GREAT MECHANICAL FEAT

HALF OF A STEAMSHIP MADE INTO

the Milwaukee Was Blown Apart and a New Section Put on Her. There has just been launched from a shipyard at Newcastle on Tyne the most singular ship that has ever breasted the waves. It is the result of what the shipmen call a maritime miracle, and it has been constructed

It is a ship one half of which has sailed the ocean for years and carried freight to far off countries, while the other half now touches deep water for the first time. So successful has been this experiment that beyond doubt it will be tried again when opportunity

Failure was freely prophesied for this, unique piece of work in the marine engineering line. The fact that it sufficient that it could not be done now, said the old fogies, but, nevertheis an absolute success and that a new feature in the salving of vessels has been introduced to the world HALF THE SHIP SAVED.

"The steamship Milwaukee was ownfare which could not fail seriously to waukee sailed from the Tyne on the

at four o'clock the following day. "Divers reported that there was a rock thirty feet long standing up eight feet through the bottom of the Laths vessel in the main hold. It was decided to cut the vessel at the after end Paling of the main hatch, or some fifty feet forward of the stokehold bulkhead, which remained intact, and kept the after end free from water. This space included the engines and boilers. "The severing was then commenced and was done by means of charges of

dynamite applied to the shell plating, of scorn, and then turned his eyes to- tank topsy decks and stringers, each charge being spread over a length of from four to six feet, the charges being varied in accordance with the thickness of plate to be cut, one esbut he seemed to add. "I am an old pecially troublesome one taking no less than 140 pounds of dynamite to sever it. One charge, unfortunately, blew in the watertight door in the stopped before another gate, where we boiler room bulkhead, the water rushwere kept a long time until a detach- ing in and flooding the engine and

A FEW POINTS ON CANNING FRUITS.

To some people canning fruit is one of the biggest bugbears of their household duties, says Emma R. Makemson. They dread it, and from the time the first berries and cherries make their appearance, until the last peach and pear have been taken care of they live in constant fear of their fruit fermenting and spoiling. With myself, while it is a work that I have no fears as Two of Them Bung at Harding, South to the result, it is always satisfactory -always what I intend it shall be-
