A Characteristic Statement.

The statement in the World that His Excellency was misled by the officials of th Marine Department informing him that Newcastle was in a distant county (Queens) and could be reached only by rail is of course one of the usual examples furnished by that publication of its ideas of the fitness of things, in intruding party politics even into such functions as that of last Friday. The officials of the Marine Department are | Class III. Galloway and Devons. surely not stupid or ill-informed simply because they are serving under a government not of the party which is discredized by the support of such papers as the World. Let us hope that Lord Minto will not judge of the Miramichi or its people by what he may have seen on Friday of the World's scarecrow representative, who abused the courtesy of being permitted to be on board the committee's boat by following the official local representatives on board the Minto, uninvited, and chased them even into the Governor General's cabin, we are told. It is not believed that the firemen who afforded him an interview while the gentlemen of the committee were with Lord Minto and his party, told him the disparaging story about the officials of the Marine Department, and if they did he might have assumed that they were not sufficiently good authority on the subject to justify its publication.

It was from the top of Lavina mountain that John last fall heard the call of the Conservative party for a man to lead the forlorn hope in the race against Big Bill Gallagher and Chris Foley, the labor leader. McKane made a good race of it, and supplied all the ginger of the campaign, but he did not win out. Since then he has been pushing development on the Lavica property and he now stands to make a big winning. The Lavina is about eight miles from Argenta, and Mr. McKane figures that he now has \$250,000 worth of ore in sight. The Lavina vein is from five to six feet wide, and up to the present about 1700 feet of work has been done upon it. The paystreak in the vein is about a foot wide, and carries silver and lead values which average \$100 to the ton. as well as small gold values. A sample Macdonald Seed Grain Competition. shipment was made from the property some time ago, consisting of 10 tons, which after deducting exceptionally heavy transport charges, as well as treatment charges, netted the company \$53. In addition to this clean ore the ledge carries large quantities of concentrating ore, which has not been figured on by the company so far. Mr. McKane contemplates shipping about 2000 tons of high grade ore this season, which will make a record for the Lardo. A small crew of men is employed on the property, working three shifts."

It was with sincere regret that we, with the rest of the British Empire, heard of the death of our late beloved Queen Victoria, whose name will ever be dear to us, but we assure you we are equally loyal to her son, our present King, and we are glad that her birthday is still to be celebrated for that of the reigning Sovereign. When the nation's need for help in South

Africa was known, our town in common with the North Shore of New Brunswick, loyally responded, sending her sons and contributing her means to the contingent and patriotic funds, and, although we have heroes of Paardeberg, Bloemfontein and Pretoria in our midst, we are thankful to Almighty God that all our men returned in safety. The war in South Africa, while deplorable in many of its aspects, has furnished to the world anew the lesson that the Motherland is still ever ready to resent the oppression of its subjects or the invasion of its colonies. It has al-o been the means of more closely uniting all the members of the Empire, and demonstrating to the nations, that when the interests of G eat Britain are attacked she can count upon assistance in defence on her

loyal Colonial forces the world over. The Town of Chatham in exports is the second town of importance in New Brunswick, ranking next to St. John. Our magnificent river, with its beautiful scenery, abounds with fish, and this provides an industry second only to the timber trade of the district. The wood pulp industry has been established here for the past fifteen years, and is becoming an important part of the business of the town. Our commercial re'ations have been more closely identified with the Mo her Country than possibly any other part of the Dominion, and the Miramichi was favorably known in Great Britain years ago, better than our larger centres of commerce, and still holds a foremost posi-

Our people are loyal to Britain and British inscitutions and are prosperous, happy, contented and well-employed, and the next dwellings you will see as you drive through our town are largely owned by the occupants. We are at present keeping in touch with the advance of civilization and are putting in a water and sewerage system, so our town will not present as good an appearance as we would wish on the occasion of your visit We also extend to Lady Minto a most

recollections of our visit here, for your reception has been one of the most accept His Excellency's remarks were very heartily cheered.

Leaving the Park by the Henderson St. entrance, the procession was re-formed and led as before, drove through the streets, after which His Excellency and Lady Minto held a reception in the Town Hall, which was beautifully decorated for the occasion. The function was very informal, and the number presented by His Worship the Mayor very large. About ten o'clock, the reception was closed and the distinguished party proceeded to their steam launch at the what nearby, good-byes were said and one of the best and most popular celebratious of a governor general's visit the Miramichi has

ever had, ended. The Minto left port at daylight on Satur-
