to promote the great Shore Line Railway from Cape

ments thereon.

Dated this thirteenth day of July, A. D. 1887.

BRIDGET McGINNIS, Tormentine Via Grandique and Cocargne, to Chatham, for I am convinced that the prosperity of the County of Kent, through which the line would pass for sixty miles, depends largely upon the building of that

The Subscriber has now opened a Coffee and Eating House, where the travelling public may obtain cheap and wholesome Refreshments at unheard of prices. Hot Coffee, Tea and Soup always really. Give me a call. A good dinner for a few cents. I will in the meantime strenuously advocate the immediate building of that portion of the road lying between Buctouche and Richibucto and I will set my face against any policy of delay in constructing that important section.

I will agitate, to the best of my ability, connection with the Central railway now building from Fredericton to Apohaqui at some convenient point on the Intercolonial railway in the County of Kent, which connection would, in my opinion, assure the rise and progress of the villages of Kingston and the Shire-town, being the shortest possible route between Fred. cricton and Prince Edward Island. With railway connection with Shediac,

Moncton, Fredericton and Chatham, and Berkshire Boar, the banding together our own County towns and villages, the future progress of the County of Kent on the road to wealth and properity is certain beyond all reason-The lumbering business of the County

now fast falling into decay demands that other branches of business be opened up to give employment to the people, and it can only be secured by railroads. After what we have witnessed in that direction in the past twenty years who is the man bold enough to say that all these

things may not be near at hand? If you desire to secure these advantages come forward now to the polls and help me to a position where I shall be able to raise my voice and use whatever talents I may possess to obtain them for you.

Your general local wants -roads, bridges and such like-shall always have my watchful care and attention and I will endeavour to secure as large a share of the public expenditures for such purposes as it is possible to obtain. The promise which I made to you in
