I was gratified to find the car almost empty. Some half a deven men were dozing in various parts, and near the front I espied a little figure curled up on a seat that looked suspiciously feminine, despite the jaunty masculine headgear that adorned the closely clipped brown locks. I wondered why one so young was traveling alone and unprotected, and pondering upon the subject I sank into much needed slumber. When I awoke, it was broad daylight. All were astir, and I saw in the subject of my speculation a charming little girl, possibly 15. She had a very pretty face and dainty air.

Before I could put into execution a plan of forming her acquaintance a man approached her. He was a fine looking specimen of the genuine cowboy, though I had not then learned to recognize so unmistakably the members of that fraternity as I have in later years. His broad sombrero shaded a pair of deep blue eyes, and a heavy reddish brown mustache but partly hid a mouth that betokened steady determination and an unyielding will. He ad-

Nine-tenths of all the ailments to which the human family is heir are dependent on nervous exhaustion and impaired digestion. When there is an insufficient supply of nerve food in the blood, a general state of debility of the brain, spinal marrow, and nerves is the result. Starved nerves, like starved muscles, become strong when the right kind of food is supplied; and a thousand weaknesses and ailments disappear as the nerves recover.
