we do not ask for any discrimingeneral election. The Whiteway-Bond overnment came into power and Mr. ating tariff in that country against the the ship railway was commenced in Octo-

plimentary character.

A Decline all Around. The returns of trans-Atlantic lumber

shipments from all the ports of New Brunswick this year are remarkably consistent with the predictions of those who. a few years ago, warned the government and public of the inevitable result of this province exacting double the rate stumpage on spruce logs that is levied by

wasted upon them, and if they are made that has a stumpage system. There is a falling off of shipments from every port without a single exception, the total de cline of this undoubtedly "waning in dustry" being more than 40,000,000 s. f. below the shipments of last year. We

shall, nevertheless, continue to hear those who have managed to secure the best who has returned to England from his lumber lands of the province at fifty cents an acre, and less, and are now holding or working them for speculative purposes, advocating a high stumpage policy through the papers hat know no better than to assist them in driving the Canadian trans Atlantic spruce dea! trade into Quebec and Nova Scotia hands. Their policy i good for "the exodus," but bad for the trade and the country.

The Chignecto Ship Railway.

The work of construction on the Chignecto ship railway, has been at a stand still for some time, but a move is now being made with a view to having operations resumed in time to have the work complete next year. Mr. H. G. Ketchum C. ing. A few enthusiasts who are ready, E., the promotor of the ship railway has

been in St. John for a few days, and old flag, endorsed his proposal of a five yesterday he met Hon. G. E. Foster, the per cent. discrimination, but they Minister of Finance whom he notified that would have been just as enthusiastic an application will soon be made to the government for some of the subsidy to be over one per cent. or half a cent, with

payable as interest on the bonds which are to be issued, this Mr. Keichum says, machinists. would be practically a guarantee that the

interest on the bonds will be paid and would not involve any more expenditure on behalf of the government than if the

Professor Wiggins would if he were to work had been completed this year, acprophesy the millenium for New Year's cording to contract and the subsidy paid as agreed upon. The subsidy to be given Day. New Brunswick exports about as by the government is \$180,000 a year paymuch per capita to Great Britain as

able after the completion of the work in half yearly instalments of \$85,000 each, for twenty years. The work of building

The largest, heaviest, and most powerful gun lathe in the world is now being built for the Naval Gan Shops at Washington by William Seller & Co. of Philadelphia. The

contract for this stupendous instrument was awarded Dec. 5 1890, and the company has been working steadily upon it ever since, with the prospect of completing it by Janu-

This lathe, which will be constructed of bronze, stee!, and cast iron, will weigh 500,-000 pounds and will be 133 feet in length. Its greatest height will be twelve feet, its greatest width ten feet six inches, and its boring capacity sixteen inches. The largest guns that the naval shops can now construct are of ten inch bore, and these are also the largest employed in the service. When the new lathe is completed, however, the navy will be equipped with sixteen inch bore shooting irons, more than one-third as big

again as the guas now in use. As soon as the lathe, which will cost \$76,-\$4 08 in Colorado. - Scientific American. 000, is completed, the company will begin operations upon seven others. These will be only slightly smaller than the former, and will be of 14-inch bore. They will be built at a cost, in round numbers, of \$450,. 000, and will be employed for boing and ship candidate of the United States House turning the gun tubes and jackets.

One of the greatest features of the 16 inch lathe will be its face. This portion of the lathe is now almost completed : it is constructed throughout of cast steel, and weighs 160,000 pounds. It is provided with

four adjustable steel juws and a gear wheel which has 75 teeth of 4 inch pitch and 101inch face. Skilled workmen have been employed day and night for three weeks in eatting these teeth, and the operation is not yet finished. Fourteen speeds, ranging marry an Englishwoman. by exact geometrical progression from 0 4
