

A TALK WITH GIRLS.

HOW TO OBTAIN BRIGHT EYES AND ROSEY CHEEKS.

Pale, Anaemic and Easily Tired Girls Often Fall a Prey to Consumption.

In young girls we look for abundant health and strength, rosy cheeks, bright eyes, firm, plump flesh and constant cheerfulness.

Mrs. Hiram Rinkler, South Pelham township, Welling County, Ont., says: "It is with pleasure that I give this tribute to the health-restoring virtues of Dr. Williams' Pink Pills."

JAWSON WAS WRONG.

Jawson, who is an inveterate yarn spinner and a bore of the first magnitude, had been retelling to his friend some harrowing story of a woman whose hair had turned grey in a single night.

"Of course I knew her," was the testy answer; "and it's not such an uncommon occurrence as you seem to imagine. I knew a man also—"

TEETHING TIME.

Is the Critical Age in the Life of All Little Ones.

During the teething period great care should be taken of baby's health. The little one suffers greatly; the gums are hard and inflamed and any disorder of the stomach or bowels increases the peevishness of the child and often fatal results follow.

Baby's Own Tablets are the surest of all remedies for the ailments of children. Among the many mothers who testify to the value of these Tablets is Mrs. R. B. Bickford, Glen Sutton, Que., who says: "My little baby suffered with teething and indigestion. I procured a box of Baby's Own Tablets and it worked wonders in baby's condition."

VENGEANCE WAS HIS.

An Irishman sued another for killing his dog. "Did you kill that dog, Murphy?" asked the judge. "I did, your honor, but I'll make him prove it."

A scourge of woe.

OR..... THE ERROR OF LADY BLUNDEN.

CHAPTER IV.

"Well, what did you think of him, Gretchen?" asked Kitty. "I thought him handsome, particularly handsome, but said," said Gretchen, a little absently.

"Quite depressing," remarks Mrs. Tremaine; "one hardly knew what to say to him, poor fellow. Really but Gretchen I don't know how I should have sustained conversation."

"You are going to propose something, Harry," says Mrs. Tremaine, with a winking eye. "And you guess what it is?" with an answering smile.

"Yes, I think we ought to invite him here; poor Mary Spencer's son is that it? You see I always knew your tongue."

"No, for the time being I shall inflict myself upon Kitty. You don't mind, do you, Kitty?"

"Oh, I understand," said Jawson, sagely; "the man would have another wife alive; it would all be discovered at the eleventh hour, and a terrible scene would ensue, and all that sort of thing."

"You're not within a mile of it, Jawson," was the unfeeling answer. "This lady I refer to married a fellow named Gray, and she, of course, became Gray as soon as the knot was tied."

"What was your dog worth, Dennis?" "I did, your honor, but I'll make him prove it." "The judge then turned to the plaintiff. "What was your dog worth, Dennis?"

BROKEN LANGUAGE.

We Understand It Much Better Than Do the Europeans.

One is astonished that the Parisian who is so much admired for his elegant and polished French, does not understand any one who speaks his language brokenly.

RIGHT SIDE WEARS OUT FIRST.

"The journals in street car trucks always wear out on the right side first," said an expert in traction mechanics the other day.

A MASTER.

"Is he a master of English?" "Yes, to judge by the liberties he takes."

FARM-FIELD AND GARDEN

SEEDING RAPE WITH OATS.

Rape is now so extensively grown here that no definite explanation need be given regarding its characteristics. But this much can be said, that it is an excellent feed for dairy cows, sheep and hogs.

A ROUND DOZEN.

Several men were holding an argument as to how many sides a round haystack contained, when one man offered to lay a wager that a round stack had four sides—viz., north, east, south, and west.

EXERCISING HORSES.

An English Army officer, writing on the care of horses, says: "Regularity of exercise is an important element in the development of the highest powers of the horse."

WHAT KILLS CLOVER.

Under ordinary conditions clover is a biennial. Sown in the spring, it lives over next winter, produces its seed the second year and then dies.

DISPOSAL OF MANURE.

The problem of how best to conserve the fertilizing materials in farmyard manure is ever before the farmer. The best and most economical suggestion is the advisability of hauling from the yard and spreading upon the land as quickly as possible to prevent destructive fermentation.

boards are loose or steps need re-nailing, or a knot hole wants closing or the mangers, feed bins, or stall partitions want fixing, have a saw, and nails and put them in your tool boards handy; take time to do it right; don't try to do it all in one day, but make a neat piece of work.

PREPARATION OF THE SOIL.

The testimony of successful farmers the world over confirms the statement that thorough preparation of the soil not only increases the yield but also insures a more active treatment of all cultivated crops.
