Baby one Solid Rash Ugly, Painful, blotched, malicious.
No rest by day, no peace by night.
Doctors and all Remedies failed.
Tried Cuticura. Effect Marvellous.
Saved his life.

Cured by Cuticura.

Our oldest child, now six years of age, when an fant six months old was attacked with a viruent, malignant skin disease. All ordinary remedies failing, we called our family physician, who attempted to cure it; but it spread with almost redible rapidity, until the lower portion of the little fellow's person, from the middle of his back wn to his knees, was one solid rash, ugly, inful, blotched and malicious. We had no rest night, no peace by day. Finally, we were ad vised to try the CUTICURA REMEDIES. The effect was simply marvellous. In three or four weeks a complete cure was wrought, leaving the little ow's person as white and healthy as though he had never been attacked. In my cpinion, your valuable remedies saved his life, and to-day he is a strong, healthy child, perfectly well, no repetition of the disease having ever occurred. GEO. B. SMITH, Att'y at Law and Ex-Pros. Att'y, Ashland, O

Boy Covered with Scabs,

My boy, aged nine years, has been troubled all is life with a very bad humor, which appeared all over his body in small red blotches, with a dry white scab on them. Last year he was worse than ever, being covered with scabs from the top of his head to his feet, and continually growing worse, although he had been treated by two physicians. As a last resort, I determined to try the CUTICURA REMEDIES, and am happy to say they did all that I could wish. Using them according to directions, the humor rapidly disappeared leaving the skin fair and smooth, and performing a thorough cure. The CUTICURA REMEDIES are all you claim for them. They are worth their weight in gold.

CHATHAM, N. B. - - DECEMBER 5, 1889.

The Question of Questions.

of claims of the North Shore in regard to Stumpage. He was ported by the Transcript to have said at Elgin that only one county taken a stand in reference to it, while the Sun's report represented him as applying the remark to three counties. Before he hears the last of he will, probably, realise that more than four counties will take a stand on the question and require for their claims an attention which he cannot be induced, just now, to bestow upon

The Lumber Outlook.

The London Timber Trades Journ-

on the trade says: lished on another page of this paper, shows the import of the ten months just ended at the chief centres to be of a decidedly heavy character. London the total of both sawn hewn leaves an excess over last year of 151,976 loads. Liverpool in the same period exceeds last year 160,543 loads, and Greenock exceeds its previous import by 50,142 loads Hull, on the east coast, shows a gain over 1888 of 112,160 loads, West Hartlepool being ahead of last year by 102,268 loads. Without going further into figures we might enum-Gloucester, Bristol, Poole, &c. ; in fact, the increase may be described as general. The total of sawn and hewn to all places at the end of months' import of 1888 of 1,106,897

Referring to the statements made a short time ago, the "Journal" says: It was also stated by parties on the spot that they did not believe in more than a good average importation, this unusual crowding in of wood-laden ships all of a heap notwithstanding.

The October official returns do not admit of this delusion being any longer entertained. Since the estabishment of this Journal some sixteen tion of wood goods has exceeded the supply of the ten months just gone by of 1889, except 1877. The comparison with that and the present stands thus :-

For the 12 months of 1877, 6,652,361 loads 10 months of 1889, 6,635,826 "

Difference 16,535 loads and since 1877 no year's total has come within 175,000 loads of this

year's supply to the 31st October. The importation of the months of November and December, according to the average of the past three years, may be estimated at about 300,000 loads, and we see no indication that these figures will not reached ere the year closes; so that we can estimate the probable total at about 7,500,000 loads, by far the largest supply of wood goods ever previously imported in the United Kingdom in one year.

And the same paper of 23rd ult., in its Liverpool notes, says :-

There is little inclination by buyers, especially in the country, to increase their stocks or to purchase more than they require until the turn of the year. This is the customary feeling at the end of the season, and we shall probably see a considerable reduction in the deliveries dur-

Still we shall want a good winter trade to reduce many of the most important stocks to reasonable limits. Happily this is not improbable from all outward signs, for there is a good shippers, who have had a good time such decisions may be, as hitherto, should pursue a very ous policy, and reciprocate the feeling which is now becoming a strongly-marked feature in the trade on this side. They must not forget that the stocks here are heavy, despite the large drainage upon them that has continued with no intermission during the summer.

The Scott Act Sustained in Freder-

The fourth election in Fredericton under the Canada Temperance Act took place on Thursday last and resulted in the Act being again sustained. The first election in chat city was held in October 1878sulted in the Act being brought in force by a vote of 404 against 203, ligion, the the majority being 201.

After a four years' trial, and experiences similar to those of all other communities where the Act has been in operation, a petition for repeal brought on a second test, and the vote was 293 in favor and 252 against the Act, which was, therefore sustained by a majority of 41 Three years then elapsed, and another election was brought on, when the vote was 298 for, and 285

against the Act-majority 13. On Thursday last the vote was plan for creating Sunday noises and 370 for the Act and 302 against it -making, for the Act, a majority of

Earnest work was done by the friends of the Act, although many practical temperance men are said to have been opposed to it, because they believed the provincial local option and license act a more effective measure for suppressing the traffic and lessening intemperance in the community. It was, of course, impossible for these latter to work with the more active repealers, whose reason for wishing repeal was that the traffic might be legalised, and that was, doubtless, why there was no organised campaign in favor of re- of stratified rock identical with that of The question naturally arises, Why are Following upon news of the great and damage to the amount of \$90,000 peal. Besides this, the women of the oil-bearing kind found hundreds of these dangerous currents used at all, fire at Lynn comes that of an equally was done to the building and contents.

the Act, in the interest of their homes, etc., and that, no doubt, accounted for the fact stated in the press that many men, who were Primier Blair seems to make light themselves frequenters of the barrooms which flourish under the Act. voted to sustain it. In view of the earnestness of those

repeal, and the fact that the repeal-

ers did not seem to have the courage

publicity, confidence and enthusiasm -the same faith in the righteousness of their cause-outsiders, regardless of their own opinions on the subject. could not but sympathise with the result. Now, if the victors will do as they have always done-practically retire from the field after the battle has been won-the advantage they have gained may be made to mark a new and encouraging feature al of 16th ult., in its general notes of Scott Act experience. This last vote in Fredericton indicates that The distribution of imports, pub- fully one-half of the people have no confidence in the Act, for it must be remembered that while perhaps every available vote in favor of the Act was polled, many who had lost confidence in it refrained from voting because they did not wish to oppose those who were undoubtedly working against the traffic, although their ideal, in the matter is one which experience has shown to be impracticable. It is, therefore, clear that if there is to be an improveerate Cardiff, Fleetwood, Grimsby, ment in the respect shown to the Act, the warfare against the liquor from whence comes the supply and how traffic must be earnestly continued generated, of this great natural comby those who fought so valiently modity; also the methods adopted by against repeal on Thursday last. Since the result was known, meetings loads, equal to nearly 370,000 stan- have been held and funds subscribed to back up prosecutions against those who may still continue to violate the law. Nearly three thousand dollars are available for the purpose. This seems to mean business, and we hope it does, but does it not suggest that a law which requires such great and constant efforts to keep it in operation, and so much money to enforce even partial respect for it, requires either radical remodelling or to be years ago, no whole year's importa- replaced by a measure more effective in repressing and stamping out the evils of a traffic which, it seems, can never be entirely annihilated, how ever devoutly such a consummation may be wished.

It isn't Businesslike. Registered letters mailed at Tracadie on 30th ult., addressed to parties in Chatham, did not reach their destination until the 3rd inst., because they were sent around by way of Bathurst. We have no disposition to unnecessarily complain of postal management, but when there is a direct daily mail between Chat ham and Tracadie, by which mailmatter reaches its destination just one day earlier than by the roundabout route via Bathurst, it will be understood by everybody that we are right in asking the postal authorities to abandon their recently-established practice, to which we have, before, had occasion to direct public atten-

Sunday's Disturbers. A despatch of 26th ult. says that "the appelate court at Springfield, Ohio, has rendered a decision establishing the right of cities and towns to protect themselves against the alleged objectionable practices of the Salvation steady trade doing in all important Army." It is doubtful, however, manufacturing centres. We think whether the army cares much what wealthy organization and has plenty of day, Principal Grant and other promi money to fight such matters as this through, until some judicial authority | Week, while not approving of all his in sympathy with it decides in its views acquirs him of advocating Anfavor. We had an example last Sunday morning of the Army's methods in dering Canada effective service. He Chatham, when it marched past St. Mary's (Church of England) and did its best, by shouting and drum-beatingincluding two of the general yells known as "volleys"-to drown the voice of the rector, who was delivering his sermon in the regular morning service. These noisy Sunday demonstrations are carried on in defiance of the municipal by-law, which plainly prohibits them, but experience has shown that the public-in the eyes of the authorities have no rights which the army is more that eleven years ago- and re- bound to respect, and that as the disturbances are made in the name of relaw is powerless. Last Sunday morning's performance, in front of St. Mary's, seemed like a palpable and unprovoked attempt to annoy the congregation of that church during service, and it reflected no credit on the disturbers. In referring thus plainly to the outrage in question we are aware that we shall have im proper motives attributed to us. but is evident that unless somebody has sufficient courage to run the risk mildly protesting against what has become a regular Sunday nuisance, the Army will be emboldened to resort to some new and even more objectionable

WILLIAM NOBLE.

IS IT PEACE ? King Humbert, in opening the Italian Parliament, the other day, expressed the usual wish that peace might be maintained, and then gave notice that money would be wanted to strengthen the army and navy. This reminds us of Paddy Ryan who, when tipsy, declared "Im at pace wid all mankind, an I'll knock any man down

OH, DEAR. Rev. Mr. Owen, pastor of the Reformed Episcopal Church in Montreal. has resigned, owing to a dispute over the wearing of a surplice.

FAST TIME.

The train with the Sarnia's mail and passengers made the run from Halifax to Montreal a few days ago in 17 hours

-the quickest trip on record. EARLY MEETINGS OF PARLIAMENT. As stated in last week's ADVANCE-Parliament will meet on the 16th Jan uary. This will be one of the four earliest sessions since Confederation The other three were all somewhat memorable. One was the session be ginning 6th November, 1867, the first after Confederation. The session which opened 23rd October, 1873, and closed 7th November, witnessed the debate on the Pacific Scandal and the resignation of the Macdonald Govern ment. The session which opened 9th December, 1880, was called for the purpose of ratifying the contract with the C. P. R. syndicate. The coming session is likely to be a fairly important one. As it meets so early in the year, there is no reason why it should extend

into the summer months, if the first few weeks are not wasted in waiting for Government measures. MR. WIMAN. Erastus Wiman is often referred to in contemptuous terms by the minor conservative papers, and denounced as an annexationist, etc. He made a fine speech at Kingston, Ont., the other nent conservatives being present. The nexation, and gives him credit for renreceived similar treatment from Principal Grant, who moved a vote of thanks to Mr. Wiman for his lecture. Principal Grant does not hold the same views as Mr. Wiman, but he said that he spoke in a manly fashion, that "there was something solid about him." and that he had been unjustly attack-With such testimony from The Week and the Principal of Queen's, Mr. Wiman can afford to smile at the abuse of some of the advocates of Restriction. Like Dr. Grant, he can "cast the paper "aside, with the reflection that the "person indulging in it had not a case. 'and so had to abuse the plaintiff's

"attorney." ELECTRIC WIRES THAT ARE AND ARE NOT Much comment has been made upon Edison's declaration that the electric wires are as dangerous when placed underground as when strung overhead. and the impression has been created that Edison has suggested no way out of the difficulty. The fact is he has declared very clearly, in The North American Review, that there is a mode of electric lighting which involves no disturbing worshippers in the churches. 900 volts and over; (3) the high-ten- Lynn department did all that could the alternating current, with a pressure assistance of the sister cities, which of from 1,000 to 3,000 volts and over. and also the nature of the different The first, he says, is harmless, and can assistance. pondent indicates he has been doing.

fire in Boston in November, 1872, in buildings that apparently could be easily reached, but as the flames spread they became so intense that for several hours human skill to stay them was of as the fire progressed and destroyed building after building in its path, and structures built with all the modern safe-guards against fire could not resist the tremendous volume of flame any more than an ordinary wooden dwelling, from which a thin line of smoke would be visible at one moment and a minute later a pile of ashes marked the spot where the building stood. Anyone who watched the progress of the great fire in Boston, in 1872, could not fail to notice in many respects repetition of it it in Lynn, as the water line formed one limit and the massing of engines at another point, after the conflagration had raged for nearly six hours, marked the line where destruction ended and valuable esidences which were endangered were saved. In the extent of territory the burnt district of Lynn is about the same as that of Boston in 1872, and the loss was relatively about the same The principal difference in the two fires was the burning of a large number of residences in Lynn, the homes of the poor and others more fortunate in life while in Boston the loss was almost entirely confined to warehouses and other places of business. It was pitiful sight at Lynn, to witness the breaking up of homes and the frantic efforts of occupants to save their household treasures and other effects, most of which were doomed to destruction, because in many instances it was impossible to progure teams to remove them. The fire department, after danger to human life. oil, for it often happens that one or lighting there are usually forty lamps Co., and occupied by Brown, Darrell & more wells in a locality produce abun- on each circuit; fifty volts are required Co., dealers in fancy goods, on the whole circuit. If only ten lamps were The fire raged for six hours and burned put on each circuit, the pressure would over two acres of territory, covered by familiarly called here. Now, as to the would require 21 times as much copper loss which is now estimated at from apparent that a long, hard fight was before the firemen and a general alarm was sent out. This was soon followed by calls upon all the neighboring cities and towns for assistance, to which re quest a prompt response was made.

> Brown-Durrell building. At 8.45 they had spread to the Shoe and Leather granite structure adjoining the Brown-Durrell Co. on Bedford street. From both buildings the flames swept in great masses across Bedford street to the opposite corner, thence west across Kingston street and along Bedford to Chauncey street. Three stores along Chauncey street toward Summer street were burned. On the south side of Hon. Peter Mitchell, has gone back | Bedford street the Lames jumped across to Moutreal, and so has Mr. Mercier's Kingston street to a big sandstone building occupied by Taylor Bros., and completely obliterated it. Then the fire took hold of the granite building at the corner of Chauncey street and burned out the whole block clear away round Rowe place to Kingston street. at Charlesbourg with Hon. Thomas Crossing Chauncey street and still working west the flames soon had hold of all the stores enclosed in Exeter place, a small street running from Harrison avenue to Bedford street. Here able in the fact of any number of at last the firemen got control and at

by Williams & Co. From the other side it caught almost at once upon the building on Roe Place and the wind favored the supposition that the whole south cove and wholesale district were doomed. Already every building had gone from Bedford street along Kingbor works is about running dry: the ston and Chauncey streets and flames were eating up all those on the south side of Roe Place. On the east side of to think that this recent meeting at Chauncey street there were buildings, Gaspard's was not foreign to the sub- all of them mammoth structures, occupied as wholesale houses in dry goods of some more dredging of the Lake St. Peter channel, the necessity and fancy trade, and every endeavor of which has been so conveniently was made to keep them from burning. This endeavor was futile, however, and the flames rushed on in both directions. The large dry goods establishment of Jordan, Marsh & Co., at Washington and Arch streets were burned down. Two firemen, Daniel J. Buckly, unmarried, and Frank P. Loker, who has a wife and child, were last seen in of the matter being treated on its Brown & Durrell's building, where sevthe eral other firemen report an explosion of hot air and their own narrow escape, ing the breakwater and considered the and the opinion prevails that the misspeople of Northumberland fit subjects ing men were overcome and unable to save themselves. Police Sergt. Kimball, Patrolman Mayness and exmental engineer amongst them. Let Councilman David F. Barry courageonsly rescued seven people, six women and one man, from the building on the of our former influence at Ostawa, to corner of Kington and Bedford streets. The flames just reached the place as the last of the women were being carried from the building. Several firemen larly interested in Lake St. Peter's and policemen were severely injured by

At 1.15 o'clock it looked as if the fire would burn clear through to Washingfrom Montreal than the Witness corres- | ton street on one side of Summer and nobody knew how far on Kingston street, as efforts of the firemen to con trol the flames were futile, and huge One of the great fires of the century streams of water turned into vapor be took place at Lynn, Mass. on Tuesday fore reaching the roofs. Just about of last week. It began like the great this time, while a number of firemen were at work in Chauncey street, the entire glass front of 72 Chauncey street, occupied by Wright Bros., dealers in skins and wool, was blown out, probably by hot air generated by fire. In no avail. It was a terrible spectacle the rear the firemen were blown in all directions into the street, one of them, named Manning, being cut and torn beyond recognition. His eyes were

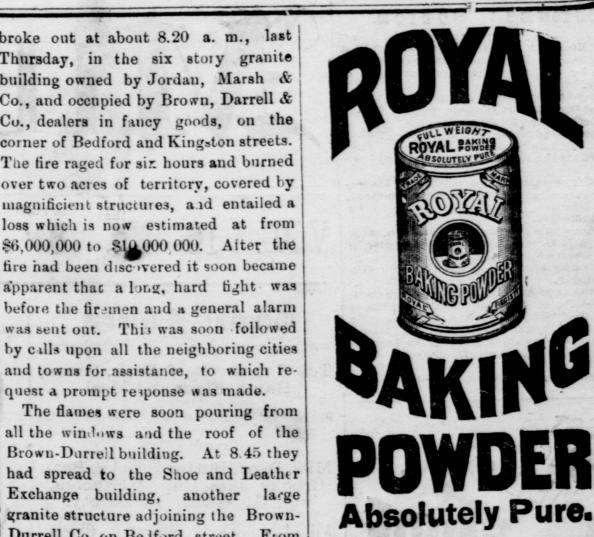

literally cut out of his head. The Globe theatre was very nearly entirely destroyed and Francis Wilson's company playing the Oolah there, lost all their costumes and scenery. The wildest excitement prevailed, and the firemen were greatly hindered by the narrow streets and immense crowds of

It is reported the fire was caused by the crossing of an electric wire. Luckily it rained in torrents while the fire was in progress and this prevented the spread of the flames toward Tremont street, as the embers which filled the air were extinguished, Amongst the insurances on the pro

perty destroyed the Liverpool & London & Globe holds nearly \$200,000 the Royal is in for \$184,000; the Commercial Union, of London, for \$60.000; the Phoenix, of London, for \$52,000 the Imperial, \$45,000; the Guardian. \$40,000; the North British & Mercan tile, \$40,000; the City of London, \$35. 000; the Western, of Toronto, \$35,000; the North American, \$30,000; the London Assurance, \$27,000. The London & Lancashire also has a small amount. The loss of the Liverpool & London & Globe at Lynn is said to be \$153,000.

TO THE POINT. A Chicago news bureau says that Detective Flynn, who locked Dan Coughlin up at the time of his arrest, informed Chief Hubbard on Friday, as if he had just thought of it, that Coughlin gave him two knives on that occasion, which at Coughlin's request he locked up in the safety vault. The knives were secured Friday and taken to one of Cronin's intimate friends. who identified them as the dead docabout the matter Friday afternoon declared that he believed Clan-na-Gael influence had induced Flynn to supnumber of buildings turned was 296, of press the matter until too late to use it which 46 were brick blocks, 115 wooden | as evidence in the pending trial.

> HEAVY FIRE AT TORONTO. Fire broke out about eleven o'clock last Friday night in the building occupied by the Truth Publishing Company, Dry Goods, Boot & Shoes, and a number of other firms, Toronto,

This powder never varies. A marvel of purity strength and Wholesomeness. More economical than the ordinary kinds, and cannot be sold in ompetiton with the multitude of low test, short vaight alum or phosphate powders. Sold only in ans. ROYAL BAKING POWDER Co., 106 Wail St., CILLESPIE & SAULER,

and proprietor of Truth, sustained a loss of \$35,000. There was a good

SHIP BLOWN TO ATOMS. A terrible explosion took place at Marseilles, France, on Thursday of last week, causing widespread terror throughout the city. The ship "Ville de Marseille," with a cargo of 3,300 bbls. of powder, shipped for Mozambique, caught fire. The fire in a short time reached the forehold, where were 1,000 bbls of powder. A terrific explosion followed. All the windows for a mile around were shattered. Fragments of the ship were picked up 500 metres from the scene of

disaster. No lives were lost.

THE MINUET AND COTILLON. This is certainly a century of revivals. The minuet and cotillon are being danced, we drink our tea out of old china and are prouder of old silver plate than the most beautiful of modern designs; we go back to Queen Anne's time for our houses, and to Sheraton and Chippendale for the designs of our furniture. As to our pastimes, the origin of tennis is antique enough for anvthing; and now we are reviving croquet, the graceful pastime which has been hybernating, so to speak, for fourteen or fifteen years. I am glad that this is so. I think that tennis. like other sports, is rapidly acquiring a taint of professionalism. Besides this, it is a selfish game, so far as concerns the inability of people no longer very young to stand the violent exercise it involves; and now, what with the rules and regulations, and text books, and champions, becoming quite as "public" game as cricket or football. Indeed, when I have seen some of my friends charging across a lawn as hard as they could go, with face like the August sum at noonday ought to be, perspirations running down their cheeks, hair disheveled and a generally breathless look about them, I think, as the shah does about dancing, that "it is folly for people to take such violent exercise, when they can pay others to do it for them." Croquet requires just as careful and scientific playing as tennis, and if it is not as Athletic a game, it is certainly more graceful and quite as interesting, and I wish all success to its rivals .-Kathleen, in Leeds Mercury.
