I am also convioced from acquaintance with the trade of the Maritime provinces, and the ideas prevailing among the farmers about the raising of hogs, feeding, etc., that they will have to be graqually equea ed to it. My idea is t at inst-ad of making the capital \$100. As an instance, I would mention one hat was started in Muddeton, N. S. ; the promoters put up a big ice house and tilled it with ice at a cost that would hilf build a small factory, and the result wa that while the concern could probably handle the hogs, the farmers were una le to, or unwilling to furnish hem, and the company went moo liquidation. While, no doubt, you are correct in saying that a large concern will minimize the expenses,
