To The artist took his work home to retain something that is of itself an rearrange the wind. expense adds to the expenses, and lessens the profits, and to endeavor to force the farm beyond its productive capacity without compensation in the form of manure or fertilizer increases the expenses, because the item of labor may exceed the receipts. When too many animals are retained in preference to a few choice ones, the expenses become greater, because the farmer then keeps on his hands too many nonproducing individuals. If he can purchase two cows that give only as much milk as one superior animal, he may enjoy the possession of a greater number of animals, but he has, at the same time, added to the expenses of the farm by being compelled to bestow more labor. shelter, food, and care than is necessary, in order to derive a certain product. No farmer should be content to receive from a herd or flock one-half of that which could be derived with the aid of better stock, for such a loss is a very large one and can never be recovered. Jude-

ment is also necessary in determining how to derive the most from certain soils or locations on the farm. Farmers can be found who make larger profits with poultry, and on small areas, than others with cows. This is due to the poultryman having the best breeds to be cows are incapable of giving more fault with the large majority of farmers is not that they are unwilling to reduce expenses, but that they unwisely increase them by mis
