continuance of his studies on water pollution has given Prof. von Pettenkofer no reason for changing his long held opinion that sewage may be safely permitted to flow into a river if its volume is not more than one-fifteenth that of the river water and its rate of flow is decidedly greater than that of the current. Though Munich had nearly 350,000 inhabitans in 1890, yet the polluthe discharge of the river-a pollution so inconsiderable that it cannot be detected. by the eye in an experimental mixture. Even this is not permanent, for at five miles below Munich the sewage influx is no longer miles below it has lost nearly all its power of pollution, as shown by chemical and bacteriological tests. The purifying action of rivers is ascribed to the oxygen dissolved in the water in a free state, and this is increased by ordinary water vegetation, which should not be destroyed.

Mrs. Port ous Concert

The semi-classical concert which wa announced by Mrs. Porteous for Thursday evening last, was postponed on account the prevailing rain until Tuesday evening of this week, when it was given in Masonic hall. The attendance was not large, which fact that everybody knew there was not a sufficient number of good singers available in Chatham to do justice to the dozen or more selections from Haddel's "Messiah," which were announced as the principal numbers on the programme. Mrs. Porteous played most of the accompaniments and sang two solo selections, besides singing in a quartette and a trio and doing one-half o the Hallelnjah Chorus-enough for one artist, surely, and she did it all well. She deserves a larger field and greater encouragnent, but that seems to be unattainable in Chatham. The ladies and gentlemen who assisted Mrs. Porteous gave evidence of the care she had bestowed upon their train ing and were encouraged with applause by their friends in front. In the second part of the programme, Mr. Mersereau gave a pathetic reading and Mrs Shaw a descriptive song This was Mrs. Shaw's first appearance in Masonic hall and she will be evidently quite at home amongst our best singers. by the Bishop of Chatham. Never in the history of Amherst did orighter sun or a more glorious morning reak forth from an eastern sky than did that of Sunday morning. April 30th, the lay on which the new Catholic church was ledicated by His Lordship Bishop Rogers of Chatham, N. B. His Lordship and his secretary, Rev. Father Knight, the Jesuit Fathers, Doherty and O'Brien, Father Thomas Daly, and Father Thomas Grace arriving on Saturday evening, were driven at once to the residence of the Pastor, Rev. W. J. Mihan and during dinner were serenaded by the Amherst Cornet Band. On Sunday morning at 10 30 the dedication ceremony began by a procession of clergy going around the exterior of the church in the following order:

Cross bearer, Acolytes with candles; Altar boys and Visiting clergy.

Rev. Fathers Doherty and Daly chanters The Bishop of Chatham in cope and mitre with pastoral staff. After sprinkling the exterior walls with Holy water and reciting the psalms and prayers prescribed by the ritual, the clergy entered the church and proceeded to the Sanctuary, chanting the Litany of the Saints. The interior of the church was then blessed and the dedication ceremony ended.

High mass was celebrated by Rev. Father Daly, of Windsor, assisted by Rev. Father Knight, of Chatham, as Deacon and Rev. Father Grace of Herring Cove as sub Deacon. The Bishop of Chatham occupied the Episcopal throne having at his side Rev. Father O'Brien, S. J. Rev. Father Mihan

And now that he was in their midst and in their handsome church he seemed to live his life over again. He said it was certainly one of the happiest days of his life. He referred to the time some 40 years ago when he removed the little old church from the cemetery on the Highlands to the site opposite where the present church stands, and paid a tribute of praise to his friends of all denominations who as sisted him in that work, and again and again expressed himself delighted at the good feeling that still existed between the members of the different churches in Amherst -a proof of the esteem entertained by all

for the amiable Pastor, Father Mihan. He coucluded by saying that there was only one thing to sadden a little, the festivities, namely the absence of Archbishop O'Brien, who had so much desired to be present, but on account of a severe cold, and the grief caused by the recent death of Father Ellis, whom he loved so much, was not able to attend.

After Mass, to see His Lordship outside the church surrounded by old friends who came many miles to be present on the occasion, was a scene that will not soon be forgotten. His Lordship left for Halifax on Monday, to visit His Grace, Archbishop O'Brien. On Sunday evening the Jesuit Fathers,

Doherty and O'Brien opened a mission which is to last one week. Father O'Brien preached a very impressive and eloquent sermon taking for his text 'Render to Casar the things that are Cæsar's and the God, the things that are God's. LUMBERMAN'S INVENTION WHICH MOVES OF EITHER LAND OR WATER. OTTAWA, Ont., May 3.—A new Canadian invention for use in the lumber districts is coming into general use in northern Ontario. It is called a steam warping tug. It propels itself on land as well as on wat aud is used by lumbermen whose operations are carried on among small lakes connected by streams of uncertain navagation.

The vessels have proved not only a success but a great boon to the lumber trade. Six of these unique craft have been built by the inventors during the past season, four completed at their yard here and two shipped ready to be put together at their destination in the Nipissing district.

They are built in scow shape, with steel shod runners for moving over land; are 37 feet long, 10 feet beam, decked all over and have sleeping room for four men in the bow the bottom and up the bow is covered with steel boiler plate. An engine of 22-horse power furnishes steam for 10 hours' work with three quarters of a cord of dry wood. In the water it moves six miles an hour forward or backward, as required, propelled by sidewheels. On land it is propelled by having a cable drum, on which is coiled five-eighths of a mile of steel wire cable, which is fastened with pulleys to a tree or some object in front, the boat moving as the wire is coiled up. The boiler is hung on an axle in the centre, and a screw arranged on the front enables the fireman to tip it forward and back and keep it level going up o down hill. It will move over an elevation of one foot in three on land, and draws about 28 inches in the water.

The End of the World.

A New York daily paper, taking up the dea conveyed in Flammarion's exciting novel 'Omega: The Last Day of the World," has nterviewed a number of the leading men in all professions as to what they would do if science were to predict tomorrow that the end of the world would arrive within thirty days. The answers are various and curious, and heighten the interest which is felt in the second part of Flammarion's great novel, which appears in the May Cosmopolitan. It is a question which everyone will find interesting to ask of himself: What would you do if within six weeks the end of the world were certain? Probably no novel which has ever appeared in an American magazine has been more elaborately illustrated by more distinguished artists. Laurens, Saunier, Vogel, Meaul'e, Rochegrosse, Geradin and Chovin all contribute to the explanation of the text. A clever story of another kind is that of

the new English novelist, Gilbert Parker, in the same number. "American Society in Paris" is an article of another kind, but one which will interest all who have had occasion to make even a short residence in the French capital. The Cosmopolitan scores a success in producing in its May number, almost simultaneously with the daily papers, an eleborate description of Profesor Gray's marvellous invention, the Telautograph, which re produces the hand writing, or the work of the artist, simultaneously, thousands of miles distant from the place where the writer or artist is sitting. Mr. Howells purpose in "The Traveller from Altruria" is month by month, becoming more evident, and is receiving wide attention at the hands of the critics all over the world.

HAWKER'S NERVE & STOMACH TONIC

A LADY'S EXPERIENCE.

Mr. Wm. Thompson of Musquash, N. B., says: "For 2 years past my wife has suffered with Acute Dyspepsia accompanied with complete nervous prostration and a smothering sensation about the heart which frequently produced an attack of faintness. She became weak and nervous, lost all energy, and had a constant feeling of dread. She suffered with intense pain in the stomach after eating, which was usually followed by the smothering sensation about the heart and fainting spells. She tried a great many remedies and was treated by the doctors for some time, but obtained no relief. She became so discouraged that she gave up all hope of ever getting better, when our paster suggested that she try HAWKER'S NERVE AND STOMACH TONIC and LIVER PILLS which had produced remarkable cure in several cases he knew of. We did so and she obtained immediate relief from the distress after taking the second dose, and has continu to improve ever since until today she is as wel as ever, and can enjoy her food without fear o suffering. I cannot speak too highly of these valuable medicines which have restored my
