## The Manufacturers Life Insurance Company.

SEVENTEENTH ANNUAL REPORT.

The seventeenth annual meeting of the shareholders and policyholders of the Manufacturers Life Insurance Company was held in the Company's offices, Toronto, on Thursday, February 4th, at 2.30 p.m. The report submitted was eminently satisfactory to all interested. A detailed report of the proceedings will be mailed to all policyholders, but we believe that the average busy reader will get a clearer conception of the progress the Company is making by having, as it were, a bird's-Below will be found the figures pertaining to the main features of the business for 1902 and 1903 and the

increases; also a comparative statement of the Company's growth since its organization. The growth made in 1903 is well shown by the following table:-

OF INTEREST TO TOTAL ABSTAINERS.

The death ratio in the Manufacturers Life has always been favorable in both sections, but exceedingly so in the Abstainers' Section. The past year shows a continuance of this favorable experience. The death losses in the General Section were 75.7% of the expectancy, and in the Abstainers' Section only 41.3% of the expectancy. The saving this year from low mortality in this section is therefore 58.7% as against a saving of 24.3°/ in the General Section, which means much larger dividends for Abstainers. Correspondence is invited.

HON. G. W. ROSS, President.

J. F. JUNKIN, Managing Director.
