Miramichi Advance.

Prospective Pulp Mill Purchasers.

Messrs. Harmsworth, Mawson and Beeton who were in Chatham last Thursday and had a look over the buildings, plant and other property of the late Maritime Sulphite Fibre Company, are, as many of our readers know, in Canada for the purpose of either purchasing or establishing pulp and paper mills. It will be remembered that Mr. Mawson was here a little over a year ago and that in October last the ADVANCE made the following reference to his visit and some of its

subsequent results :-"About two months ago, Mr. G. Mawson, representing Messrs, Harmsworth, proprietors of the London (Eng.) Daily Mail and other Bitish publications, was in Chatham as stated at the time in the ADVANCE. He had come to Canada to look over the country with the object of ascertaining its probabilities as an economical source of the paper supply required by his company.

"Mesers. Harmsworth use the output of number of sulphite and mechanical process pulp mills in making the paper for the publications turned out by their different establishments, their average consumption being now stated at about 1,000 tons a week. Their capital is \$35,000,000 and they are probably the most successful and wealthy ceru in the world in their line

"Premier Tweedie met Mr. Mawson in St. John, and knowing the object of his visit to Canada and that he had been over the provinces of Ontario and Quebec, but had not come to the North Shore of New Brunswick, induced him to visit it, coming first to Chatham. Mr. Tweedie went with him to the Maritime Sulphite mill, and, through the courtesy of the agent of the Royal Trust Company, F. E. Winslow, E.q., Mr. Mawson was afforded every opportunity to examine it, to see for himself what Chatham had to offer in the way of a well and

nodernly-equ pped sulphite mill. "Mr. Mawson went from Chatham Bathurst, and other points north, with letters of introduction from Premier Tweedie to gentlemen acquainted with possible pulp mill sites and pulp wood areas, who were in a position to give him reliable information on those and connected subjects. "It is satisfactory to know that Mr.

Mawson was favorably impressed with this part of the country and particularly with the Miramichi as offering a practically inexhaustible supply of raw material for puip making and possessing advantageous conditions for the economical manufacture and "As an outcome of Mr. Mawson's visit

there seems to be a possibility of the Harms worth concern acquiring the Maritime Sulphite Fibre Company's mill and interests here, provided acceptable terms can be made to that end, as Mr. Mawson cabled Premier Tweedie from London on Monday of this week, asking him to mail full particulars of that property and its present position from a legal standpoint, as he had suggested to the Bank of Montreal the possibility of Times type. including it in Measrs. Harmsworth's paper

"Notwithstanding the financial difficulties which led to the suspension of this mill's operations, it is well known that it is one of the best and most advantageously situated in Canada. Its location where the supply of spruce is abundant and deep water facilities at its own wharf are convenient for the landing of sulphur, coal and other cargoes and the shipment of its output and its up-to-date equipment for pulp manufacture just completed when the big drop in the pulp market caused its financial breakdown, it is one of the most inviting properties available for such a substantia concern as that needing the enormous paper supply used by Mr. Mawson's company. It, therefore, remains for those controlling the mill to meet such a prospective purchaser

with terms that are not too exacting. "It is true that the property has been created at a cost of nearly \$1,300,000, but quite a large proportion of that sum was practically thrown away in experimental to more modern machinery and appliances, A loss must necessarily take place in a sale of the mill, and we have no doubt that the Bank of Montreal is prepared to make a

reasonable sacrifice. "If it should happen that, through Premier Tweedie's interest and good offices in the matter, the industry shall be again set in as that of Messrs. Harmsworth, it will be with the prospect of its assured success for the future, and something out of which not only Chatham, but the North Shore of New Brunswick generally will be substantially benefited. Mesers. Harmsworth's requirements are now equal to the pulp-making capacity of three such mills as the Maritime, and when they become convinced by practical experience of the advantages possessed by northern New Brunswick for the economical manufacture of the paper-stock they require, there is little doubt that they will avail themselves of mill sites and spruce areas of which Mr. Mawson secured information the mill. Mr. Smith only joined them FILMS, PLATES, PRINTING | when here, and establish pulp and paper | atterwards and accompanied them on Mr.

It was in consequence of Mr. Mawson's report to Messrs. Harmsworth, and Premier Tweedie's following the matter up with them when he was in Lordon in connection with the King's coronation, that last week's Harmsworth party were induced to visit the country for the purpose of determining where they would either buy or establish works for the production of a large portion, at least, of the paper they require in their business,

A representative of the ADVANCE spent some time with them here, and particularly with Mr. Harmsworth. who seemed to be very favorably imthe Miramichi-its climate, its beauties and extent as a river, its forest areas, shipping facilities, its business activities, as manifested by the numerous steam saw mills in operation; the moral and religious conditions prevailing, as evidenced by its numerous churches, educational and other public buildings, etc. His questions on all subjects, suggested by what he saw and heard, and particularly as to the character and extent of our spruce areas, were those of a most competent and interested investigator, who was here for a definite purpose, and he made no secret of the fact that he was to pursue his observations and enquiries elsewhere and, after he had seen all that was to be seen in the time at his disposal, he would be in a position to determine where it would be most advantageous to his company to invest pretty largely in a big pulp and

It is a great mistake for anybody to think that the Harmsworths are to be governed in the slightest degree in this matter by other than purely business considerations. They have all the money they need, and when they invest it it will be where they think they can do so to the best advantage to them selves. The triends of Mr. Tweedie who, in his absence, met the party did have created the idea in the minds of But we want to put all that on one side. Wilfrid Laurier first, but that's hardly Boers generally that they had only to The war is over. We each fought as well safe subject upon which to start an Engpart to them such information as they seek the reopening of negotiations in as we knew how, and now there is peace. lishman just now, for, between ourselves, sought. Mr. A. A. Anderson, of the order to have it granted and to All we want is to recognize you as fellow it's one of which we never seem to tire.

paper enterprise in Canada.

ously and facilitated their enquiries in every reasonable way, while Mayor Snowball showed them over the Snow ball mill and yards, which they wished to examine for the purpose of ascertaining what material was available for pulp or fuel from that source, and, although they did not express any views from which anyone here could say they might have decided on coming here, it seemed to all that they were by no means disappointed with either the mill, the Miramichi or New Brunswick,

as far as they had seen it. Let us all hope that it is not the last we shall see of Mr. Harmsworth and his associates and, meantime, let nobody be so foolish as to think there any politics in their visit, as some idle and imaginative persons would have us

Marconi's Success.

A despatch from Rome states that Marconi has succeeded in receiving perfect messages by his wireless telegraphic system on board of the Italian battleship, "Carlo Alberta," in Gibral tar harbor and throughout the entire course of the vessel in the open Med iterranean. The messages came from Poldhu, on the Cornwall coast across France and Spain and the Alps. The shortest distance over which the messages were received was 900 miles and the longest 1100.

Mosquito Politics.

Mr. Harold Harmsworth, Mr. Mawson and Mr. Beeton, the London gentlemer who visited Chatham last Thursday for the purpose of having a look over our idle pulp mill, with a view of possibly purchasing it, must form a not lattering opinion of the portion of press, which has endeavored to make political capital out of their presence is the province. We are quite sure that neither of the gentlemen have the slightest party interest in provincial politics, yet because Mr. I'weedie and other ct:zens who desire to see the industry referred to revived, took some interest in their visit and showed them attentions which their prominence in the business world and as gentlemen comin as strangers merited, their action is made the occasion of political scavenging which appears to be the chief object for the existence of papers of the Globe and

It is significant that for the purposes of the papers named, in promoting their common political object-that of misrepresenting everything done by Mr. Tweedie or his friends-such stalwart champious of Liberalism on the one hand and Conservatism on the other, should unite in employing one individual their Chatham correspondent, and that t should be a person without any standing in the community, and whose chief characteristic is his utter unreliability. Under date of 12th the Globe and Times published the following entitled. "Polities in Northumberland."

"A party of strangers stopped off to-day at Chatham to look over the Maritime and phite pulp mill. Mr. Fred Tweedie and Mr. D. G. Smith showed them around and saw them safely on their way to Newcastle lest some of the unfaithful should interview them. Ever since the premier's return from work and plant, which, in turn, gave place Lendon we have been expecting just such visitors on this mission. We are accustomed to the routine, but it appears to be neces

The "strangers" referred to were th

Harmsworth party. Mr. Smith was on of the citizens who called on them a their hotel, the Adams House, and wa active operation under such proprietorship prepared to show them any needed actention. He did not "show them around," for they were already provided for by others in that regard. Their coming here was solely to see the pull mill and they were in the hands of Mayor Snowball and Messrs. Fred M. Tweedie and R. A. Lawlor, the latter being solicitor for the liquidators of the Maritime Sulphite Fibre Company, and it ed much longer. was those gentlemen who took them to Newcastle, where they took the afternoon express for Bathurst. There was no politics in giving them information as t the spleudid spruce resources of the North shore, particulars as to our climate, our supply of labor, the efficiency faithfulness and good character of ou work-people, our shipping facilities and matters germane to the object of their visit, with the view of assisting then towards the conclusion which we only

hope they will arrive at, viz. to buy and operate our now idle pulp mill. We often wonder over the fact that we have in the community a little band persons whose highest aim seems to be the dwarfing of every effort made by those who are working for the development of the Miramichi and the promotion of its material interests, by attributing whatever they do to political motives. Mr. Harmsworth and his companions were not in formed of the existence of these pests for, like our black flies and mosquitoes, they vere not in the minds of their entertainers. If Mr. Harmeworth's company buy the pulp mill they will, no doubt, come in contact with them soon enough. If they have read the Globe or Times they will not entirely unprepared to meet them. the same, they cannot but be amused to learn that somebody in Chatham has such a remarkable grasp of the situation as think that a London incorporated company with a capital of millions of pounds would send one of its principals and other experts to Chatham to promote anybody's political interests. Imagine a London millionaire or two being imported to the Miramichi to brush a few local political mosquitoes off Mr. Tweedie! The Globe and Times have been long enough at the work of endeavoring to mislead people to have learned that it is a mistake. Fairdealing and truthfulness are the best all times, and alliances with disappointed political failures are to be avoided.

The Boer Generals and Their Applica cation for "Better Terms."

The magnanimous treatment of Boers by the British in arranging terms of sarrender, and of their generals and other prominent men by their late opponents that you have something to forgive, we after the declaration of peace, appear to also think we have a great deal to forgive.

selves in order to have them accorded. It shall work for the prosperity and liber:y was with this idea that the late generals of South Africa. How great that liberty of the Boer forces, Botha, DeWet and De is, and how soon complete self-government La Rey sought for and were accorded a will be extended to South Africa, depends conference with Colonial Secretary entirely on the rapidity with which the Chamberlain, which took place on 20th old animos ties die out.' ult. tual remedy.

colonial secretary asked the generals prior | co-operation of men like the generals who to the conference to subm t a list of the had loyally accepted the new situation. subjects which they desired to discuss As they wanted South Africa to be with him. They acceded, and sent in the Complete amnesty to the rebels. A yearly grant to all Boar widows and

orphans and maimed burghers. Equal rights for the English and Dutch languages in the schools and courts. That equal rights with the British be conceded to burghers complying with the terms of surrender, including the right to return to South Africa. The immediate release of all prisoners of

The reinstatement of the officials of the late South African republics, or compensation for their loss of office. Compensation for all loss occasioned by the British troops by the use, removal, burning or destruction by other means of a private property.

ownership of their farms confiscated or sold under the proclamation of Aug. 7, 1901. Compensation for the use of the properties of burghers taken by the British authorities. Payment of the lawful obligations of the late South African republics, including those incurred during the war.

The reinstatement of the burghers in the

The revision of the decision portion of the Transvaal to Natal. Granting an extension of time for the payment of all depts due by the burghers of the late governments of the South African

Mr. Chamberlain, in replying, expressed great surprise at the number and character of the proposals, pointing out that the conditions agreed on at Vereeniging Were duly accepted by the burghers and the British Government, and that they could not be reopened, nor could proposals rejected at that time be again discussed. If the interpretation of the agreement was open to question His Majesty's Government would endeavor to remove

all doubts. On the subject of amnesty to rebels, General Botha expressed disappointment that, after the promise given by Lord Kitchener, the rebels had not been granted amnesty at the time of King Edward's coronation, in reply to which Mr. Chamberlain promised that the Imperial Government would not hinder any generous intentions of the governments of Natal and Cape Colony in regard to

As to the return of buighers to South Africa, the Colonial Secretary declared it was the government's intention to retain the right to prevent the return of disloyal terms of peace, instancing Mr. R 1 z, the on pulp. former state secretary of the Transvaal, as a case in point, and saying that Mr. Reitz was using language on the Continent inconsistent with the declaration he had signed at Vereeniging.

others,' adding: 'If one man says foolish | John Wednesday evening. things, let him suffer therefor alone.

Mr. Chamberlain informed the generals that there was no truth in the report that known on this side of the water, is the government intended to sell farms Harold Harmsworth, who with other belonging to burghers. Regarding some farms sold in the Orange River Colony under the proclamation of Aug. 7. 1901. English ne spapers and periodicals. Mr, Chamberlain promised that the farms bought by the government would be retransferred to their former owners.

General Botha criticised the composition of the commission appointed to allot the grant of \$15,000,000 for the purpose of News. assisting burghers and their families to return to their homes and for re-stocking their farms, etc., and objected to national scouts serving as commissioners, but Mr. Chamberlain maintained that the govern-

Relative to the transfer to Natal of part of the Transvaal, General Botha said the burghers proposed to trek therefrom. He lived there, but he saw no chance remaining, the feeling of the British in Natal being so strongly anti-Boer.

On the subject of martial law, Mr. Chamberlain said it would not be continu-

part in a conflict in which they were not | most strongly to foreign visitors.

General Botha concluded with appeal for the widows and orphans, and said he considered that the appropriation of \$15,000,000 was inadequate.

Replying to this, Mr. Chamberlain compared G eat Britain's treatment of the Boers with the treatment of the South by

the North after the civil war in America. 'I would remind the general,' said Mr Chamberlain, 'that we have undertaken already more obligations than have ever before been undertaken under similar circumstances. To take one case in my time, I recollect very well the great civil war in America, and I appeal to that because it stands out as a case in which more than ever before, or indeed ever on pulp wood it would force the American since, the victor, the conqueror, showed a | manufacturers to come this way," said Mr. magnanimous and generous feeling to the Harmsworth. "Mr Mawson was told by conquered. There was good reason for big paper manufacturers that they conthis, because they were brothers of the sidered Canada to be the future home of same race, the same religion, the same in the paper industry, its forests had been everything. It was a civil war, but even so well preserved and the amount of in that case the Northern side, that is to spruce they contain making them indeed say, the victorious side, made no provision | veritable gold mines. There has been a whatever either by way of grants, pension | tremendous development in the or allowance to the people who had been industry of late and the consumption of wounded, to the side that had been con- paper is so great that it has doubled within quered.
