A Handsome and Speedy Yacht.

The steam yacht, "Aria" of Bangor, Me. came into port ou Monday, having come down the St. Lawrence from Quebec via before Judge of Probates Thomson at Saguenay, etc, to make the run up the cruising, the "Aria' being the third steam guests, Dr. Everett Thornton Nealey, of Belfast, Me. Those gentlemen, as well as the officers, were very courteous in affording those who visited the vessel opportunity to inspect her, and those who did so could not but admi e her perfection in all respects.

In having the "Aria" built Mr. Blake seems to have had two principal objects in view-speed and comfort, She is not so large as some yachts that have visited our port, but is probably the most speedy of her class in the United States, and fully equal in both exterior and interior finish to any we have seen anywhere. She is a new vessel, and was built for her owner by Seabury & Co. of Morrison Heights, N.Y. The contract price was \$90,000 and about \$10,000 additional was spent in her outfitting. She is 165 ft. long, 19 feet wide and has a draught of 8 feet. On her trial trip she developed a speed of 24 miles an hour and her cruising speed is generally from 18 to 20

miles. She has nickel steel engines of the triple compounded type and surface condenser. The steam pressure is 250 lbs, vacuum 26 lbs, and developed horse power 1000. The propeller is of bronze, 7 feet diameter and its maximum revolutions 330 per minute. The shaft is of steel and of 7

The hull is double, and of steel. The outer skin might be punctured, but that would do no more than admit water ballast, as there is an inner hull for such emergencies. The decks are of white pine, rails of J. D. McKay, Esq., of Fredericton, was polished teak, minor rails of brass; cabin

Mrs. Mary Early, the mother of the late Mary Agnes Fleming, died in St. John on Saturday, aged 91 years. Two years ago | Blissfield, last Christmas Mrs Early fell on the ice in front of S . John the Baptist church, Lower Cove, and was severely injured, physically. but her mental faculties were sound until last Monday, when paralysis set in, the result of the big storm of that day. She leaves four grandchildren in New York. Fleming, who was the authoress of a number of sensational novels, died, she provided this boy with about \$1,000 a year on condition father. She left her girls similarly provided mechanica! engineer in good employment, and the head of a Christian Brothers' School who has knowledge of the situation has expressed the belief that if the father had would have been better off. Freming, who boiler manufacturer, says that the trouble between his wife and himself grew out of her looking down on him after she had won fame as an authoress. All the same, how ever, he was, in those days, what is known as a "boozologist," although he has more recently much improved in his habits.

PLAYED OUT

And Health Broke Down-A Life Saved by the Timely Use of

FERROZONE.

Mr. Karl E. Newsome of Rothesay, writes: "I owe a debt of gratitude to Ferrozone which saved my life after a severe seige of Nervous Prostration. About a year ago my health gave out completely. I was in such a weak irritable condition that I couldn't work, and found that the doctors did nothing for me but take my money. My druggist recommended Ferrozone at the best preparation for nervous troubles, so I commenced at once to take one tablet at meals. Every box of Ferrozone I took seemed to do me more good than the previous one, and it wasn't very long before I was strong enough to move around again. In three months I was completely cured, and know that I wouldn't be alize to-day if I hadn't used Ferrozone. It braced up my nerves, gave me a strong healthy constitution, and is certainly a marvellous

restorer and tonic for nervous people." The reason Ferrozone is so successful in curing nervous diseases is that it contains the very elements that are needed to restore the wasted nerve cells. It is a neurishing, strength giving tonic that costs 50c. per bex, containing three weeks' treatment. Six boxes for \$2.50. Sold by all druggists or by mail from The Ferrozone Company, Kingston, Ont. Don't fail to get Ferrozone to-day, it

a feed trough arranged in front. During The crate fattening of chickens is profitable business for almost every farmer to engage in. It is a simple undertaking that can be managed by a member of the farmer's family who is sufficiently interested and enterprising to study the work and construct the fattening cra'es. No special building is required a broad square shape, with short straight in which to place the crates. Grain on legs set well apart, fatten the most profithand, with the exception of corn or peas, when fine ground and mixed with skimmilk or buttermi k, is fed with profit to the chickens. If it is necessary to buy wheat, ground barley and low grade flour grain, fine ground oats is preferable. are meals that have been fed with profit at The cost of the food for fattening averages the staitons. The chickens are fed a mash ten cents per chicken. It is advisable to produce chickens with white-colored flesh, as white-colored flesh is more palatable than vellow flesh; it is firm, fine in grain and exceedingly tender. There are fat globules distributed throughout the flesh and under the skin. When the chicken is cooked, the particles of fat melt into and increase the juiciness of the flesh. With unfatted chickens, water takes the place of the majori y of the fat globules. When the chicken is reasted the water evaporates and leaves the meat dry. The muscles of the crate fatted chicken are more edible through lack of exercise. To kill a lean chicken is wasteful. The proportion of edible meat to bone and offal is so small.

Last year I experimented on

they should be dusted with sulphur to kill the lice. The first week the chickens should be fed the mush sparingly three times a day. All breeds of chickens, with the excepin order to accustom them to the change of tions of Leghorns, Minorcas and similar diet and the continement. After the first week the chickens should be given twice a small chickens, can be fatted in the crates day as much mash as they will consume, For one week before the chickens are killed OUR HARDY with profit. Fatted chickens can be marketed in Canada and Great Britain a small quantity of tallow should be added to the mashes to increase the juiciness of for ten to sixteen cents per pound, pluckthe flesh. Fresh water should be given in a ed weight. A great number of farmers trough twice a day and grit or gravel twice have engaged in the fattening business a week. At all the Illustration Stations the and are preparing their chickens for the chiekens are fed from the trough throughout the fattening period. The cramming machine home markets or for export. The followhas not been used for fattening chickens for ing letter was received by the Depart- two years. ment last week, showing the satisfactory results of the first year's chickens busi-DIED. ness and the encouragement offered to engage in it more extensively.

fattening crates in use at the Illustration

Stations are six feet long, sixteen inches

measurements. Each crate is divided into

three compartments. Each campartment

holds four chickens. A frame is built of one

inch by two inch lumber and covered with

slats. The slats are placed lengthwise on

three sides-bottom, back and top-and up

and down in front. The slats are one inch

wide to enable the chickens to feed from the

trough. The bottom, back and top slats are

one and a half inches apart. The top slats

are cut above each partition and three deors

light "V" feed trough, two and a half inches

inside, is placed in front of each crate and is

carried on brackets nailed on the ends of the

If only a small number of chickens are to

be fatted, packing boxes can be adapted for

the purpose. The open top of the box should

become the bottom of the crate and one side

should be removed for the front. Slats

should be nailed up and down the front;

also lengthways of the crate to form the

floor. A board should be loosened in the

top of the crate to remove the chickens, and

the fall the crates can be placed outdoors in

Plymouth Rocks, Wyandottes, or chickens
