

Miramichi and the North Shore etc.

RETIRED.—Mr. J. W. Oulton of Moncton has sold his grocery business to Mr. G. Harmon Brown.

LEO BROCK.—Mr. Frank Devereux, of Bellefleur, had his leg broken by a fall one day recently.

MRS. HARRISON COMINO.—We are requested to state that Mrs. Harrison, of Sackville, is to appear in Masonic Hall, Chatham, on Tuesday evening Dec. 5th.

AN IRON BRIDGE is to be built over Mill Brook, Doaktown. The work is to be proceeded with as soon as the plans, which are to be prepared, are finished.

SAW-MILL BURNED.—John E. Smith's saw mill on the south branch of the Orococtoc was totally destroyed by fire on Wednesday night. The property was valued at about \$4,000, and there was \$1,500 insurance.

INSTANT DEATH.—Oscar Francis, a Frenchman, was instantly killed at Little Metis station on Monday night last week. He fell asleep, and on hearing the train he got up and jumped between the tender and a box car and fell on the rails. He was completely cut in two, dying instantly.

A CHRISTMAS FAIR is to be held this year under the auspices of the Sisters of the Hotel F. of Chatham, who are now making preparations for the event. This will be the first affair of the kind held by these deserving ladies, and will, no doubt, be well patronized.

DOUGLASSVILLE BRIDGE.—The plans for the superstructure of the Douglassville bridge, which are at the office of Hon. L. J. Tweedie, Surveyor-General, here, show that it will be a very neat one. The middle span will be light iron truss work and the two side spans will be plate girders. The work is being done by the Montreal Bridge Company and is expected to be ready by 1st December.

IN THE INSURANCE BUSINESS.—Mr. J. E. B. McCready, late editor of the St. John Telegraph, has gone into the insurance business. He has the Maritime Provincial Agency of the Provident Insurance Company of New York, and it is said that the position is a more remunerative one than that of a newspaper editor. Mr. McCready is a gentleman of good address, and his experience as a journalist ought to be an excellent equipment for his new work.

A GOOD SHOWING.—The Bank of Montreal issued its half yearly statement on Tuesday. The profits for the half year ended Oct. 31, after deducting charges of management and making full provision for all bad and doubtful debts, were \$255,010.38, or a little over 6 1/2 per cent on the capital of the bank, which is twelve millions. The statement is regarded as an admirable showing for Canada's leading bank.

A CHANGE OF TIME TABLE.—The St. Nelson will run on after Monday, the 20th day of November as follows. Leaving Chatham for points up river: 11.00 a. m. 9.00 a. m. 2.00 p. m. 5.00 p. m. Leaving Newcastle for Chatham. 10.15 a. m. 12.15 a. m. 3.45 p. m. W. T. CONNORS, Manager.

27,000 TROUT.—A London, Ont., despatch of 9th says:—The latest shipment of trout ever made in Canada will arrive in this city to-day from Credit Falls, Ont. It is consigned by Charles Wilton, the noted fishery expert of the London and Ont. Club. The shipment was made in a special car, containing 27,000 young trout valued at over \$1,000. The car was attached to the 2.20 p. m. train for Dorchester, whence the trout were taken to the gun club's fishing resort, and deposited in the pond. The fish are from 4 1/2 to 6 inches in length, and will be ready for angling next fall.

INJURED IN THE WOODS.—A young man named Frank White, whose home is in Coeque, was brought to Moncton Saturday morning from Bangor, Me., where he sustained very severe injuries while working in the woods. The young man's injuries were in the back and he had to be removed from the parlor car on a stretcher. His limbs were completely paralyzed and he was unable to talk. He was in charge of his two brothers, who went up to bring him home. He received his injuries about a month ago by a tree falling on him. He was taken through to Coeque on the afternoon train.—(Moncton Times 13th.)

FATAL ACCIDENT.—Friday morning the dead body of William Doak, a native of Doaktown, N. B., was discovered in a field, and partly resting upon him was a large stone. The deceased was working for Mr. John Tierney in this way, and at the time he lost his life he was excavating beneath a stone, intending to "sink" it—a way farmers have for getting rid of large field stones or boulders—when the stone started and caught him before he had time to get out of the way. Dr. Boyd, of Linneux, coroner, was summoned, viewed the body and deemed an inquest unnecessary.—(Pioneer, Houlton Me.)

PERSONAL.—The many friends of Dr. J. Hayes will be pleased to learn that he has completed his studies in London and expects to leave that great centre of the world's activities for home about the first of December. Some months ago he received the diploma of the Royal College of Surgeons of England, and has now just successfully passed the examinations required by the Royal College of Physicians of London, receiving therefrom the diploma of L. R. C. P. The examinations at this great institution are said to be getting very difficult to pass, and Dr. Hayes is, therefore, to be congratulated on his final success.

LOST AND FOUND.—Alexander Kelly, the young son of Mr. William J. Kelly, baggage master at the I. C. R. station, is an honest lad. A walking round Prince William street Wednesday afternoon and when in front of the Post Office saw a roll of money on the sidewalk. He picked it up and saw that the roll contained about \$150. The boy at once came to the Globe office, where he is engaged as an apprentice, and gave out an advertisement of his discovery. A few minutes afterwards Mr. J. A. Wallis, of Bangor, Me., came into the office to advertise his loss. The Master Kelly was called in and Mr. Wallis identified his property and it was at once handed over to him. He was so pleased with the honesty of the lad and the recovery of his money that he presented Master Kelly with a crisp ten-dollar bill.—(St. John Globe.)

THAT BARTHOLOMEW COACH, to which we referred last week, appears to have been quite a peculiar one. It seems that the whole job was put up by Alex. Stewart and that he led John Wallace into it with considerable deliberation. Wallace had no idea of going on the expedition until solicited by Stewart to do so. Stewart, who was not in the habit of visiting the Wallace, went there in the afternoon and called and told him he had taken four or five parties the night and could have taken 25 or 30 if he had had good assistance. John Wallace was not at home, but he met Stewart on the same night, after the latter

had been at his father's place, and at his solicitation, consented to go with him to the salmon the next evening. After they had proceeded down the river for a time, Wallace wanted to go back, but Stewart, who was a little better, and who had been waiting for them, Doyle and Stewart came to town together, and the latter was convicted of poisoning, and a fine was imposed, but not collected, it being understood that Stewart was to pay on Saturday last. It is understood that there is no disposition to show any leniency to Wallace, who believes that he was the victim of a conspiracy to get him into the scarp.

At the last meeting of the Local government the following appointments were made: John McMillan to be a member of the local board of health, vice Judge Waters, deceased.

Dr. Geo. E. Coulthard to be secretary of the provincial board of health in the room of Dr. J. Z. Currie, who has removed from the city.

Angus Loggier, ex-M. P. P., to be sheriff of Kent in the place of Mr. Wm. Whelan, who has been retired, not being able to get the necessary bonds.

At one o'clock on Saturday last, people on the street observed smoke issuing from the roof of the old store dwelling, corner of Cunard and Benson streets, Chatham, owned by Mrs. Dr. James A. Stevens now of Oxford, Maryland, and occupied by the Misses Whelan and Mrs. Jane Clark. Two streams were got on through the department's hose from the pump of the Steamer St. Nicholas, and the fire was kept from breaking out, although the building was badly damaged inside by fire and water. The occupants lost some of their furniture. Their was no insurance on either building or contents.

Death of Wm. Sullivan. News has reached Chatham of the death at Shell Lake, Wisconsin, on 4th inst. of William Sullivan, a lumberman of that place. Mr. Sullivan, who, it appears, died worth several thousands of dollars—newspaper reports say \$6,000—was about 49 years old. He was born at Edmunds in this county and went to the United States about 28 years ago. He leaves three brothers, John, Jeremiah and Lawrence, and one sister. John is a well known resident of Lower Newcastle; Jeremiah is a resident of Edmunds and one of the Municipal Councilors for that parish. Lawrence lives in Madawaska and the sister, Mrs. Blanch or Blanchard lives in Westmorland County. The surviving brothers and sister are making arrangements to have one of their number go to Shell Lake to look after the property, as they have been advised to that effect, by Mr. Stafford Benson, who resides there, is a "Chatham boy" and is, of course, acquainted with the family.

Restigouche County Court. The November term of Restigouche County Court opened with the usual proclamations and formalities on Tuesday morning. His Honor, Judge Wilkinson, presiding. There was no grand jury, and only one civil case on the list, to wit: The Bank of Montreal vs. George Forest, entered by Messrs. McAlister and Mott. This was an action on two small bills of exchange. It was defended at the trial and resulted in a verdict for the plaintiff, \$69.83. There were also two assessments, Samuel Hayward, vs. Michael Archibald, which was assessed at \$68.00; and John J. Barry, vs. Wm. J. Duncan and Alexander McLennan, which was assessed at \$2.61.

There was also a bastardy case, which was for one unexplained reason, was not entered or brought on, and an application in another matter to be heard before the judge at chambers.

This completed all the business.

A Cold Winter. Prof. W. H. Smith, of Montreal, in his planetary almanac says we are approaching another cold dry winter, but not so cold as in 1892-3. The prospects for rain and snow are better. There will be more precipitations this year. The forecasts for January and February are:

January.—A cold month, with considerable snowfall. Snows and rains in northern and eastern, considerable rain in southern sections. Snowfall in the Northwest about 10 inches below the average. The "January thaw" looks like being a marked feature. The coldest "dips" appear most likely to follow the middle and during the last few days of the month. Severe storms over the North Atlantic.

February.—A cold month. Mean temperature in Canada and the Northern States below the average. Precipitation about or above the average for February. Some severe storms and rapid changes of temperature, causing alternations of floods and "freeze ups." The dreaded tornado is likely to be heard from in the southwest early this year.

A Correction. NEWCASTLE, Nov. 11, 93. DEAR ADVANCE.—The closing sentences of the Advocate's rebuke of Wm. Cottier, bearing date Nov. 8, places the police officer of our town in a very wrong position, which, by your leave, I wish to correct. Respect by the truth or falsity of the highly exaggerated report I have nothing to say, and would only remind the Advocate that the effect of a reprimand is lessened by the use of coarse and ungrammatical language. Our policeman did not see the individual in question trying to effect an entrance to the Gifford House, nor was he asked to arrest him till some time afterwards when the man was in his own house locked doors. If Mr. Gifford wanted him arrested, a warrant against him would have been issued, and he would have no choice in the matter. We have every confidence in our officer, and have reason to know that he has as much courage as the common run; but that he may find it hard work to please all the factions that go to make up this little community, is not to be wondered at.

With thanks I remain, Yours truly, FAIR PLAY.

The Delinquent. The December issue of the Delinquent is called the "Christmas Number," and is rich in material pertaining to the holiday season. The styles for the month are exceptionally handsome and appropriate, and the younger members of the family receive special attention in an illustrated article entitled Party Dresses for Misses and Girls. There is also an appropriate article on Fashions in Fur Garments. A paper that is invaluable to all ladies is called Some Suggestions for Home-Made Christmas Gifts, and the housewife is especially considered in Dainty Deserts for the Holiday Season. Christmas Legend and Folk-Lore is most interestingly treated, and as an antidote, there is a description of a very modern Kris Kringle Party. The children will be delighted with the entertainment provided for them, and the parents will appreciate the ideas contained in "The Children's Christmas." In addition to this special matter there are articles on many popular subjects: Lawn Tennis, in the Sports and Pastimes series, is brought to a close this month; Household Renovation tells about Floor Coverings, Furniture and Motifs; Child-

Life deals with Recreation for Boys and Girls; Physical Culture outlines instruction in Exercises, and Around the Tea Table makes us acquainted with the fashionable fancies of the season. Novelties are illustrated in the papers on Knitting, Crocheting, Tatting, etc., with full instructions for making. This number is an excellent one with which to begin a subscription, which costs One Dollar a year; Single Copies, 15 cents. Address orders to The Delinquent Publishing Co. of Toronto (Ltd.), 33 Richmond St. West, Toronto, Ont.

Northumberland's Poor. It is, we think, quite safe to say that there is no county in the province—perhaps not in the Dominion—in which there is a better system of caring for the poor, than that existing in Northumberland, which is at once humane, effective and, at the same time, very economically worked. There has, also, never been a time when the Alms House of the county was so well managed as it is at present—a fact due, no doubt, largely to the good character and standing of the gentlemen who comprise the Board of Commissioners, but who could not be so successful were it not for the admirable methods of the keeper and matron, Mr. and Mrs. A. S. Templeton, who seem to perform their duties with every consideration for the interest of the poor, and with a regard for the order, cleanliness and discipline, sympathy with the poor who are entrusted to them, and an integrity which make them worthy of all confidence.

On Monday there was a meeting of the Board for the purpose of closing the business of the year. Heretofore the Alms House year ended on the 31st December, and there was not sufficient time between that date and the meeting of the Municipal Council—the third Tuesday in January,—to get the accounts in satisfactory shape for presentation to that body, and it has been wisely determined to have the Alms House year end on 31st October hereafter.

At Tuesday's meeting the following commissioners were present: viz.—R. R. Call, chairman; McLachlin, secretary; W. T. Connors, D. McBeth, Jas. Tweedie, Simon Simpson, A. Arsenau, P. Hennessy. Commissioners Hennessy, Simpson and Tweedie, a committee appointed to examine the provisions, clothing, and everything in connection with the institution, reported, through Mr. Hennessy, that they found the quantities of the several articles, as stated by the keeper, correct, the quality good, and everything about the establishment in a most satisfactory condition.

Secretary McLachlin and Commissioner Connors were appointed a committee to provide the requisites for good dinners for the poor on Christmas and New Year's days. It was ordered that the chairman audit and prepare the books and accounts for submission to the Municipal Council as heretofore and that he be paid the usual fee for the work. Keeper Templeton submitted several reports in connection with the institution, the work performed during the past year, etc. The keeper was called in and the chairman expressed to him the great pleasure of the commissioners in finding everything about the premises so neat and clean; and he was pleased to be able to convey to him and Mrs. Templeton the thanks of the board for the satisfactory manner in which they were performing their duties as keeper and matron.

Keeper Templeton made a very neat speech in reply, on behalf of himself and Mrs. Templeton, and the commissioners accepted his invitation to proceed to his private apartments, where light refreshments were served. We understand that amongst the items of supply produced by the farm of the institution during the past year, were 107 lbs butter, while the dozen hens furnished to the present Keeper when he took charge, have been so productive that they have produced during the past season, besides killing chickens occasionally, 23 lbs. of potatoes and other roots and vegetables, and a ton and a quarter of hay were also amongst the products. There is some humor in the Keeper, for in his report on the farm work and products he has succeeded in stating that we have succeeded in eradication from the institution that interesting insect called the cockroach, which was a pest to the house.

It will be interesting to know whether the veteran manager, who seems to have the faculty of making the most of everything, means that having driven the cockroaches from the house, he has harnessed them for work on the farm.

The Alms House is quite a time-honored institution. It was built in 1859-9 chiefly through the instrumentality of the late Hon. T. F. Gillespie, who was one of the first members of the board, and it was opened to paupers on 1st July 1863. The present organization was effected on St. Patrick's day 1888 in Masonic Hall, Chatham and the present chairman, R. R. Call Esq., was appointed to that position on 16th June of that year, so that he has been continuously at the head of the board for more than 25 years.

The commissioners at the first meeting were as follows: Wm. O'Brien, Richard Davidson, P. J. O'Connell, Thos. Savoy, Robert Forsyth, Jeremiah Ullock, James Connors, Thos. E. Gillespie. Those marked with an asterisk are now dead. The present board consists of the following: Newcastle, R. R. Call, President; Patrick Hennessy; Chatham, Donald McLachlin, secretary; W. T. Connors; Linneux, Geo. Barhill; Alnwick, Simon Simpson; Hardwick, Patrick Fitzpatrick; Glegg, Dan McGehearty; Rogersville, A. Arsenau; Belleville, B. N. T. Underhill; Bishopton, Robert Seim; Glegg, Maurice O'Donnell; Northesk, R. P. Whitney; South West, Jas. Tweedie.

During the present year permanent improvements have been made, such as the introduction of an independent gravitation water system, by which a constant supply of the purest spring water is secured. The premises have also been generally renovated, and their sanitary condition much improved, and we believe that all has been done without materially increasing the yearly cost to the ratepayers of the county, while the inmates, who are, frequently, the hardest to please, are more contented than ever with their treatment and have only words of praise for the commissioners, keeper and matron. When their position is contrasted with that of the pauper poor of some counties of the province, where, until very lately, at least, they were farmed out to the lowest bidder at public auction and treated like galley-slaves, our people, who have for them in so humane a manner, may be well satisfied that their duty towards them is faithfully performed.

On Ottawa. Mr. W. C. DoBray is an interesting Ottawa writer. In a recent letter to the P. E. I. Examiner he says:—Times have been good in Ottawa this year, work has been plenty and, occasionally, hands scarce. Two hundred millions of feet of lumber will be required to meet the output of the Ottawa saws this season. A large amount of labor was given by the Electric railway in building new lines, and by the Telephone Company in digging

trenches for underground wires. Speaking of the Electric railway, it now operates the whole of the old horse car line, and is thinking of branching off in other directions. Its workshops, where cars are built for home as well as for export, give employment to a number of skilled laborers. The Oblat Order, who conduct the University, are commencing an addition to their buildings, which is to cost \$50,000. They are just finishing St. Joseph's Church, at a cost of \$90,000, which will be opened next month, and are building the Church of the Sacred Heart, which will cost, when completed next summer, \$150,000. The University and both these churches are within a stone's throw of each other, occupying three blocks in a highly valuable part of the city. St. Joseph's is an English-speaking congregation, and the Sacred Heart French-speaking. You ought to see St. Patrick's church of a Sunday evening. It is a large building, but if you want a seat you must get there early. It is fairly packed and hundreds have to stand. Indeed, at the masses the church is filled three times every Sunday morning, but as the service is in English, the people and the priest saying the prayers together; the singing is congregational and, except in the very hot weather, there is a short sermon of a practical character. This is followed by benediction of the Blessed Sacrament. You could not buy the people to stay away from this service.

One of Ottawa's newest industries is a branch of Father Murphy's Gold Cure. It was opened last spring, and has done a power of good. A handsome residence was rented at a high figure, beautifully furnished, piano and billiard table put in, and there the manager has received everybody who came and made a man of him, restored his appetite and eliminated the alcoholic poison from his blood. In about three weeks' time he is a brand new man, and he feels like one. He goes about his business with pleasure, and meets his friends with a smile and a confidence that he has not known for years. But if the reformed man would stay that way, he has got to drop old associations, keep clear of whiskey, stick hard to work, and if he is fortunate enough to have a wife and children, to spend his leisure hours in their society. I fancy I had Fred Curtis saying:—"Deb must have been there himself, for he seems to know all about it." I am not a graduate of the Gold Cure, but if I had found it necessary to take the treatment, I would not have been ashamed to submit myself and become a patient.

An Orangemen's lodge was formed here a few nights ago. The Orange institution is very strong in this city and county. I count the names of eight city lodges in this evening's paper. But their public parades are very wretched. Indeed, I may say the same of every society parade I have seen in Ottawa. There is no uniformity of dress—not even a black coat is necessary, and as for hats the variety is charming. The same remarks are applicable to general processions here. No one considers it necessary to dress up to go to a funeral. I was at one not long ago, when one of the chief mourners wore his blue serge everyday office suit, and the head of a powerful society which attended, wore an old soft brown hat. Indeed, the sight of a silk hat is a rarity even on Sunday. "Plugs" are worn only by undertakers and billiards.

But to return to the women. They are getting advanced here as well as everywhere else. They seem to be poking their noses into strange places, and saying things that would have been thought very unwomanly when I was a boy—that is a long time ago, however. One peculiarity I have noticed is the fondness for hair for teaching other mothers how to bring their children up. I have a case of it next door to me. Every few days the papers announce that Mrs. Blank charmed some meeting with her eloquence, and I hear about her everywhere I go. She is highly educated and red-haired, does not belong to any church, because she knows too much, but patronizes all impartially; and to hear her expound the Scriptures, is, I am told, a poem. She is all the time at mothers' meetings and W. C. T. U.'s and Homes for Friendless Women and Domestic and Foreign Missions, etc., while her little seven-year-old daughter, who inherits the red hair, and talks in words of five syllables, is annoying the neighbors in the most impish manner. I am not going to give importance to the youngster, but when I told her to clear home one Sunday evening last summer, and she would not, I caught her by the ear and led her, screaming and kicking, to her maternal doorstep, where I committed her to the care of a female—her mother was out of course—with instructions to keep her home, if they did not wish to be offended. No doubt such ladies as the one I have referred to are expecting great things from the arrival of Lady Aberdeen, who is said to entertain pronounced views on the subject of women's rights and duties. Well, speaking the other day to a press reporter, she said, "We work very quietly in England, and we place our homes and our children above all else. It seems to me sometimes that American women put domestic matters last, and promote mutual admiration societies rather than practise work."

A Perfect Cure for Cold in the Head. "It cured me of a severe cold in the head," is what Mr. A. D. McDonald of Frambois, C. B., says of Hawker's Catarrh Cure. Sold everywhere, only 25 cents.

Young Men's Christian Association of Chatham. Meetings held every week in their rooms upstairs, 145 St. John's street, as follows:—Sunday morning at 10 o'clock, for Prayer and Praise. Monday evening at 8 o'clock, for Bible Study. Tuesday evening at 8 o'clock, for Training class. All young men are most cordially invited to all of these meetings.

MARRIED. At the residence of Mrs. Taylor Bay St. John, on November 8th, by Rev. J. Robertson A. M. Mr. John A. Arsenau to Miss Eliza A. Taylor.

DIED. At Black River on Sunday morning, Alex Stewart McNaughton, youngest son of Alex and Mary McNaughton, aged 12 years.

On Ottawa. Mr. W. C. DoBray is an interesting Ottawa writer. In a recent letter to the P. E. I. Examiner he says:—Times have been good in Ottawa this year, work has been plenty and, occasionally, hands scarce. Two hundred millions of feet of lumber will be required to meet the output of the Ottawa saws this season. A large amount of labor was given by the Electric railway in building new lines, and by the Telephone Company in digging

trenches for underground wires. Speaking of the Electric railway, it now operates the whole of the old horse car line, and is thinking of branching off in other directions.
