TINKLER'S TRIUMPH.

T. Tinkler, M. D., was a living reminder of that paradoxical old saying, "You can't always judge a man by his size." The doctor had a small body indeed, but there the small part of it ended. He might be only a fragment physically, but he had mental, moral and spiritual attributes that were really Brobdignagian. He had a large practice, too, which afforded him a sufficient income.

There was just one dark cloud on the Tinkler horizon—the doctor was passicen ately in love, and he had a rival. Now, when the conditions are equal, or perhaps a little bit in your favor, a rival only lends interest to a love affair. But with little Dr. Tinkler the case was sadly different. His rival was a giant—a six foot athlete, whose herculean proportions were sufficient to excite any woman's admiration, any man's envy. "Now listen to me attentively. This is the order in which your service is to be

On a summer evening the diminutive doctor arrayed himself in purple and fine linen and determined to place himself in the uncertain hands of fate. Bella should decide his destiny. As he entered her wicket gate his rival emerged from the doorway, and they passed each other on the graveled walk. The big man looked down and sneered. The little man looked up and scowled.

She was silent. Again asked the doctor "Oh! By whom?"

"Frank Dixon."

"The villain!" "Dr. Thomas Tinkler," said she, with great solemnity, "if you will thrash that man, I will marry you any day you say.' "I will eat him up!" exclaimed the little doctor, reaching for his hat with a ferocious movement. "Stay, Tom!"

"Say no more, Belle. I will devour him. The renegade!" cried the little doctor in a terrible voice, and he immediate ly marched out of the house. "Oh, merciful heavens, what have I

done?" cried the unhappy young lady. "He will be killed! I know he will! Tom, come back to me! Come back, Thomas!" But her cries were in vain. Thomas, her soul, was already far down the street, hastening in pursuit of the unconscious

"Prepare! I will pummel you! I give you warning!" cried the little doctor, and before the astonished athlete had time to realize that an assault was about to be made upon him Tom Tinkler rushed up and seized him by the legs and upset him on the sidewalk. It was such a surprising mode of attack, and the doctor's movements were so rapid that Dixon had no time or opportunity to set himself right again. "Aha, wretch! I will teach you! Aha!"

and the little doctor seized the prostrate man by the hair and fiercely pounded his head against the pavement. "Help!" cried Dixon. "Take the little he watched his friend Renclair drink a devil off! He is killing me!"

LEVEL HEADED.

M. Bagaudin was the man, a celibate of the most pronounced character, 50 years of age when our tale commences, who, having run through a considerable fortune, had found himself compelled to give up a luxurious apartment for one more suited to his altered means, to find a butler's place for his handy valet de clambre, and to trust himself, when newly and duly | Elsie placed her hand in his and said reinstalled, to the tender mercies of the concierge till he could meet with a servant to please him.

A bonne-in short, a maid of all work, virtues and estimable qualities; able to answer for her bachelor master when he chanced to be out, to sign his postal and railway receipts and such like interesting documents, to select the food, to settle the bills, arrange for a friendly little dinner party, preside over the discomforts of any future movings out or movings in, and not only to possess the strength of that valuable domestic animal, the horse, but to know how to take care of that animal

This was the stumbling block, as Bagaudin well recognized, and though he had had the strength to sacrifice a great deal he had not been able to screw up his courage to the point of depriving himself of his horse and tilbury, as well known to the frequenters of the Bois as he himself. A Peculiar Tomb. Among the many odd ways in which persons have marked their last resting place, the oddest of odd is found in the little "city of the dead" at Mayfield, Ky. One H. G. Woolridge, born in Tennessee in 1822, as says his memorial stone, having grown near to that point where we are wont "to shuffle off this mortal coil." has conceived the idea of perpetuating his name by a set of monuments that will at least mark him as an eccentric. A few years since he bought his lot, 18 by 36 feet, and inclosed it with a neat iron fence. Soon thereafter he had erected a marble shaft about 17 feet high, bearing his name

and date of birth only. Soon afterward he had another erected by the shaft's side, with a life size statue of himself in marble resting on a pedestal, which statue is a most excellent likeness. Then followed, in succession, in stone, the statue of his hound Tow Path in pursuit of a deer; his pointer Bob pointing a fox; then came the life sized horse and rider, cut from sandstone in one piece, a most excellent piece of work, the rider representing Mr. Woolridge, the statue with rider being about 14 feet high. Then followed the vault, which is built of stone, covered by a slab of pure white marble, upon which he cut the figure of a gun. Then comes a pretty statue of a peasant girl holding a skull, upon which is his

This wonderful Nervine Tonic has only recently been introduced into this country by the proprietors and manufacturers of the Great South American Nervine Tonic, and yet its great value as a curative agent has long been known by a few of the most learned physicians, who have not brought its merits and value to the knowledge of the

NERVOUS DISEASES.

As a cure for every class of Nervous Diseases, no remedy has been able to compare with the Nervine Tonic, which is very pleasant and harmless in all its effects upon the youngest child or the oldest and most delicate individual. Nine-tenths of all the ailments to which the human family is heir are dependent on nervous exhaustion and impaired digestion. When there is an insufficient supply of nerve food in the blood, a general state of debility of the brain, spinal marrow, and nerves is the result. Starved nerves, like starved muscles, become strong when the right kind of food is supplied; and a thousand weaknesses and ailments disappear as the nerves recover. As the nervous system must supply all the power by which the vital forces of the body are carried on, it is the first to suffer for want of perfect nutrition. Ordinary food does not contain a sufficient quantity of the kind of nutriment necessary to repair the wear our present mode of living and labor imposes upon the nerves. For this reason it becomes necessary that a nerve food be supplied. This South American Nervine has been found by analysis to contain the essential elements out of which nerve tissue is formed. This accounts for its universal adaptability to the cure of all forms of nervous de-
