Miramichi Advance,

sat for Queen's County last session in the seat which Mr. G. G. King was elected to occupy, having resigned and run a new election, has been returned with an official majority of 111. From the facts published it is evident that the Deputy Returning Officers in two parishes which were strong for Mi King, manipulated the ballets in scandalous manner and thus secured majorities for Mr. Baird. The Telegraph, which first published these facts seems however, to have changed its views, and now attributes the adverse result to the annexation sentiments expressed by the Globe. On declaration day Mr. King and his friends plainly charged the manipulation of ballot against the officers and there was no mention of the annexation business having influenced the election in any way. They take their Choice and Suffer.

enced, who, too often, are tempted to disappointment in the end. We have steadily endeavored to influence public

Curling.

Curlers, the world over, recognize the fact, which has become an axiom with the fraternity, that the game is a very "slippery" one. The clubs of our Maritime Association now know also that the astute guild to which they belong possesses the distinction of having introduced a new element of uncertainty into the larger competitive meetings of its always enthusiastic members, which, while it may not encourage the more skilful, or please the veterans who have borne the frost and vicissitades of the game in New Brunswick and Nova Scotia, has done everything possible to encourage and bring to the front those who make up, in pluck and enthusiasm, for what they may lack is the exact science of "the rink." As all clubs have had their beginnings, and some have, even under the old regime, snatched their "snap" victories, none should envy the young border club of St. Stephen the eminence which a fortunate combination of circumstances has admittedly enabled them to gain. At the same time, skill and experience should go for something and, if the Maritime Association is to be successful in its mission, it must not simply make its bonspiels nursery matches. It will, probably, do better in the direction inmerit-a real contest between those who have reduced the game to a science

Many horses are subjected to much pain by the bits being put into their mouths on severely cold mornings without precaution being taken to free them from frost They should be carried into the house and thawed out by the kitchen stove, or dipped in a pail of water. If you want a les son you will not soon forget in regard to this matter, put your tongue against a bit that has been exposed all night to a zero temperature. It will stick fast, and you will not get it free without leaving some of the skip behind.

It pays to blanket horses. Feed is saved thereby. The labour of grooming is lessened, the appearance of the coat greatly improved, and the comfort of the animal, promoted. A humorous advertisement in one of the agricultural journals presents two engravings-one entitled "A Cold Night," shows an unblanketed horse, looking all shivers; the other entitled, "A Cold Morning," shows the same horse lying stark, stiff and dead. Underneath the last named picture we read: "Two dollars spent for a horse blanket

It is stated that the brood mares of the draught breeds in England, Scotland and France are the work horses on the farm. This being so, there does not appear to be any reason why farmers here should not follow the example. Some good breeders we know claim that brood mares are all the better for being worked, and assuredly there is greater economy in thus using them than in the common p'an of using geldings and keeping the mares in idleness. The double purpose, if followed, will make horse-breeding far more profitable

"My horses never lie down in their stalls," remarked a farmer to me not long since. "They lie down in the pisturefield, but not in the stable." "How wide are your stalls?" I asked. "About five Marriage Ceremony, feet," was the reply. "Too narrow," I said, "for anything but a Shetland pony." Horses can rest and sleep standing, if they are allowed to choose a favorable position for so doing, but it is only part al they are able to take the recumbent posi-

the hoofs are forced continually to bear a thart, Jonas Clark. great weight. Nature intended every part of a horse's frame to have a period of rest during a portion of the twenty four hours, and there is little doubt that many diseases of the joints and feet are caused by too much standing, necessitated by want of room to lie down comfortably.

Veterinarians tell us that horses and eattle are quite as subject to kidney complaints as human beings, and we know that constant use of ice-water will soon bring on these disorders in the case of the human animal. This is one of many rea-

for the cure of mange in horses: -Mix together equal parts of paraffin oil and linbrush. An effectual and safe medicine to spoonful daily in the food.

are the most important points for the good getter of draught colts should not showy, young horse. - Prairie Farmer.

A foreign journal pertinently says that the lingering idea that the Arab horse, his English brother, grows more purely height, and the Oriental champion, although he had been first in the betting, baseless fancies of the imagination fade

len from the trees and placed them in exercise and kept them warm.

A Joyous Type-Founder at Last.

Surveyors of Lumber, David Weaver, Jr. R D

The last drawing of The Louisian State Lottery has rendered at least one San Franciscan happy, and he is William Leslie, of Palmer and Rey's type foundry, No. 407 Sansom St., who resides with his family at 2,505 California Street. He had the good fortune to hold a one tenth ticket in Second Capital Prize of \$50,000, his share being \$5,000 the money being drawn through the agency of Wells, Fargo & Co .-San Francisco (Cal.) Chronicle, Nov. 30.

t is a light thing. But it may run in to catarrh. Or into pusumonia. Or con-Catarrh is disgusting. Pneumonia is

son, John S Pond, N P Wilson, Walter R Price, you don't know this already, thousands Nelson Jan, 24th, 1887.

and thousands of people can tell you. They have been cured by it, and "know how it is, themselves." Bottle only 75 cents. Ask any druggist.

## How to Care a Gold.

Mark Twain in his peculiar vein of humor has said many funny things illustrative of the "hobbies" of maakin 1; but

none of them surpass his story of how he Every friend he met for weeks, had a "sure cure" to suggest, until finally the

remedy used got the credit for the cure. Experimenting with a severe cold however-now trying this renely and then that, is dangerous business; for like lightning one can never tell where a com may strike or finally settle. It may locate in the head and cause severe nasal catarrb; it may locate in the throat or large bronchial tubes, causing sore throat, laryngitis, bronchitis and consumption, it may locate in the pleura, producing dangerous pleuropneumonia; it may locate in the muscles causing pains and aches only equalled by rhoumatism, or it may locate in the small bronchial tubes or air cells of the lungs,

There is a right way to do everything, so there is a rational treatment for a cold. which must be cured promptly. The first result from a cold is the retardation of every secretive function in the body. Skin, lungs, ki lneys and bowels, severally or all are affected. Therefore, the first thing to be done is to restore the functions of these organs. Because of its effect; upon the skin, the old-fashioned "rumsweat" was an excellent method to restore the action of the pores of the skin. But it is a dangerous method to use, because few people are willing to confine them selves to the house long enough to recover; and to expose ones self immediate. ly after a sweat or warm bath, is risking

New England people, some method must be used that will admit of a person attending to their daily labor as usual.

Among such people, probably more colds, more cases of catarrh, bronchitis, sore throat, cough and hoarseness, have been cured by the use of Johnson's Anodvne Liniment than any other remedy known. The large circular wrapper around each bottle, contains simple and plain directions for treating and curing all these complaints. The proprietors, I. S. Johnson & Co., 22 Custom House St., Boston, Mase, will send to any address,. free, a valuable pamphlet on the subject. Or for 35 cents, they will send one bottle: of Johnson's Liniment. Six bottles for \$2, express paid to any express office.

## Mothers!

Castoria is recommended by physicians for children teething. It is a purely vegetable preparation, its ingredients are published around each bottle. It is pleasant: to the taste and absolutely harmless. 1t: relieves constipation, regulates the bowels., quiets pain, cures diarrhœa and wind colic. allays feverishness, destroys worms, andi prevents convulsions, soothes the child and gives it refreshing and natural sleep Castoria is the children's panaces-the mothers' friend, 35 doses, 35 cents.

Queen's County Election. The somewhat notorious Baird, who

Our local temperance friends appear o have the misfortune of not knowing. at all times, what is best for the cause they wish to promote. They, therefore, share the experience of other moral reformers who are obliged to learn by experience that it requires judicious treatment of both friendly and opposing forces to win success and make headway against the latter. Patience and prudence cannot keep pace with the demands of the hot-headed and inexperiabandon those who go slowly, but safely, in order that they may trust their fortunes to others, whose ambition and presumption-fruitful in boasting and promises -- only court defeat and bring always had faith in the gradual growth temperance principles, and have sentiment in that direction. In doing so we have gained no friends, but made sacrifices-which we, by no means, regret-and have, therefore, the right to deplore the childishness and incompetency which characterised the policy

and conduct of the so-called temperance advocates at the late session of the Municipal Council at Newcastle. I s discouraging to realize that good causes are so often retarded by being espoused by would-be lealers, whose acquaintance with public methods, as applied to the work which they only mar, is as deficient as their knowledge of the qualifications requisite in those who aspire to representative positions.

would have saved a hundred dollars." than it has hitherto been in this country.

joints and the complicated structure of

John Robinson, Sr., John Dalton, Jas B Russell, John McKendy, Wm Sullivan, sons why it is not advisable to give stock Thos H Ramsay, Benj Reid, Pat'k Sulliice-cold water in the winter time. It is van, Wm Innis, Jeremiah Craig, Jas Rusa good plan to put the big wash-boilerful sell (meht), Thos Holloran, Alex Russell, of water on the kitchen stove at bedtime. jr, Jas McIntosh, Henry Faiconer, Dan' Then in the morning when you attend to the horses and cattle you can easily take Robt McCosh the chill off the well water. It is especially necessary to do this for cows that are sell, Thos Haviland, Fred Cunningham. giving milk. They will soon fall off in their yield if compelled to drink ice-cold Ritchie, John Hogan R H Gremley, John Ferguson, John Brander, P B Wheeler, Rolt Retchie, Geo Hildebrand, James O The following is a very useful dressing Fish.

seed, or train oil, and to every pint of this mixture add three ounces each of carbolic acid and solution of potash; well shake these together and apply with a give internally is the following: -Nitrate of potash, four ounces; flour of sulphur, eight ounces; black antimony, three ounces. Mix these, and give one table. Good legs and feet under the stallion

breeder to consider. The honest, straightforward walk is better than the highstepping gait which is too often thought to indicate "a combined trotter and draught animal." The draught disposition, together with intelligence and endurance should be sought for in this class of horses. The stallion that has proven himself a be abandoned for an unproven, though

but for his inches, would be better than romantic every year. A contest occurred ately in Cairo between an Arab of recognized superiority and an English mare, he latter carrying fourteen pounds nore of weight, both of exactly the same was beaten out of sight. Thus do the

The other day, in the Lake district, a farmer said his hens were continuing to lay well. Before the cold weather set in he collected a number of leaves that had falshed. Every morning, when the fowls were let out, a warm meal was ready for them, containing scraps from the house, with a dash of linseed meal and cayenne pepper. The grain for the day was then thrown in the leaves in theshed, and the scratching to find it both gave the fowls
