size, but the past week there has not been one caught. THE LOBSTER PACK. The lobster fishing has ended and it has been a very poor pack. The lobster did not appear to be any scarcer than other years, but the windy weather was the cause of the poor season. DISHARTENING WEATHER. The past week has been a very stormy one, and has almost disheartened the lobster packers on account of the wreck that will be made among the traps and rigging. Everything is at a stand still; large crews are at the factories and nothing doing on account of the rough weather. The oldest fisherman says that he never saw a worse time. The salmon fishermen will also be heavy losers and this easterly weather has come to make a bad season worse.

Visitors down here during the past week required for coats and mittens. Captain Forbes and Joseph B. Williston Esq. with their ladies, were down last week to see the wonders of the Point. NATIONAL PILLS are sugar coated, mild but thorough, and are the best Stomach and Liver Pills in use. Fete-day at Daoktown. A full report of the laying of the corner stone of the new church at Daoktown by Rt Rev Bishop Kingdon, and the picnic at that place on the 6th inst., had to go to the waste basket, being crowded out. Our correspondent on the spot wrote to say that the grounds were tastefully decorated with flags and evergreens. The excursion train from Fredericton brought Bishop Kingdon, Chief Justice Sir John Allen and Lady, Auditor General Beck, and other prominent persons. The ceremony being by the Bishop. Judge Allen and the Bishop delivered interesting addresses.

Has a way of its own of getting to the front! Its routine plan was a long ago recognition of a popular want, its simplification of the application was another great step in advance. So of its incontestable features and other popularizations of the life contract and the insurance method. The Equitable's latest advance movement is the simplification of the insurance contract itself. It will issue to any successful applicant a policy which the Society itself describes as a simple promise to pay on maturity of the contract; Well, why not? The precautions in regard to issuing a life policy are, and ought to be, almost entirely preliminary. The applicant ought not to be released from the responsibility of his own declarations, to be sure, but after all, a company when it grants its policy is supposed to have exhausted pretty nearly every human device for its own protection, and nothing short of fraud (which vitiate all contracts) should be set up after the man is dead in bar to the claim. Then, unlike fire and marine, a life insurance loss adjusts itself; the man is dead! If there is no question about identification, there should be no question at all, the "proofs" are complete, the claim is ready for payment! Under such a state of facts the wonder is that some company did not long ago recognize how little there was in the ancient life policy worth preserving, and how little of vital consequence it would concede if it threw away all the conditions beyond the necessary ones for the proper disposal of the money when the policy becomes a claim. Now that the thing has been done, it is "as plain as the nose on a man's face," and it is just like the Equitable to step out front and do a good thing while others are hunting around after it has been found.
