THE EXHIBITION ASSOCIATION. Exhibits of Machinery and Manufactures, Farm and Dairy Products, Horses, Cattle, Sheep, Swine, etc. Products of the Forest, Mines and Waters, Paintings, Sculpture, etc. Fancy Work.

Miramichi Advance. CHATHAM, N. B., JULY 30, 1896. We want to St. John Globe local Politics for Northumberland.

The St. John Globe has, at least, one humble follower and imitator in its attitude towards the local government—our own little Liberal Herald.

It is to be observed that the Herald is not fortunate in its candidates. It tried the unusual experiment of running two in the late Dominion election, one of whom lost his deposit, while the other was lost beaten than before the Herald was established for the special purpose of helping him.

At the present time the friends of the government, whether they be Liberals or Conservatives, are not disposed to seek the advice of, or be influenced by either the Herald or its staff candidates.

It is absurd for them to look for such a thing as it is to imagine that they have any authority to speak for the Government, or that any friend of the Government will be in the least influenced by them.

The next November Meteor Showers. Astronomers are already preparing for the next great shower of Leonids, or November meteors. These showers, which are among the most impressive phenomena exhibited by Nature to man, are due to the crossing of the earth's path of a stream of minute bodies—probably pebbles not exceeding an ounce or two in weight, and spaced a mile or two apart in the densest portion of their orbit.

More Permanent Work Needed. It will be well for the taxpayers of Chatham in even the near future, if the gentlemen who are authorizing the work that is being done just now on the streets would endeavor to get out of the rut of the one old method of sidewalk making and give us something more permanent than the 3-inch hemlock deal affairs they are having put down, especially when other and better work can be done at no greater expense.

cost, while future repairs can be made at a mere fraction of the expense which those of the present new work will involve in only a few years. Deal sidewalks are perhaps the best that can be had under present circumstances in a few places like that along by the Commercial Building on Water Street, where the foundations are not permanent or solid, but they should be avoided on all the streets where there is a sufficiently good bottom on which leveling off can be done, curbs of timber or stone put down and more durable material, such as cinders properly mixed with earth and gravel laid. Such sidewalks will last for generations and need very little in the way of repairs.

The Victorian Age. DEVELOPMENT OF THE COMMERCE, EMPIRE AND POWER OF GREAT BRITAIN IN QUEEN VICTORIA'S REIGN. [New York Independent.] On the 20th of June Queen Victoria finished the fifty-ninth year of her reign, and before the close of 1896 she will have occupied the British throne longer than any other monarch in the annals of England. She has been a good ruler—England never had a better—and the progress of her people under her benign sway makes a wonderful story.

Political Notes. Sir Donald Smith reached Montreal from London via New York last Saturday. To report Sir Donald said that the report that he was to enter the Laurier Cabinet as Minister of Interior was unfounded. Sir Donald having seen Mr. Laurier return at once to his London headquarters, as High Commissioner.

It doesn't require much to make the St. John Globe imagine that it is an influential paper. It started the absurd proposition the other day that the N. B. Brunswick Government ought not to continue to exist, as present constituted, because its leader, Hon. Mr. Mitchell, is a Liberal Conservative. The Chatham Herald fell in with the Globe's view of the matter, as it always does in almost any regard, although it put its position forward as original.

The St. John Globe failed in its attempt to encourage opposition to the Hon. Surveyor-General Dunn when he offered for re-election in St. John. The pretence on which it endeavored to have its friends attack the Government was because its leader, Mr. Mitchell, is a Conservative. The editor of the Globe, who owes his election in St. John to the fact that two Conservative candidates were in the field and thus divided the strength of that party, is now out in full war-paint against all Conservatives and any who associate with them in public matters.

Paper Titles. Among the advantages claimed for paper titles, one of the latest products of the wood-pulp industry for roofing purposes, are their light weight, exceeding hardness, a non-conducting of heat and sound, and sufficient elasticity to meet all the requirements. There is also freedom from the dampness usually experienced in the case of stone. The new material is pronounced superior in quality, appearance and price, and from an insurance standpoint seems to be regarded as safe and satisfactory.

Investigation has lately demonstrated that coal may lose as much as 33.08 per cent in weight from exposure to the weather, while the loss is made even more considerable by the deterioration in quality.

Over 300 cases of sunstroke are reported to have occurred in Australia in January, the month of greatest heat. In its suggestions to the Colonial Government, the Medical Board point out that the excessive use of intoxicants is a chief predisposing cause, while the effect of alcoholic stimulants in treatment is likely to prove disastrous.

entre orbit. Among other suggestions for studying the Leonids, Dr. Johnstone Spony recommends attempts to photograph the swarm, both at the time when the earth is passing through it and while it is still in outer space. The swarms will be invisible to the eye, except as the particles are burned in our atmosphere, but may impress a long-exposed sensitive plate. Data that may serve in tracing a very remarkable past history may be gained also by noting the time when the earth encounters the most advanced of the meteors—possibly this year—and the hours when the showers seem to begin to reach their height, and to pass off. Any person who, about the middle of next November, witnesses a display of shooting stars from the constellation Leo may aid astronomy by recording exactly what he sees.

oxygen has been utilized by M. Masson in a new method of preparing alloys. The process consists in throwing into a bath of liquid aluminum a mixture of the oxide to be reduced and of aluminum filings, and it has yielded alloys of aluminum with nickel, molybdenum, tungsten, uranium, and titanium. It is believed that this method admits of general application, and will make possible the production of a number of new alloys with refractory metals.

Wake a Pie! Shorten it with Cottleine instead of lard and see what a crisp crust it will have; how delicious and wholesome it will be. Pie made with Cottleine will do a dyspeptic good. Do everybody good because it is good. There is only one secret in cooking with Cottleine—use but two-thirds as much as you would naturally use of lard. Follow this rule and Cottleine will do the rest. THE H. K. FAIRBANK COMPANY, Wellington and Ann Sts., MONTREAL.

DEADLY SPRING! YOU SUFFER FROM Spring Complaints, use SCOTT'S SARSAPARILLA. It is the best spring medicine to be had anywhere. Scott's is pleasant to take, mild and gentle in its action, and an absolute cure for Sciatitis, Gout, Catarrh of the Bladder, La Grippe, Indigestion, Dyspepsia, Female Troubles, Nervousness, Chronic Rheumatism, Catarrh of the Stomach, Throat and Stomach; Syphilis, Skin Diseases arising from impure blood or a disorganized system, and

Gatarrhal Stomach Troubles. Mr. Joseph Morrow, Merchant, of Fullerton, Ont., writes: "William Cornish says that Scott's Sarsaparilla is the best family medicine he ever tried. His son William who works for a farmer was laid up with a severe case of Stomach Troubles, Nervousness, Chronic Rheumatism, Catarrh of the Stomach, Throat and Stomach; Syphilis, Skin Diseases arising from impure blood or a disorganized system, and

Terrible Tragedy on the Sea! CAPTAIN AND HIS WIFE AND SECOND MATE MURDERED. ARRIVAL OF THE VESSEL AT HALIFAX WITH THE CORPSES—STORY OF A PASSENGER—THE MATE SUSPECTED OF COMMITTING THE DEED—THE LATEST PARTICULARS.

Nothing caused more excitement in this city in recent years than the arrival yesterday morning of the American schooner Harbert captain, his wife and the second mate. The terrible tragedy which was the cause of their conversation. Hundreds of people vied to get a look at the bodies of the murdered people who were in the stream. The members of the crew who gathered about the police station where the crew was confined were enormous. At one time over 1,000 persons on Duke Street, watching the entrance to the police station, expecting no doubt that the crew would be removed to the county jail.

The Harbert Fuller sailed from Boston July 8, bound for Buenos Ayres with a cargo of lumber. Capt. Charles Nash, a passenger on the vessel, was in charge. The vessel was accompanied by the second mate, Monck, a Harvard student, was in charge on board. The crew was made up of the following: Thos. Bram, mate, West Indies; August W. Blending, second mate, Finland; Sponsor, colonial, Edward Oscar Anderson, seaman, Sweden; Chas. Brown, seaman, Holland; Wm. W. Wessner, seaman, Sweden; H. J. Stoen, seaman, Norway; Frank Lockwood, seaman, France.

The tragedy was enacted on the night of the 13th before 12 o'clock, about 700 miles from the coast of Newfoundland. The second mate, Monck, was seen by the crew in the cabin, and the captain and second mate met their death in their own rooms in the cabin, a part of the ship not being under way. The captain, Charles Nash, and the second mate, Monck, were the only persons in that vicinity who were not sleeping. Nothing unusual is occurring on board ship.

Mr. Monck, the passenger, was asleep when the affair took place. The captain was in the chart room, and after part of the cabin lying on a cot in the cabin, within easy call. The chart room is on the starboard deck in the mainmast. Mr. Monck slept next to that again in the room occupied by the captain's wife. Mr. Monck was gurgling sound and got up and looked in the cabin. He had no key to the cabin door, and he had no key to the cabin door. He had no key to the cabin door.

Monck then drew his revolver and said to the captain, "Do you do this?" The mate then charged to him, protesting his innocence. Monck, who is the son of a prominent Boston broker, was on a voyage to South America, but had been in Halifax for some months. He had been in Halifax for some months. He had been in Halifax for some months.

A Good Deal in a Few Words. "I paid a Toronto specialist on catarrh a large sum of money but I got no benefit. I tried them all, but without any result, despair, and as I was getting very ill, I tried Chase's Catarrh Cure. It is all that is recommended, which is saying a good deal in a few words." Joel Rogers, clerk, Division Court, Boston. Received in box on 25th ult.
