Mr. Phinney moved an amendment to the effect that the board of education might have settled the Bathurst school difficulty, and that further enquiry should be made in reference thereto by the Board. shortened, say to two months, hunting with dogs to be confined to one month.

Mr. Perley said that the deer in his county had destroyed a thousand bushels of turnips.

Mr. Scovil said farmers in his locality had to chase deer with dogs, as they destroyed grain and vegetables. The original section was carried on

in the amount from \$400 to \$2,000 a year for the protection of game.

Mr. Tweedie said it did not necessarily follow that all of the \$2,000 would be spent in any one year. It was desirable that sum sufficiently large for the protection of the game should be granted. Heretofore the game law had been almost a dead letter and if it was not intended to have the law enforced, better repeal it altogether. Mr. Phinney moved as an amendment

that the amount be \$1,000. Mr. Mitchell said the state of Maine spent from \$8 000 to \$10,000 a year on the prothat the expenditure gave a return of over er's 'Tolu and cough for more. one million dollars. New Brunswick afford-

Mr. Blair hoped Mr. Phinney would withdraw his amendment. This was no party question, and it did not follow because the amount of \$2,000 was agreed upon that the amount would be spent in any one year. Mr. Tweedie said that in order to supple-

ment what the attorney general said, he might call attention to the fact that under the mining law the government on the recommendation of the survey or-general, were author zed to spend an amount not ex-500 had been spent altogether since then. Therefore it did not follow that because \$2,000 was named in this act that that sum would be spent in any one year.

Mr. Pitta did not feel like cramping the

same as under the Fisheries act. w uld be a revenue, not to the province, however, but to the people who would benefit by the large expenditures made by sportsmen co ing into the province.

Mr. White areu d .n favor of the amount being \$2 000. When it was known that the government had power to expend that sum in the protection of game the fact would have a deterring effect upon those inclined to violate the law. Mr. Emmerson spoke at length in favor of

making the sum \$2,000. The motion to fill the blank with \$2,000

James Blair's Case. NAPANEE, April 10th. A highly interesting case has happened in this town, which is creating a good deal of excitement, Mr. James Blair, a well-known merchant tailor here, has for fourteen years been sufferer from that terrible complaint, known as Bright's disease of the kidneys. He suffered so terribly that one hour's work at the cutting table would completely exhaust bim, and he had to almost give up work a together. He tried almost every known remedy for his complaint, but without any good results. Medical men and patent medicines failed him, and he was gradually getting worse every day. Finally he read a dispatch in one of the local papers stating that a man named Murray, living in Gravenhurst, had been cured of Kidney a last resort Mr. Blair began taking these pills, and three boxes made a new man of CEALED TENDERS addressed to the undersigned him, and seven boxes completely cured him Mr. Blair is back at work again, and says

Since confederation this fishery (which had grown up entirely since then), considering the fish worth 6c. a pound at the United States border, had netted the people of New Brunswick twice the cost of the Intercolonial Railways in New Brunswick. Mr Cox called attention to the improident way in which the fishery was carried on. The government regulation mesh of the smelt bagnet had been 11 inches; and even at this fully one third of the fish were thrown away as unmarketable, consequently millions of small fish that would be marketable in another year were destroyed. Yet, strange to say, through pressure brought to bear upon the goverment, the size of the mesh nad been reduced to 14 inches.

He said: voluminous correspondence Which has bee submitted to this house, together with copie of orders and regulations of the Board of Education, and the tall stenographic report of the proceedings of the conference between the members of the government who wen to Bathurst and the school trustees and representatives of the Procestaut minority o Bathuret Village, afford, I think, sufficient data, to enable the house to form a correct conception of the alleged grievances referred

to in the petitions in connection with the Bathurst schools. In order, nowever, that it may not be said that there was any disposition to stifle investigation or burk tutt enquiry in the matter, I shall gladly support the resolution for the commission which has just been suomitted by the Attorney General. An opportunity will thus be afforded to substantiate under oath accusations which have been made through newspaper correspondence. I have already said that the proper way would have been to submit these charges-I refer particularly now to what has been rumored to have taken place in senous outside of Batuurst-to the Board of Education, and if they had any foundation in fact the Board and the government would be deserving of censure and condemnation if they did not take immediate action in the matter. In reference to the charge made by Rev. Mr. Thompson, that Protestant children were compened by a Roman Catholic teacher to kneel in prayer, you are aware that I have received emphasic denials from the ceacher and Protestant

regard to an equal distribution of attendance. IN THE TOWN OF BATHURST school matters have been moving along smoothly and without friction. when the ratepayers of the town district, with the object of reducing their annual assessment, passed a resolution virtually abolishing the Grammar school. On further consideration however, it was made apparent that the taxes would not be lessened by such a step and, at a subsequent meeting called for the purpose, a resolution was passed which re-established the grammar school

C. priest of the town of Bathurst, However, a combination of circumstances resulted in the appointment of a Roman Catholic, the son of one of the trustees, and although the person appointed was an ex cellent teacher, yet the selection at tha time was an injudicious one and did no meet with the approval of the prominen Roman Catholics of Bathurst. Immediate ly after the appointment was made a rever end gentleman now within sound of m voice communicated with the Board of Edu cation asking them to withhold a Gramman School license from the appointes. After some correspondence the Board refused to grant the license to Mr. O'Brien and he had to sever his connection with the school Pending action by the Board of Education

with nineteen scholars and has now an attendance of twenty-five. I thought his appointment would have resulted in the discontinuance of the private school but I regret that such has not been the case. Dr. Alward, -The teacher of the private school was engaged for a year.

THE AGITATION CONTINUES. Mr. Sivewright,-That puts a different aspect on the case and would explain the continuance of the school after the cause of the alleged grievance had been removed. As I have stated I thought the appointment f an efficient Protestant teacher would oridge the opening chasm, but I regret that he agitation has not been allayed, and has een accentuated by an unfortunate dispute between the landlord of the building, who, nowever, is a Protestant, and the Orang Association who had rented the building for a private school. Previously to this the

enouls had been conducted in town satisactorily and efficiently. Mr. Pitts, -Do you think the Protestant ainority of Bathurst will ever be satisfied while the nuns who have never attended Normal School are allowed to teach there ? Mr. Sivewright,-The Protestant miner ty, or at least those was have signed the petition, appear desirous of putting the chool act back to the year 1875, when the King-Fraser Government made regulations

ceudance at the Training School, provided tney held a certificate from the Superior of one of their recognized educational institu ous corresponding to the Normal School, and to wear the garb and emblems distinct cive of their order. Mr. Pitts. - Were these concessions un

tended to apply to places like Bathurst or

o small towns?

Mr. Sivewright. - I may say frankly that believe the intention was probably to apply to other towns than Bathurst, as the sisters were not teaching there at the time, but there was nothing in the agreement to prevent the application of this concession to Bathurst if the religious orders were sub sequently established there. It is clear that the gravamen of the charges in the petition, the nucleus of the agitation which has culminated in the presentation of these petitions, is to rescind the regulations or agreement made in 1875, when the government which had introduced and carried the School Act thought it advisable to make

this agreement in the interest of peace and harmony, and as a concession to the Roman Catholic denomination who had so largely supported their own schools for four years. I regret this agitation and I would like in my own county, where I have friends on both sides, to see peace and harmony pre vail and school dissersions and religious animosities removed from among us. THE AGITATORS DON'T AGREE. However, I may say frankly to the petitioners that if they intend to cry "no sur render" until they have the regulation of 1875 rescinded, that they may as well call "truce" and lay down their arms as there is no prospect of such repeal being obtained. I heve spoken to nearly every
