old states that will be represented, we shall have here a gathering of 200 or 300 representative Democrats, whose opinions will command attention. I think there is no doubt that a convention will be called in September. We find in other states as well as Indiana, that the politicians have largely slumped, but among the business men and the people there is a determination to hold the party true to its traditions, and defeat the un-democratic ticket nominated at Chicago upon a platform that is anything but Democratic."

A Fibre Chamois Ad.—Men as a rule care more for comfort than for style, still no man is averse to a neat well hanging coat that keeps its shape through all kinds of knocking around. This is one of the extras that Fibre Chamois furnishes when used as the interlining in men's clothing. It not only makes garments thoroughly weather proof, providing a healthful warmth which can't be penetrated by the severest wind or cold; but its flexible spring and stiffness make the coat or vest fit well and keep its proper hang till worn completely out. And the beauty is that it is so light you wouldn't know you were carrying anything extra around, and so cheap that it is in every one's reach.
