## One Phase of Insanity.

The lengths to which clergymen of certain class are sometimes carried by their fanaticism is illustrated in the case Rev. Wm. The Rev. Mr. McNichol, when asked about the attack on the President, said "I made no attack on him or any one else. The language in the book is not my own, but that of other noted tem serance orators. I, of course, believe in the quotations used

and think that they are right," Mr. McNichol further said : President McKinley has forgotten his Christianity and sunk as low as the heathen. The decent people of this country are familiar

with disfavor. The reference to the President has caused the severest criticism and driven from the church several of the trustees and most Counc! sub-tantial members. And, yet, there are, doub less, a good many people who will think Mr. McNichol a Christian.

ALWAYS FOLLOW THE USE OF DR WILLIAMS PINK PILLS. WO CASES IN WHICH THEY RESTORED HEALTH

From the colborne Express. There are few if any people in Murray township, Northumberland county, to whom the name of Chase is not familiar. Mr. Jacob Chase, who has followed the occupation of farmer and fisherman and fishdealer, is especial'y well known. He has been a great sufferer from rleamatism, as all his neighb-

I had been a sufferer from theumatism for upwards of twenty years, at times being confined to the house, At one time I was laid up for sixteen weeks, and during a portion of that time was confined to my bed, and perfectly helpless. I had the benefit of excellent medical treatment, but it was of no avail. I believe, too, that I have tried every medicine advertised for the cure of rheumatism, and I am sure I expended at least \$200.00 and got nothing more at any time than the merest temporary relief. At last I was induced to give Dr. Williams' Pink Pills a trial, and from that time I date my good fortune in The sunual meeting of St. Andrew's getting rid of the disease. ## Electric Lighting

A report of the Commissioner of Inland Revenue dealing with the official inspection of weights and measures, gas and electric light, just issued, contains sundry items of general interest. The marvellous progress which has been made in lighting by electricity is well illustrated by the bare statement that there were no fewer than one hundred and eighty-seven electric light companies registered under the Inspection Act during the year ending on the thirtieth of June, 1897. The first in importance, measured by the number of lamps in use, and reckoning each are light as equal to ten incandescent, is the Royal Electric Company, of, Montreal, which heads the list with 1,450 are and 58,000 incandescent lights, or a total equivalent to 72,500. The Ottawa Electric Company comes next with 550 arc and 57,240 incandescent lights respectively, or a total of 62,740. Third on the list is the | To expenditure, Toronto Electric Light Company, with 1,400 are and 45,000 incandescent lights, or total of 59,000. The Montmorency Electric Power Company, of Quebec, follows with a total of 17,080, below which the figures decline rapidly until the plant o French Brothers, Sawyerville, with ninety incandescent lights, is reached. During the year 3,208 electric light meters were presented for verification. Of these, 3,111 were passed, 'as coming within the error tolersted by law,' but only 698 are tabulated as actually 'correct,' and it is not reassuring to customers to find that 1633 others of these 'verified' meters are classed as 'fast.' - [Witness.
