doctor in Fergus. The arm was very sore and swollen all summer, and became so bad that it was a mass of sores from the shoulder to the elbow. In October 1894 a large lump appeared on her back, over one of her lungs. The doctor who vaccinated her, treated her all that summer, calling very frequently, but the medicine he gave her did no good and she was growing weaker and weaker. When the lump broke out on her back another doctor was consulted, who said she was in a very bad state of health. Her constitution appeared to be completely undermined, and her appetite had completely failed. The last doctor called in gave some outward applications, and lanced the gathering, but it did not give the patient any benefit. Nine such gatherings have

The child became very puny, and little or no food would remain on her stomach. At night she would fairly rave with the pain in her arm and back, and consequen ly her trouble was aggravated by a loss of sleep. She had the best of attendance but to no avail, and she was slowly but surely sinking. Friends advised a treatment with Dr. at Church Point. The title of the picture is | Williams' Pink Pills and as a last resort they were tried. To the surprise of both parents and friends Lena began to improve soon after beginning the use of the pills. Her appetite returned, she became stronger and her general health much improved. The sores have not yet left her back and arm, but her constitution is being so very much improved under the treatment with Dr. Williams' Pink Pills that her parents are looking for a complete cure. Mr. and Mrs. McHardy thank Pink Pills for the present improved condition of their child, as they have done her more good than the scores of doctor's medicine which she took. After spending several months in soli tary confinement the bronze bacchante of Mr. Macmonnies has been exiled from Boston where it was feared her presence would prove detrimental to the morals of the present and coming generations. The bacchante goes to New 'York where she will be set up in the Institute Museum and where she will be noticed chiefly because of the notoriety she achieved in Boston. The first to detect immodesty in this bronze statue were those who are immodest themselves, just as those who make the loudest outery against the world's wickedness are generally far from immaculate. This is a convenient way they have of diverting attention from their own delinquencies. One of the most staid of New York newspapers says it is all rubbish that the bacchante represents a drunken woman, that she is immodest, that she glorifies the iniquity of wine. The figure simply represents light heartedness and gaiety and grace.

A Montreal paper complains that two of Reil's lieutenants are members of the mounted police. Several of Jeff Davis' lieutenants have held some of the highest offices in the gift of the American government ever since the close of the rebellion. Such appointments cannot be justified in either case.

It may be that the farmer works as hard as he did fifty years ago and banks no more money than he did then, but still he gets a good deal more for his labor. He lives in a better house and has better furniture; he wears better clothes and gives his sons and daughters a better education; he has in his parlor a piano or an organ instead of a spinning wheel and he has cheerfulness and music where fitty years ago he was apt to have nothing but discontent. Such things are worth while as much as money and they are made possible by the improved farm machinery that during the last fifty years has come into use. Twenty-five years ago there was not a single store in St. John devoted exclusively to the sale of farmer's supplies; now there are a half dozen, notable

among which is that of A. Myers, No. 82 Germain Street, which is headquarters for the agricultural implements made by J. H. Gould of Smith's Falls, Ontario. Among Mr. Gould's celebrated implements which are always kept in stock are the Redian model and one horse mowers, the Ithica rake, the Queen and nine other kinds of steel plows, gang and sulkey and the Daisy and Champion cultivators. With some of these implements a boy of fifteen can do the work of a man, and as How Good much as ten could do with the tools of fifty years ago. Mr. Myers keeps a full carts, made by Monroe & Mackintosh of Alexandria, all of which are stylish and durable. Mr. Myers will make considerable of a display at the exhibition, but

News and Notes.

At the Presbyterian General Assembly which met at Winnipeg on June 15th, the Rev. James Murray, formerly of Prince Edward Island, now residing at Newcastle, N. B., was granted leave, through the Presbytery of Miramichi, to have his name placed upon the roll of that presbytery as a retired minister of the church.

Toronto's Highland bayonet team easily defeated all colonial teams in the bayonet trials, and four Canadians were left to compete for the colonial prize. Then they defeated the British regulars apparently only with less ease, and then ove came the team of the picked men of the Household troops, drawn from the Life Guards, the Grenadier Guards, the Coldstream Guards and Scots Guards. Finally, the most skilful of the Canadian team. Priva'e Stewart, won the Empire prize against all victors in previous contests, and is therefore the British empire champion. Toronto intends to give Private Stewart a public welcome when he returns.

John Irving, a farmer at Cape Traverse, P. E I., wishing to rid his place of a few of the crows which gave him some annoyance, decided to feed the birds on poison. The crows did not bother the poison, but Mr. Irving's cows broke into the place set apart for the crows and partook of the poison, with fatal results to two fine ones. The Charlottetown Guardian says at last accounts it was doubtful if some others would recover. Poison is a bad thing for farmers to distribute too lavishly about the

A NOBLE FAMILY.

Popular and Well Known in Canada.

For many, many years a very noble family, popular and well known, have conferred great blessings on Canadian homes. This family to which we refer has served the homes of Canadians faithfully and well; they have brightened the pathway of many a sad woman when the clouds were dark : they have cheered hearts when times were dull and money scarce; they have been a blessing to thousands of husbands and children, belping them to dress better, so that mothers, fathers and children were enabled to face the world as handsomely dressed as their wealthier friends and neighbors.

These popular, tried and helpful friends are the Diamond Dyes, the same in power, work and usefulness to-day as they were twenty years ago.

There are many unitations of these celebrated Diamond Dyes worthless and dangerous to use. Beware of these deceptive dyes, as they can never do good work.

Removes every Trace of disease. Is you face disfigured by eczema, pimples,

blotches and blackheads? If so, your blood is sluggish, impure and poisoned. While the life-stream is reeking with impurities you cannot be healthy and good looking. If you would renew the system, c'eanse the blood, and rid yourself of disease, you must use Paine's Celery Compound, the great system-cleanser and blood-purifier. The following letter from Mr. D. Mc-Mahon, Peterboro, Ont., proves that Paine's Celery Compound possesses virtues and lifegiving qualities unknown to the ordinary medicines and doctors' prescriptions:

"I have great pleasure in testifying to thes fact that Paine's Celery Compound ha, caused a remarkable change in my condition. "I was troubled with a very bad type of eczema on my face and in patches over my body for four years. I was under treatment of three doctors at different periods, and had also tried many remedies, but all proved useless. At last I bought a bottle of Paine's Celery Compound and put in Iodide of Potassium as recommended on the label. The one bottle did me so much good that I bought five bottles more, and now am happy to say I am perfectly cured and completely free from the troublesome disease.

ALBERT'S THOMAS

PHOSPHATE

POWDER

At the German Government Experimental Station at Darmstadt, Professor Paul Wagner has tested it most thoroughly, and unhesitatingly pronounces it the best phospheric fertilizer at his command. He says: "If you desire to enrich

the soil, to provide the soil with a store of phosphoric acid to serve for continuous cultivation for perennial fodder fields, meadows, vineyards, orchards, etc. there can be no phosphate more suitable than Thomas' Phosphate

In another place he says that clover gave a higher yield on ground that had this powder put in it than on ground upon which phosphate manures had been applied.
