I don't ask any man to buy my appliance on a speculation. I know that it will cure these troubles and I want my pay only when the cure is complete. I don't ask you to try it one month, nor two months, but long enough to cure you, and when I have cured you you can pay me. If I fail in my task it's my loss, not yours. All you lose is your time, and if my Belt fails to cre you you will have the satisfaction of knowing that the best, strongest and finest electric body appliance in the world-one with 50,000 cures to its credit-has

failed, and that there is no cure for you in electricity. Remember, my terms are PAY WHEN CURED. Beware of concerns offering a thin piece of felt These cheap coverings are used only to disguise their bare metal blistering electrodes. They have to be soaked in water, which quickly dries and leaves them without current. My cushion electrodes are my exclusive in-

vention and cannot be imitated. If you have one of these old-style, blistering belts I will take it in trade for one of mine. I do this not that the old belt is of any use, for it is not, but to establish the value of my goods with people who have been misled by the false claims of concerns selling a cheap, worthless article. If you cannot call and test the current write for my beautiful Illustrated Book, sent sealed FREE.
