DAY AND EVENING CLASSES will re-open
Wednesday, Jan. 2nd. Many years' experience has
enabled us to make many improvements in our
methods and courses of study.
We are only too pleased, but are striving towards
such a high standard of perfection as is attainable and changes
now in progress will be part of our onward march
of improvement.
We are thankful to have had the opportunity of
starting so many successful careers, and hope
for increased usefulness in the future.
Send for Catalogue.

Miramichi Advance.

CHATHAM, N. B. . . . DECEMBER 27, 1894.

I WAYS TO GET RICH.

The road to fortune is paved with print-
er's ink.
Shakels and sense are necessary in suc-
cessful advertising.
Get something people want, advertise it
wisely and it is sure to pay.
The best advertising will not create a
demand for that which is not wanted.
Success in business is paved by the type-
setter and made smooth by the printing
press.
Brevity is the soul of defeat in some ad-
vertising. Grain won't grow to fruitless-
ness the day it is planted.
The advice of a bishop to a young
preacher applied well to an adver-
tiser: "Have something to say. Say it
Stop."

The men who fail and go down in obli-
vion belong to the class who never adver-
tise, advertise occasionally or only as they
think their trade will warrant.
There may be a Jubilee meeting in the
misapprehended sign in South Brooklyn: "For
Sail—A sloop yacht of forty-five tons.
Apply to owner, Third avenue, Bay
Ridge."

An advertisement should tell the whole
story in the least number of words, care-
fully selected and easily comprehended.
The display should be adapted to the me-
dium used.
To catch the eye is the first requisite
in an advertisement; what follows should
be so well put together as to excite the
reader's interest and claim his attention to
the end.—Printer's Ink.

PROGRESSIVE WOMEN.

Queen Victoria greatly dislikes a visitor
who is shy and colors or looks agitated
when addressed. At the finish of the in-
terview the queen generally bows slightly
or offers her hand, and then turns a little
to one side to save the visitor trying neces-
sity of an entirely backward exit from her
presence.
The empress of Austria has her hair
shampooed once a month. It is still beau-
tiful, luxuriant and perfectly black, and
when let down touches the ground as she
stands and she is tall. It is said the hair
requires forty eggs, and the other in-
gredients are obtained from no less than
twenty mysterious bottles.

One of the best-known figures in Paris
is Mme. Xer, who, upon the death of her
husband, a reporter for the French press,
took up his work and has conducted it
with marked enterprise. In her rounds
she is accompanied by a great white poodle
called "The Doctor," who permits no one
to trifle with his mistress.
One of the authorities on decoration in
England is Mrs. Conyn Carr. She is the
wife of a successful theatrical manager,
and he takes to the stage decoration and
costume he owes much of his success.
Mrs. Carr has designed dresses for several
of Mr. Irving's plays, and is almost always
Miss Terry's chief counselor on wardrobe
matters.

POULTRY POINTS.

As soon as the old hens can be spared
for market they should be fattened and
sold. This ought to be done before the
hens begin moult.
Light, nutritious and easily digested
food is what confined fowls require to do
well, but under no consideration should
corn be fed exclusively.
If disease appears and obstinately resists
remedies, it is better to begin with new
stock than to breed from those that have
been sick a long time.
Mark the pullets that you want to keep
as soon as you know which ones they are.
Then there will be no danger of their being
sold or eaten by mistake.
The hens should always have somewhere
to dust. It will add them to rid themselves
of lice. If a spoonful of insect powder be
added to the dust, all the better.
Chickens should not be allowed to go on
the roofs until they are ten or twelve
weeks old. If allowed to roost too young
their growth and appearance will be
injured.
A small box of charcoal kept where the
hens can have access to it will arrest dis-
orders of the bowels from overfeeding.
Use it freshly burned and break it into
reasonably small pieces.

CHURCH AND CLERGY.

There are 50,000,000 Lutherans in the
world.
Bishop Foster has been attending an-
nual conferences for fifty-seven years.
The Methodist Episcopal church south
had an increase of nearly 40,000 members
in 1892.
The Presbyterian church is agitating the
establishment of a "temperance Sabbath."
The third Sabbath in September is sug-
gested.
Amanda Smith, the colored Methodist
evangelist, says there are just two things
in the Bible: "It shall come to pass,"
and "It came to pass."
The Swedish Luthers in America have
over 1,100 students in their three colleges
at Rock Island, Ill., Lindsay, Kan., and
St. Peter, Minn.

FLASHES OF FUN.

She—Are you going to any balls this
season? He—I am going to three balls to-
morrow.—Syracuse Post.
"I'm going to become a professional
priestlighter." "What? What? What? What?
You haven't the slightest command of
language."—Chicago Record.
Clara—Were there any marrying men
down at the beach this summer? Cora—
Yes; there were two ministers and a Jus-
tice of the Peace.—Youkers Statesman.
Cora was a lucky man. He could go
around where he pleased and his wife never
asked any annoying questions. She was
above suspicion.—Boston Transcript.
"What was the trouble over at the Wo-
man's Club yesterday afternoon? I never
heard such talking." "Oh, it was the first
time they've had this fall."—Chicago
Inter Ocean.
"When horses are done away with," said
the Funny Boarder, "what will become of
the people who want to ride hobbies?"
"That's easy," answered the Cheerful Idiot.
"They will ride the wheels in their heads."

THE WHY OF IT.

Snow is sometimes of a red color, be-
cause of the presence of a minute vegetable
cell, the Protococcus nivalis, which secretes
a red coloring matter.
A match ignites because of the heat
generated by friction. Matches are tipped
with phosphorus and sulphur, both highly
inflammable substances.
A plumb line by the side of a very large
building inclines a little from the perpen-
dicular because the weight is attracted by
the mass of the edifice.
Flies can walk on the ceiling because
their feet are natural air pumps, and form
a vacuum so that the body is supported by
atmospheric pressure.
Sea shells murmur because the vibrations
of the air, not otherwise observable, are
collected in the shell and by its shape
are brought to a focus.

"I can cordially indorse Ayer's Hair
Vigor, as one of the best preparations for
the hair. When I began using Ayer's
Hair Vigor, all the front part of my head
—about half of it—was bald. The use
of only two bottles restored a natural
growth, which still continues as in my
youth. I tried several other dressings,
but they all failed. Ayer's Hair Vigor
is the best."—Mrs. J. C. PRUSSER,
