

ROYALTY'S GREATNESS.

London Maganuffus Treated by the Duke and Duchess of York.

There are not two warmer hearts in England than those of the Duke and Duchess of York.

His royal highness later on went up to a seven-year-old boy who appeared to be in no more ordinary pain, judging from his sorrowful, troubled face.

A Nova Scotian Who Was Attacked Almost A Year Ago By Recovery—His Experience of Value to Others.

From the Enterprise, Bridgewater, N. S.

Mr. C. E. Johnson is about 28 years old, a gold miner by occupation, is well known about the mining camps in these parts and is thoroughly posted in his business.

Mr. Johnson chanced to be in Porter's drug store, in Bridgewater, when a case of Dr. Williams' Pink Pills was being opened, and he remarked to the clerk; "I saw the time when a dozen boxes of those pills were of more value to me than the best gold mine in the country."

He was working in a making a good deal of water and I got wet the first day. That night the old trouble came back, with the addition of a severe cold. I managed to get rid of the cold, but the whole force of the disease settled in my stomach, kidneys and joints, and boils broke out on my body and limbs.

Dr. Williams' Pink Pills cure by going to the root of the disease. They renew and build up the blood, and strengthen the nerves, thus driving disease from the system.

CHAPTER XVII.—Continued.

It was early morning, in an elegant boudoir, whose oriel window overlooked the garden, sat three young ladies, respectively, Bessie Glenn, two-and-twenty; Gertie Glenn, twenty; and Eve Glenn, eighteen—all dark-eyed, dark-haired, and handsome, yet each of a distinct different type.

"I couldn't possibly," yawns Bess, from the depths of her easy-chair; "it's too much trouble."

"Yes," stolidly, but not very politely, said the uehain.

"Yes, what? What ought you to say, my little fellow? Yes—"

"Yes, if I can get it!" replied the youth, without moving a muscle of his face.

"The little boy put his hand across his trousers and said: 'I'm too tight here to be happy, sir!'"

"You are not happy, little man, are you?" said the duke, most kindly.

"No, sir," said the youth, crying.

"Oh, this will never do," replied the duke, encouragingly. "Why are you not happy?"

"I am determined she shall not remain here," Bessie Glenn was saying. "I heartily endorse your opinion," said Gertie, slowly.

And for once in her life the tongue of reckless Eve was silent. She looked thoughtfully out of the window.

CHAPTER XVIII. The first week of Daisy's stay at Glenrover passed quickly. She was beginning to feel quite at home with Mrs. Glenn and Eve, but Bessie and Gertie held aloof from her.

"You are just the kind of a girl I like, Daisy," said Eve, twirling one of her soft gold curls caressingly around her fingers; "and if I were a handsome young man, instead of a girl, I should fall straightway in love with you. Why, what are you blushing so for?" cried Eve.

"No," said Daisy, in a low voice, a distressed look creeping into her blue eyes. "If you please, Eve, I'd rather not talk about such things."

"You are certainly a funny girl," said Eve, ponderingly. "Why, do you know all the handsome young fellows around here have fallen deeply in love with you, and have just been beseeching both Bess and Gertie for an introduction to you."

No laughing rejoinder came from Daisy's red lips. There was an anxious look in her eyes.

"Do you see that large gray stone house yonder, those turrets you can just see beyond those trees?" asked Eve, suddenly, a mischievous light dancing in her merry hazel eyes.

"Yes," replied Daisy. "I have a fine view of it from my window up stairs. I have seen a little child swinging to and fro in a hammock beneath the trees. Poor little thing, she uses a crutch. Is she lame?"

"Yes," replied Eve. "That's little Bessie; she's lame. I do not want to talk about her, but about her brother. Oh, he is perfectly splendid!" declared Eve, enthusiastically. "and I'm sure, if you were a girl, you'd be just as good as him."

"Dear me," she cried, staring hard at the beautiful little face before her.

"Why, you are a child, scarcely older than I," said Eve. "What could that stupid brother of mine mean by saying to me that I have a notion to send you back again directly?"

"Oh, please do not, madame," cried Daisy, piteously. "Only try me first; I will do my very best to please you."

"But I did not want a young person," expostulated Mrs. Glenn.

"But you sent for Alice, his daughter, and—oh, he thought I would do as well," faltered Daisy, timidly.

"Alice Jet is over forty, and you are not more than sixteen, I should judge. How did you happen to think you could do as well as she?"

The color came and went on Daisy's pretty flower-like face, and her heart throbbed pitifully.

"I am not so very wise or learned," she said, "but I should try so hard to please you, if you will only let me try."

"I suppose, now that you are here, we will have to make the best of it," replied Mrs. Glenn, benevolently.

The fair beauty of the young girl's face did not please her.

"I have always dreaded fair women," she thought to herself, "they are the most dangerous of rivals. If she stays at Glenrover, I shall see she is kept well in the background."

While in the morning-room below the three girls were discussing the new turn of affairs vigorously.

WINTER CARE OF HORSES.

The nobility, intelligence and beauty of the horse are attributes that have been freely dwelt upon writes Chas. M. Drake. It is much on account of these that the horse requires better care than many other domestic animals.

In view of these facts the horse ought not only to be thoroughly cared for as regards grooming, cleaning of the stable and regular and proper feeding, but his health should be a matter of constant watchfulness.

An experience covering more than a decade in the ownership and care of horses is not devoid of valuable lessons always reflect in their care and feed, and like ordinary mirrors, their shining coats reflect good care and treatment.

A regular and thorough grooming is just as important in winter as at any time. The chafing effect of a good currycomb assists the skin to perform its functions as an eliminating organ—even more important in winter because perspiration is less.

DEATH IN THE DRINK. Some time ago in India an officer who was parched with thirst was travelling with his Indian servant when water was scarce. It was evening time, and in that country the moon throws a peculiar light upon many things.

The officer saw at the side of the road a pool of water that looked very clear. He was stopping down to drink when his servant called to him, "Nay, nay, Sahib, lend me your sword. Going to the pool the servant took the edge of the sword into it, when up came the head of a cobra, the most dangerous serpent in India. The servant then brought the weapon down upon the reptile and cut off his head. Had the officer drank of the pool, he would have been a dead man. There was death in the drink. How many the serpent drink is destroying every day in our great cities! Let us be servants for them, and show them the work of the serpent. At last it biteth like a serpent, and stings like an adder, says the Bible.

WHY STEEL RAILS BREAK. In 1885 a steel rail on the Great Northern railway in England broke into 17 pieces, causing a serious accident. A committee of the board of trade appointed to investigate the cause of the breakage has only recently made its report, after four years of work on the subject. The committee ascertained that the particular rail which broke on the occasion described possessed certain abnormal features the precise origin of which remains undetermined, but the investigation led to several discoveries of scientific and practical importance. Among these is the surprising effect of cracks in the upper surfaces of rails. It was found by experiment that a rail nicked with a chisel to a depth of a sixty-fourth of an inch broke under a weight of 600 pounds falling from a height of 12 feet, while the same rail not nicked resisted the fall of a ton weight from a height of 20 feet.
