Shamrock II Trials. Among the guests who watched the Shamrock from the bridge of the Erin were Captains McKinstry, of the Tontine, Nickels, of the Frisland, and Alfred, of the Saevic. Speaking to a Herald reporter after the yacht reached her anchorage, Captain McKinstry, representing the party of deep sea sailors, said: "If that boat cannot win our Americans have the greatest wonder ever built. The Shamrock is the fastest thing that travels under sail that we have ever seen."

Shamrock II Trials. During the trial that the Shamrock has had in these waters every sail has been tried except a spinnaker. She has sailed on every point except dead before the wind, when a spinnaker would be useful. That she can carry canvas in a good blow has been demonstrated, but, while admitting her speed, few are found who will admit that the cup is booked for a passage across the ocean.

To Our Readers. The ADVANCE will be obliged to its numerous readers if they will enable us to make reference in our local columns to matters and events in which they are interested, or may think their friends may be. This they can do by giving the information in person at the office or writing to us about it. Many things proper to be noticed in the ADVANCE's columns do not appear therein, simply because our attention is not called to them by those who would like to see reference to them in the paper, but have omitted to do their part in making them known. Come, therefore, or write and tell us your local news.

Dairy Cows at the Pan-American Exhibition. REPORT TO THE DOMINION GOVERNMENT—OF INTEREST TO DAIRYMEN. There is no other condition which the cows have to contend with which makes as much variation in the flow of milk as does that of atmospheric temperature. So long as the temperature is about the seventies the cows keep up a good, even flow of milk, but just as soon as the thermometer goes up in the eighties, down goes the milk, no matter what the feed is.
