Publisher's Notice

The publisher desires to urge upon the notice of all who wish to contribute matter of any kind to the ADVANCE's columnswhether it be advertising, news or notices of meetings, etc .- that the paper goes to press on Wednesday afternoons and, to ensure publication, their favors should be in the office not later than Wednesday morning.

The printing of the paper is frequently delayed by persons who hold back accounts of meetings, announcements of entertainments, etc., which they might easily send in days before that on which we go to press. but they seem to consult only their own convenience and often place them in our hands on Wednesday after the paper is made ready for press, and seem to think it a hardship because they do not appear ; and, in most cases of this kind, the contributions are really free list advertisements. We want to help every deserving organization in the community, freely, in every legitimate way, but must expect them not to delay the publication of the paper when they wish to make use of our columns. Send your matter for the ADVANCE along on Monday or Tuesday, but don't hold it back until Wednesday if you can possibly avoid doing so.

There was a good deal of discussion on the subject of the best means for increasing the stock subscriptions. It was felt that many of the people of the Miramichi-especially those convenienced by the Company's service-had failed to recognise that it was their duty to encourage the Company's enterprise by more generally subscribing stock. Director W. B. Snowball showed that the Company had no reason to take a gloomy view of its future. He showed that it was now fully equipped for an efficient service, and had good value for all its liabilities, but was paying the bank the dividend which stockholders would receive if they would only put money into the enterprise. Messrs M. S. Hockes, R. Flanagan and

W. C. Winslow were appointed a committee to solicit further stock subscriptions. Several of the directors and stockholders present said they would more than double
