On Wednesday of last week Mr. Robert Russell and others at the Russell Mill, saw an enormous fish in the river which showed

a portion of its body above the surface. They describe it as nearly white in color and seeming to be as much feet, or perhaps more, in length. It was swimming up-stream at the time they first saw it and showed on the surface three times. On Saturday morning they saw it again, and in the same manner, going down river opposite the mill, its last appearance being nearly opposite the Black Brook mill wharf. It is also reported that the same or a similar fish was seen on Friday and Saturday in the river opposite the Snowball and Lamont mills.
