THE EDMUNSTON-MONCTON LINE:-The Grand Trunk Railway engineers have succeeded in finding a passage through the mountains between Miramichi and the Tobique rivers by way of the Wapskehagen stream. This was thought to be one of the most difficult places for secur ing a good route that there was along the whole line. The hills between the eastern branches of the Tobique and Miramichi rise to a great height and they are very rugged. About the time of agitation for a great central route, Mr Buck secured a good line across this country by way of Lindsay Brook and the north branch of the Miramichi, but this was too far west for the Grand Trunk engaged making some changes in the line between the Grand Falls and the Tobique which, it is thought, will shorten the distance and make a better road. The line they are now surveying will cross the 14th day of January inst., beginning at 2 Tobique River at Plaster Rock, two miles above the original survey. Some very heavy bridges will have to be built if this short line is constructed. Among them will be the bridge across Little River at Grand Falls. This bridge, if built, will be very high and long and the most expensive piece of work between Grand Falls and Moncton.-Gleaner.

Mansell a well known lumberman and a resident of Greenville kad a narrow escape from drowning last Sunday. He was crossing a cove on Moosehead lake, from Tomhegan stream to Baker brook, and when some distance from land the ice gave way beneath him. He had a goad stick with a brad in it that he took to help himself along on the ice and as he went into the lake he took that in his mouth. Then began a desperate struggle for life. The ice broke all around him and at one time he gave hop of ever getting out. He threw his hat and gold watch on the ice as far as he could, hoping they would be found and his fate would be known. He then made one more effort broke the ice and swam as far as he could and with all the strength he had threw himself partly out on stronger ice. With the aid of the goad stick which he had kept in his mouth all the time he succeeded in getting out. The cay was cold and he had not been out of the water long before his clothes were frozen stiff. In that condition he walked three miles to his camp.
