counsel will not prevail. The mills will rup, and run under the protection of the government of the day and with its assistance, and the result will be that the trade will soon assume such proportions that the treasury of the Province will be more than compensated for the present reduction in the stumpage rate, and that without any depletion of the forests. The lumbermen are now confi dent that the government of the day is not adverse to them and their interests. and those gentlemen on the north shore will be inspired with fresh confidence and will cut accordingly and bring the trade back again, and it will become better and better.

NORTHERN GENEROSITY.

They say we are all rich over there and wear good clothes and spend some money, but, sir, the difference between us and some of our friends is this : up there we spend all we make, or a good part of it. and when we come down to these parts of the province we surprise some of our friends. We are not, like many people elsewhere, who put their money into the bauks and keep it there unproductive, as far as their counties are concerned. The north shore is a generous place. The hon, member for Westmorland accused Mr. O'Brien of being discourteous and charged him with a lack of hospitality but I doubt if that is so, because Mi O'Brien when canvassing in the general election invited nearly all the people of the County to come and see him. [laughter.]

WHAT THE SOUTH HAS.

Passing over to the matter at issue I ask what are the equities to which I have referred. Let us see if the north has any equities -- any claims, on the remainder of the Province. It is true the lands belong to the Province, it is true that the lumber on them belongs to the Province, but what I would ask was done with the Crown lands in other parts of the Province? Do those other portions yield anything to the general revenue of the Province? Do the county of Northumberland and the other North Shore counties get the benefit of the lumber lands sold and given away for railway purposes? No. What is the reason the province looks to the north shore for revenue? It is be cause there has been given to local railways of the south, lands in the Connties through which those railways run. Take for instance the Riviere du Loup railway. It was given 10,000 acres per mile of the best lumber lands of the counties through to do so. I will, however, state that which it passed. Were those lands given away to benefit the North Shore? No. Then look at the case of the other rallway companies who took in all cases the best lands they could find, and, conse- | that much. quently, the persons operating on such lands were better able to pay \$1.50 than the North Shore operators are to pay \$1.25. Look at the amount the four North Shore counties paid under the railways impost act, which was passed in 1856. now closed the debate in a speech of nearly three hours. It was a magnificent effort, not only as a complete vindication of the government's position, but also mere factional aspects of political because it swept the ground of opposition to the stumpage-reduction completely from under the feet of Mr. Havington and Stumpage debate test, however, as a his followers. As point after point was made by Mr. Blair and, man after man of the opposition, proved by his own former utterances and acts to have abandoned himself to faction against consistency and the claims of justice, the House resounded with applause, and after he had finished he received the congratulations of scores who pronounced it the best and most effective demolition of any opposition they had ever listened to. Mr. Speaker, who had been lying indis-

posed in his room (Mr. Burchill occupying the chair for the evening) now resumed his place and the government was sustained against Mr. Hannington's amendment speaks of something he knows nothing by the following vote :-

A most absurd attempt to misrepresent a great question is made by the Advocate of this week in connection with the stumpage debate. It altogether ignores some of the prominent speakers on the side of the North Shore, and is so much in love with Mr. Phinney, who voted against the proposal to reduce the stumpage, that form any definite opinion, as the genit reports his speech twice. Mr. Phinney has, heretofore, taken such ground in the legislature as to inspire the hope that he might be relied upon, at all times, to place the

interests of his constituents and his reputation for consistency above the allegiance. He came out of failure in regard to these two important particulars. He ought to be able to form his own conclusions and shape a course for himself-judging what is best for the people he represents-without depending on either telegrams or letters from St. John or elsewhere; above all, he ought to hold sacred the self-respecting and

self-protecting armor of consistency without which no man, however able he may be, can hope to retain the

confidence of the public. Read Mr. Phinney's speech and Mr. Pugsley's reply thereto. We regretfully part,

could not get a rate that would admit of the shipping of a cargo of lumber, and the consequence was that none was shipped in that way. If they could get the rates that were given to the Coal Companies of Nova Scotia then it would be possible to ship to St. John, but present rates debar them from doing so. The difficulty was not in the getting of freight, but the charges upon it created the difficulty. Surely then we have some equities on the North Shore.

ST. KITTS, W. I. Cable Address: Deravin,

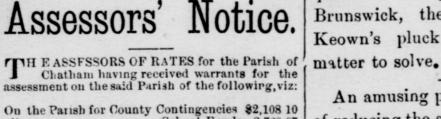

During the past seventeen years no one who ever bought a farm implement of any kind from us has been unable to procure repairs for the same, if needed. This matter of protecting our customers from delay in getting repairs has been one to which we have always given very especial attention. All we ask of our customers is to give us notice in time if they have a very old fashioned machine that wants renewing. For every implement. sold within ten years we keep repairs in stock.

All along the North Shore and up the Miramichi river and down the Bay of Chaleur we have hard working agents so located that every farmer is pretty sure to receive a visit from a representative of Johnston & Co. some time during the season or in town can easily find one if he wants to get any piece to renew a worn out machine.

We believe the reason why we sell so much year after year is that we always try to buy only the very best of its kind and our name is indentified with reliable machinery. Then those who manufacture the very best want to sell to us because we work and advertise and seek business in every way possible that is right and honorable. So it works both ways ; we seek the best and the best seek us, and you who read this, if you will seek one of our branch establishments or any of our realiable agents you will be sure to get good value for what money you pay to
