### The Schools.

The teachers of all the Town Schools are receiving notice from the new Board of Trustees of the termination of their engagements and such of them as are to be continued will do so under new agreements, beginning with 1897.

The Board has also decided to invite Philip Cox, Esq., M. A. to Chatham with the view of re-organizing the County Grammar School and placing educational matters in the town on an improved basis. Mr Cox, it is understood, has signified his readiness to accept the Board's invitation.

Charges Against a Fishery Officer. It is understood that a telegram has been sent from the Department of Marine and Fisheries to Mr. W. B. Deacon, fishery officer for Shedian district, peremptorily ordering him to not issue any smelt fishing licenses until further instructions are received from the department. It is said the action of the department is due to plaints which have been made to the partment that Mr. Deacon has in the past been issuing smelt licenses to people to fish on shares with him, and also that he has Wm. Hamilton, Presbyterien, conducting showed favoritism in issuing the licensesgiving some the best berths and to others. who were politically or personally not friendly, only berths on sand bars or areas where profitable smelt fishing was not possible.

### Presentation at Millerton.

Miss Eliza M. Crocker of Millerton, who intends spending the winter in Boston, was, on Monday evening last, presented with the following address, which is self-explanatory: DERBY, N.B., Nov. 23, 1896. To MISS ELIZA MCL. CROCKER.

DEAR MISS CROCKER.

We, the members of the congregation and choir of St. Peter's Church, Derby, have learned with deep regret of your intention to leave our parish and take up your abode elsewhere. From your childhood we have learned to esteem you very highly for your noble and amiable qualities, and particularly for your faithful services as assistant organof St. Peter's Church. We cannot allow von to leave us without giving you some tangible evidence of our esteem and something that will serve to remind you We, therefore, beg you to accept this bracelet and ludies' companion as only a slight evidence of our regard and, at the same time, we wish to extend to you our united wishes for your prosperity and

Trusting that a dear Saviour will sustain you with every succor in your hours of joy and serrow and guide your footsteps in the paths of righteousness and peace-Signed on behalf of the congregation and

E. L. McGINNISS. Miss Crocker made a graceful and ap preciative acknowledgement of the address.

### Fairey, Humphrey & Co.

With regard to the suspension of Messrs. Fairey. Humphrey. & Co., there have, o course, been rumors for some months past that things were not working smoothly between the partners, and that, in any event, a dissolution was pending and changes would be made in the businesss and we believe that, as far back as August last, a deed of dissolution of partnership was drawn up, but, for reasons which doubtless became apparent later on, was never executed. In consequence of the want of harmony between the two partners in the conduct of the business, it was at length decided to call a meeting of the firm's creditors and place the facts before them. The first meeting was held on Friday, the 30th ult., at the offices of the tirm in Bishopsgate Street, and, after an examination of the affairs, was adjourned to vesterday. The firm's liabilities are chiefly limited to two London houses--viz, Messrs. Foy, Morgan & Co., who are fully secured, and Messrs. A. Ruffers & Son, who are partly secured, There appear to be some contingent liabilities to banks abroad, which may or may not rank against the estate.-[London Timber Trades Journ al.

### Chatham's New Mammoth Dry Goods Establishment.

"Creaghan's" has already become a household word in Chatham and Newcastle, for no shopping tour made in either town has, for a long time, been considered complete unless it included the Creaghan store. Heretofore that at Newcastle has been considered headquarters of the Miramichi dry goods trade, while the Chatham establishment was an excellent second, but, hereafter, the handsome and commodious Chatham store, which is just being opened for business, will doubtless be the Mecca of the shoppers.

THE OLD AND THE NEW.

Those who have not been in Chatham for a few months, but may visit the town now, will be agreeably surprised when they reach the vicinity of the old Mills corner on Water street, just to the west of the Bowser House, to see the transformation that has taken place there. The corner was purchased last year by Mr. J. D. Creaghan and a few months ago he put a party of workmen upon it under the direction of evenly, with a finished result superior to Mr. Jas. Desmond, who has such a genius hand-made moulds. It has been patented in for improving all kinds of property. ### Revival of Trade.

Reports from the United States support the view that trade interests have vastly improved recently and that the business ontlook for the future is encouraging. This will be welcome news to the people of Canada, since our own trade interest will be stimulated and improved. In nothing | sidering a proposition to make it a branch of has this improvement been shown in a more marked way than in the increased sales of Putnam's Painless Corn Extractor. A boat was got ready and several men headed by Mr. Fraser put out to midriver-where they found and boarded the raft. Bragdon and Munroe were practically ueconscious and had to be lifted into the boat. From this upon reaching shore they were carried into the engine house where with much care and exertion they were restored to their full senses, and were next day in fair condition.

### Campbellton Notes.

Two companies are 'tumbling over each other" in their efforts to light the town by electricity. They are, however, giving fine illustration of "how not to do it." The big milling company at Maria, Bonaventure, has completed a saw mill of fine appearance, costing it is said over \$60,000. The company now have in their employ about the mills and in the woods, 500 men. and report says they are to build a pulc mill next summer. If this is true it wil prove a great blessing to that section of the Bay Chaleur coast.

Another company (said to be the Muskoka) has been negotiating for a site at the mouth of the Escuminac River, Bon. Co., with the purpose of building another pulp mili. The site is a good one, having all the water power necessary, as well as lumber for many years to come. A number of L. C. R. officials with

Mechanical Supt. Brown, of Moneton and J. A. Johnson, of Campbellton, were to run a train over the Bay Chal-ur Railway on Tuesday with the object of reporting its condition to the government, which is conthe I. C. R. This will be a popular move.

### Divers Recover Gold in 186 feet of Water.

The following account of the hardy and enduring men who brought up the treasure of the lost steamship 'Catterthun,' from the hold of the vessel, thirty-one fathoms deep. is from 'Black and White,' of Oct. 2.

On Aug. 8 last year, the steamship 'Catterthun,' struck and went down by night, taking with her many souls and some eight in the past, he invites them to call and see thousand pounds in gold coin. The insurance companies paid all claims to the various consignors and then turned their attention to the valuable wreck. Its position on the Seal Rocks being at last defined, the ill-fated vessel was found to lie in thirty one fathoms of water. Previously no diver had ever descended to a greater depth than six and twenty fathoms: but two experts. Messrs. A. Briggs and W. Mav. upon the undertaking that they should receive fifteen percent of any money recovered, essayed the dangerous task. Several attempts failed, but in August last, almost exactly a year from the vesse:'s destruction, Briggand May stood on the deck of the 'Catterthun,' then entered her hull, and with the help of dynamite burst open the door of the Chubb-locked tank which contained the treasure. Then it w s that D.ver Briggs created a record which is likely long to remain one. Struggling in the darkness at this great depth he attempted to remove the largest of the bullion boxes, which contained £5,000, and for more than a quarter of an hour, under the awful pressure of nearly thirty fathoms of water, he toiled at his task May then descended, completed the work that Briggs had begun, and soon a net containing the bulk of the treasure was dragged into the daylight with ringing. cheers. Box after box followed, the operations extending over several days, and having to be occasionally suspended when a rough sea rendered diving impossible. The experiences of the divers when engaged upon their weird work offers a wonderful story. Nerves of iron would seem to be absolutely necessary to successful personal exploration of the deep sea, Briggs and May lighted the profound darkness of the tank with an incandescent electric lamp, though elsewhere daylight sufficient for their labors reached the wreck. Both noted similar experiences below, and both remarked that the most uncomfortable of their

sensations was that of intense and dismal loneliness. They never used the light when it was possible to work without it, for the rays invariably drew about them a great concourse of fish. Of these, leather-inckets and sharks were the most numerous, but the latter they regarded without fear and received no molestation from them. One monster shark had taken up its quarters near the chart-room, and in the course of fatt, who does not know of his years of their labors both divers were forced to brush almost past its tail. The great fish. however, never troubled itself about the n. through the medium of Dr. Williams' Pink Of the year old wreck, the divers report Pills. ### THE KIDNEYS ALONE

TRIFY THE BLOOD-NO OTHER ORGAN CAN-DODD'S KIDNEY PILLS HELP AND HEAL THE KIDNEYS WHEN WEAK AND SORE.

Is your blood pure? If it is, you are fit for all the duties and njoyments of life, your eyes will be bright and your thoughts cheerful. If pure you will have good digestion,

strong perves, and your heart will beat as regular as a clock. If impure your blood will carry its impurities along to every nerve, tissue, joint and to every organ of the body; it will carry the seeds of disease, decay and death. And there is only one way, one means by which it can be purified, and that is by healthy kidneys, and by them alone.

We are, indeed, fearfully and wonder- SAAC fully made, but we are made just right if we only knew how to keep so. It does not matter how these impurities come, their effects are inevitable unless SHORTHAND the kidneys are doing honest work twentyfour hours every day.

You understand ;-there is no other organ that can do the work of the kidneys, and like the heart, they must keep right at it, But they are too often overworked by

our imprudence in eating and drinking : they are disordered by chills, colds, shocks and injuries; and they must be constantly looked to, and signs of distress promptly Then, whenever they need help, give

them the sovereign aid of the scientific discovery embodied in the kidney treatment of Dodd's Kidney Pills.
