### Salmon Protection.

An Ottawa despatch says :-"Last year the Department of Marine and Fisheries placed a steamer at the estuary of the Restigouche river to protect the salmon ascending the river to spawn, from net poachers. This year Cucumber the same protection will be given them, and another boat will be on duty at the entrance of the Miramichi river."

> That's right. But what about the action of the Department last year in re-authorising salmon nets to be set above the Nepisiguit highway bridge to intercept the ascending salmon, after the said nets had been disallowed for many years because they were endaning the fishery of that river? Is the fatal mistake to be repeated the coming season? In the interest of the salmon fishermen of the coast, who must realise that if the practice is continued many of the spawning fish will not reach the ova beds, we hope a more intelligent policy will prevail.

### Another Board of Trade Plunder.

Chatham Board of Trade, which once passed a resolution opposed to the government acquiring the Canada Eastern Railway and afterwards repented of its hasty action, has been again misled into voting against the government extending the Intercolonial to the Pacific. ### A Traitor gets his Deserts.

Col. Arthur Lynch, M. P., was found guilty of high treason last week and was sentenced to death.

Sir Edward Carson, on behalf of the prosecution, maintained that Lynch had Montreal, and Gen'l W. W. Henry, Quebec committed a most cowardly and serious act of treason, and his naturalization as a Cleghorn and L. O. Armstrong, Montreal. Boer was only a flimsy pretext

Col. Lynch is an Australian, who after a literary career in his native land and at London, removed to Paris, where he acted as a press correspondent. On the outbreak of the war in South Africa, he went to that country and fought on the side of the Boers against the British forces. During his absence on this service he was elected to the House of Commons for Galway, Ireland, and on his way to before Lord Alverstone and two other judges, the prisoner pleading not guilty to the charge of "aiding and abeting the King's and the late Queen's enemies durng the war in South Africa."

Lynch's sentence is commuted to penal servitude for life, and it is probable that will be further modified.

In reply to the statement made that the largest salmon on record had been captured in Norway, weighing tifty-two bounds, the commissioner of fisheries for Canada, Professor Prince, states that he, himself saw the capture of a specimen Bitish Columbia weighing eighty-four pounds. The largest spring salmon ever caught, however, was on the Skeena itish Columbia. It weighed a hundred and four pounds. The commissioner says that even in the eastern provinces of Canada, where the salmon do not reach to these gigantic proportions, fish have been caught as large as that which earned the Norway fisheries their recent attention

> In reporting on behalf of New Brunswick at the Thursday morning session of the Association, Fishery Commissioner Smith

I beg to say, as the only representative of New Brunswick present, that owing to unavoidable circumstances, Surveyor General Dunn, one of our vice presidents, found it impossible to be with us on this occasion, and I am sure my regret over the circumstance is shared by all who know and have been associated with him at every other meeting since our first organization in Montreal. The regret will, I feel, be conference of the provincial premiers will the greater because it is I and not he who have to report on this occasion in behalf of New Brunswick. We miss also Chief Game Commissioner Knight, the light of whose practical experience has also been helpful heretofore in our discussions.

We have no really vexed questions in our Province in regard to any failure of cooperation between ourselves and our neighbors of the State of Maine, Nova Scotia and Quebec in carrying out the laws which have been enacted for the protection of our fish and game. Whether our Maine neighbors have copied from us, or we from them, we think that, taking the conditions peculiar to our territory into consideration, we each have about the best code of game laws extaut, and only to present the resolutions, but have the efficiency with which they are enforced a heart-to-heart talk with the members is equal to that anywhere in North America. An improvement could be made in the means of carrying them out with us as well as in Maine and the Provinces of Quebec and Nova Scotia if it were possible, in the pursuit of offenders, to make the processes of the magistrates' courts cooperative on both sides of the border lines. It could, at all events, be done as regards the three

We know that our game fish are holding their own, while there is an undoubted increase of big game animals-particulariy of moose and carrbon. The sportsmen of both the United States and Great Britain are finding their way into our Province each succeeding season in larger numbers, and it is a rare thing for any hunter to fil in securing the coveted heads. If he does, it is, in nine cases out of teu, not the fault of his guide or the game he fails to bring

I heard Commissioner Thomas say yesterday that Vermont cannot compete with Maine for visiting sportsmen, Neither Vermont nor New Brunswick can hope to compete with that State in the accounts which go forth each season of the doings in its forests and on its plains and along its rivers. Sometimes we think that there are also efforts in the way of mental exercise peculiar to fishermen in which that fine old State beats us all. I may say this, however,
