the conditions are different.—The politicians there own the newspapers and direct how they shall be conducted. The editors are (or were up to within a short time) employed to do the work in their departments, just as the printers were in theirs. In Chatham, the papers are owned by their editors who conduct them just as they please.

reality no valid claims to recognition in that way, the Transcript assailed the administration and berated the new minister and all who were supposed to influence him. These claimants for preference did not appear to realize that the general features of the important service which had come under his control, and that he ought not to be expected to become a mere medium for carrying on the petty personal persecutions which Mr. Hawke seemed to think were the most important duties falling to the new administration.

How They Discuss the Double-Trench System. The World, with its usual candor, refinement and the tact to which it is its custom to display, terms our suggestion of the double trench system in laying sewerage and water pipes as "hogwash for engineers' clubs," and pretends that the suggestion was to lay two sets of pipes in the same trench. It thinks that if that system had been adopted citizens would "get a supply of sewer gas in their drinking water," etc.

Presiding at a banquet of the Unionist Club, in London, on Wednesday, the Marquis of Salisbury said the Unionist might almost be said to have been too successful. By some subtle influence the party had destroyed the power of the opposition. This was regrettable, even if, because it resulted in the laxness observed in the reduced majorities in the House of Commons which would not have happened if there was a strong and united opposition to keep the Unionist members to their work.

On Thursday evening at 8 p. m., Quebec, a young man was struck and killed by lightning. A great storm, which for a factory, Quebec city, was blown down. At Terrace and Racine's foundry, when molten metal was being raked out of the smelter, it was noticed a puddle of water had run from the street and when the metal touched the water a terrific explosion occurred, wrecking much of the interior of the building, causing \$2,000 damage and injuring several men. The damage in Quebec town by the floods was great. Water flowed down in perfect streams. Fully two feet of water ran through many low streets, flooding basements and lower flats of stores and dwellings, washing furniture and everything else into the street.

The Moncton Times refers to the ADVANCE as "the Chatham Liberal Organ," which suggests the idea that our contemporary at "the Bend" should change its name from Moncton Times to behind the times. The ADVANCE is not conscious of being either the Liberal organ or the Conservative organ, nor is it aware of the existence hereabouts of sufficiently definite party distinctions to be represented by an organ.

The chronic grumbling of the Moncton Transcript against Liberal rule indicates that its ideas of the utility of partisanship are based almost entirely on the lowest conceptions of politics. Its notion appears to be that all public officials who served under the former government must necessarily be political partisans and, therefore, ought to be dismissed to make room for others, who are also political partisans.

The Assessors of the Town of Chatham having been duly appointed, give notice that any person or body corporate liable to be assessed in the Town of Chatham or in any of its wards, should have the assessors within 20 days from the date hereof with a written detailed statement of the real and personal estate and income of each person or body corporate and every such statement shall be subscribed and sworn to before some Justice of the Peace for the County by the person or agent making the same. Blank forms of statements may be procured from the assessors. Dated at Chatham 5th day of May 1901.

The last Liberal organ that existed in Chatham was the Liberal Herald, which was practically sold out about five years ago—that is, its subscription list and the fulfilling of such of its undertakings as could be transferred—to the Chatham World, which has continued, since 1896, to be the newspaper medium of the gentlemen who were charged with the performance of its obligations.

Through the efforts of the editor of the Transcript and others of his peculiar views on such matters, a number of railway officials were charged with having been partisans, and the allegations made against them were investigated as far as possible. Mr. Hawke, it is said, took the ground that when he and others—men who were more blatant than influential as political workers—asked for the dismissal of an official, he ought to get his discharge summarily; and they were very much disappointed and grieved when they learned that those whose employment they desired to have thus taken away from them by secret means were to be, in all cases, afforded opportunity to disprove the accusations made against them. The maintenance of this principle, which is based on generally recognized ideas of fairness and justice, led to the practical withdrawal of about nine out of every ten charges made, and to the fact being demonstrated that a large proportion of the others were unfounded. In most cases, it turned out that the accused officials were attacked because their places were promised to men who had been induced, by such promises, to become active political workers, while the men attacked had faithfully attended to their duties and consistently refrained from taking an active part with either side.

It would be no particular honor to any newspaper to be the organ of either party in Chatham. Cannot the Times conceive of a paper being conducted by its proprietor as a business investment and which may support or condemn the doings of public men without regard to the party they belong to? That is what the ADVANCE does. In the last Federal election, for instance, it supported the candidate in this county who was then and is yet claimed to be a Conservative. It opposed, at the same time, of course, the candidate who was offered as a Liberal. It has not changed its attitude in regard to the men or organizations under whose auspices those two gentlemen ran. We might direct attention to other instances and utterances in which the ADVANCE has proved that it is certainly not the Chatham Liberal Organ.

Mr. Hawke, it is said, took the ground that when he and others—men who were more blatant than influential as political workers—asked for the dismissal of an official, he ought to get his discharge summarily; and they were very much disappointed and grieved when they learned that those whose employment they desired to have thus taken away from them by secret means were to be, in all cases, afforded opportunity to disprove the accusations made against them. The maintenance of this principle, which is based on generally recognized ideas of fairness and justice, led to the practical withdrawal of about nine out of every ten charges made, and to the fact being demonstrated that a large proportion of the others were unfounded. In most cases, it turned out that the accused officials were attacked because their places were promised to men who had been induced, by such promises, to become active political workers, while the men attacked had faithfully attended to their duties and consistently refrained from taking an active part with either side.

On Thursday evening at 8 p. m., Quebec, a young man was struck and killed by lightning. A great storm, which for a factory, Quebec city, was blown down. At Terrace and Racine's foundry, when molten metal was being raked out of the smelter, it was noticed a puddle of water had run from the street and when the metal touched the water a terrific explosion occurred, wrecking much of the interior of the building, causing \$2,000 damage and injuring several men. The damage in Quebec town by the floods was great. Water flowed down in perfect streams. Fully two feet of water ran through many low streets, flooding basements and lower flats of stores and dwellings, washing furniture and everything else into the street.

It would be no particular honor to any newspaper to be the organ of either party in Chatham. Cannot the Times conceive of a paper being conducted by its proprietor as a business investment and which may support or condemn the doings of public men without regard to the party they belong to? That is what the ADVANCE does. In the last Federal election, for instance, it supported the candidate in this county who was then and is yet claimed to be a Conservative. It opposed, at the same time, of course, the candidate who was offered as a Liberal. It has not changed its attitude in regard to the men or organizations under whose auspices those two gentlemen ran. We might direct attention to other instances and utterances in which the ADVANCE has proved that it is certainly not the Chatham Liberal Organ.

Through the efforts of the editor of the Transcript and others of his peculiar views on such matters, a number of railway officials were charged with having been partisans, and the allegations made against them were investigated as far as possible.
