is certainly to be congratulated on the w11 be given to the various fields of Luman

beautiful things.

The Royal Baking Powder is an old ca didate for favor with the housekeepers of the Domision. Its patrons will be pleased to know that the recent Government report giving the analyses of baking powders sold in the Dominion show the Royal to be the purest of cream of tartar powders, the most healthful in character, and of greatest leavening strength.

It is shown that the art in baking-powder making is to give a pure and heathful powder, of highest leavening power, which will keep indefinitely without losing its strength. These two qualifications--effeccents

tive keeping and highest strength-it is impossible to combine in a powder except with the use of chemically pure ingredients. The report states that the only entirely cream of tartar powders which came up to this standard were the Royal and Cleveland's.

Acadiensis.

The foregoing is the title of a new and attractive quarterly, the first number of which we have just received from the publisher's hands. The selection of the title, as sppears from an examination of the Salutatory article, is thus explained
