Shares of \$1 each. Stock Non-Assessable. No Persenal Liability.

This Company has secured by purchase 680 acres of gold-stocked lands on the Snake River of Idaho, containing about Fifty Million cubic yards of gravel which pans from assays made an average value of over \$1.50 per yard in gold, and the cost of saving the gold is only 3 cents per yard by using the Improved Dredge manufactured by the "Risdon Iron Co.," of San Francisco.

Five hundred thousand (\$500,000) of the preferred shares, par value Er each are offered at 25 cents per share. Those shares will receive a dividend of five per cent. on the par value before the common stock will receive any dividend. We predict that this stock will be worth par in six months. The Company is negotiating for another Placer property which pans as high as \$9 per yard, and a free-milling quartz property that assays from \$30 to \$300 per ton.

This is the best stock ever offered in Canada, as the gold is in sight and only requires the proper machinery to separate it from the gravel.
