The Desert Pirates.

On the 14th of March, 1878, Mr. Grattan Geary left Bombay for the Persian gulf, with the intention of traversing the sulfan's dominions, and learning | corn, but the leached ashes are too unfor himself the actual condition of ai- certain in their character to recommend fairs resulting from the Turkish system | for such use. of government, complicated by the withdrawal of Turkish garrisons from Asia various races and ranks. The chief than light soils. dangers to which he was exposed were outside the principal towns.

At Muscat, the capital of Oman. Arabia, he found a city with streets so ered over, and are thronged with Bedouins fresh from the desert. All were armed to the teeth. A favorite weapon is a straight, two-handed sword, the sweep of which would take off a man's thigh. The swordsman carried over their shoulders small, round shields of rhinoceros hide. Half a century ago a small number of the "Beni Bou Ali" were atsacked by an English officer and 350 troops, when the Bedouins rushed upon their assailants, and cut down 200 of them in the twinkle of an eye. This led to a large expedition being sent from Bombay, which succeeded in defeating the swordsmen. The British resident at Muscat has a finger very often in local insurrections, and summons a warship now and then to the aid of the imaum. or governor. Not many years ago the gunboat Teaser fired over the town at a crowd of Bedouins who had taken a position on the hills near the city, with the intention of sacking it. The Arabs said the shells had eyes, and could see where to fall, since they were out of view of the ship behind the hills. A shell fell in a field and did not explode. whereupon it was surrounded by the Bedouins, one of whom struck its percussion cap with a spear, being determined to put out its "eye," the eye enalty for this singular piece of vindictiveness. Two forts, called Jalali or the Glorious, and Mirani, the name of a Biluchee governor, protect the roadstead. At times these forts are on bad terms, and blaze away at each other across the harbor and in front of the town, to the great detriment of business. Fort Jalali not long ago fired on the town promiscuously until brought to reason by an English gunboat. Oman means security or settled peace.

Mr. Geary's adventures and observations have been issued in book-form under the title "Through Asiatic Turkey."

History on Bark.

FARM, GARDEN, AND HOUSEHOLD.

When and Where to Apply Wood Ashes.

The agricultural editor of the New York World says: Wood ashes, among the best of saline manures and also among the most economical, are coming to be more and more appreciated every year. Farmers now, as a rule, husband every pound made on the farm and buy them at a dog without hurting him? Words | whenever they can be procured at a reasonable rate. The time has gone by for English physicians say that melan- exchanging ashes from good hard wood

Leached ashes, while less valuable contain all the elements of the unleached having been deprived only of a part of their potash and soda. Ashes benefit all soils not already rich in the principles they contain, and may be drilled in with one thing he can't do; he can't button roots and grain, sown broadcast on on a new collar, just after cutting his meadows or pastures, or mixed with the muck heap.

The quantity of ashes to be applied to After a man, upon some raw and the acre depends, as does that of all fergusty night, when everything is as dark | tilizers, on the character of the soil and as the shadow of fate, has run across a crop cultivated. other material. Remarkable Array of New Fruits.

The year 1878, it appears, has been rendered memorable to American pomologists by reason of the large number of new native fruits which were originated or introduced during that time. The list of peaches especially has been greatly increased. In a paper read before the Western New York Horticultural Society by William C. Barry descriptions of thirty peach seedlings never before described were enumerated as having come to the notice of this well-known nursery- tions. He filled the stove pan with man, while many more were fruited which are not yet made known to the public. According to Mr. Barry the State of New York offers several candidates for popular favor. From the great | the seasoning," he said, and the lady hasmetropolis even come two new varieties which apparently possess many valuable qualities. In Western New York there are several seedlings which will undoubtedly prove desirable. One of licious plate of soup was prepared. The them is believed to be the largest and lady tasted it and was delighted with the earliest of all the very early peaches. Several excellent early and late varieties have originated in Ohio. Passing over was necessary to make a substantial a vast extent of country are found a meal. When he left he said he could number of new kinds in Missouri, Kansas and Nebraska. From Kansas comes he would leave that one with her as an by which it had seen its way to their the information that the whole list of evidence of how sincerely he appreciated position. Buford's Career.

The Cincinnati Enquirer devotes an article to Henry Buford, the Kentuckian who shot and killed Judge J. M. Elliott. of the Kentucky Court of Appeals, in the

streets of Frankfort. The Enquirer says: Buford's history shows him to be a man utterly regardless of law, of his own life or that of others, when his passions are aroused. Somewhere in the '50s Buford was the hero of an affray on the Lexington fair grounds, which had a great deal of notoriety at the time. He and a gentleman named Thomas, of Mt. Sterling, had quarreled, and, meeting on the fair grounds, immediately opened fire on each other. Buford displayed characteristic coolness and recklessness, changing his position once while Thomas was firing, to avoid shooting in the direction of some ladies, and at another time deliberately taking a pin from the lapel of his coat and picking the tube of his pistol, which had failed to go off. He wounded Thomas, and escaped unhurt himself. A gentleman of Lexington named Ferguson was keeping Thomas supplied with pistols. Gen. Abe Buford made at him with a bowie-knife and slashed at his throat. Ferguson ducked his head and the knife shaved his beard, taking off a good-sized piece of his chin, which fell into the posses sion of Mr. Mulligan, of Lexington, who exhibited it for some time in his store window as a curiosity. Another incident in Buford's career

happened at the time when the three colonels were editing the Times, in Louisville. Buford sent a noted belle in that city a bucket of sausage from his home near Versailles. Theodore O'Hara, author of the famous "Bivouac of the Dead," one of the three colonels, made the present a subject of ridicule in his table growth either of the three materials paper. As soon as the paper reached Versailles, Buford, taking a friend with him, got in his buggy, and by driving rapidly and taking fresh horses from time to time arrived in Louisville early in the night. Reaching the Galt House and going in, he found O'Hara at the bar taking a drink. Stepping up to him O'Hara acknowledged it, and Buford at once struck him. They struggled, clinched and fell, O'Hara underneath. O'Hara drew a pistol, and reaching his sense of humor prevailing over his wrath, he got to laughing so that he could not discharge it. They were separated before any damage was done beyond a good beating for O'Hara, and

Buford returned home. Still another, attended with worse results, was his assault on Mr. Ulysses Turner, of Woodford, a brilliant young lawyer, and at one time a member of the banking firm of Saylor, Shelby & Co., him, and beat him so brutally about the head that his life was despaired of, his health wrecked and his sight permanently destroyed. Mr. Turner died a short time ago, after years of suffering and

blindness. Buford's last violent exploit before the present murder was his defiance of the authority of the sheriff of Henry county in the earlier stages of the suit, the final decision of which was the cause of the assassination.

The Soup Stone.

A lady in the outskirts of Denver was the victim the other day of a tramp' practical joke. Even in these vagabond there is an occasional vein of humo could be permitted to cook for himself a plate of soup.

"I have the ingredients with me." h said, displaying a cobblestone about the size of an apple.

The lady very naturally looked at him in surprise. "You can't make soup out of that rock, can you?" she inquired. "Oh, yes, madam. This is what w call a soup stone."

"Well, I should like to see you do it:" and she forthwith made up a fire in the stove and the tramp commenced operawater, and after it commenced to boil. very carefully deposited the stone in a

pan in the water. "I shall have to trouble you for a littened to get him an onion, a piece of meat and a pomato. These were carefully cut up and put in to boil along with the stone. In a short time a deflavor. The fellow sat down and ate. and his hostess immediately added what get plenty of soup stones on his waya, nd cently:

a very good soup without the rock?" Gradually the trick began to dawn upon her, and if you want to make that lady mad, you have only to ask her for Touching upon the few new apples the loan of her soup stone. -Rocky Mounbrought to notice the past year, Mr. tain News.

The Milky Way.

The milky way forms the grandest feature of the firmament. It completely encircles the whole fabric of the skies. and sends its light down upon us, according to the best observations, from no less than 18,000,000 of suns. These are planted more than little understood; but their light, the medium of measurement, rethe sum of the great truths revealed to us by the two Herschels, who, with a zeal tuous as it may seem, we must be permitted to doubt this assertion, as the even the nebulæ in Orion. Nor must we fevers. forget that light, our only clew to those composes in its progress, and, coming permitted to man to behold the immensity he shall never see the bounds of crea-

FOR THE FAIR SEX.

The Dresses at the Royal Wedding. Our lady readers will thank us for giving them the following full, true and particular account of the costumes worn some of the most distinguished dames

and damsels of the British court: Wales, wore her exquisite toilette of Oriental pearl-colored brocade, richly embroidered in pearls, with ruffles of point d'Angleterre and narrow bands of sable. The train was composed of the darkest amethyst velvet, lined with richest Oriental pearl satin, bordered in narrow sable; a smaller train of matchless point d'Angleterre entirely covering the center, was fastened on by large medallions of pearls. The corsage was profusely studded with pearls and diamonds. Her royal highness wore a tiara of diamonds, white ostrich feathers and a long tulle veil, and necklace of rows of pearls and diamonds.

Louise, Victoria and Maud of Wales, were attired in dresses of Oriental pearl- give it up at once and go your way.'

feathers and diamond necklace.

magnificent dress of gold and silver bro- ter's property. cade, mixed with a new shade of Scabience velvet, and finest point de Venise. The corsage was trimmed with matchless rubies and diamonds, which blended beautifully with the new shade of velvet. and inquiring as to his authorship, Her grace wore a tiara of diamonds, white ostrich feathers and gold and sil-

The Marchioness of Salisbury wore a myosotis and leaves; the jupe was composed of the darkest reseda velvet draped in brocade, with festoons of myosotis satin. The corsage was of velvet, with a Louis XV. waistcoat of brocade and beautiful diamond ornaments; the headdress a tiara of diamonds, white plumes

The Marchioness of Conyngham wore a lovely toilette of mauve satin and costly antique lace, the skirt strewed with branches of natural mauve and white lilacs. Her ladyship also wore a tiara of diamonds, white feathers with veil, and branches of lilacs.

The Viscountess Cranbrook wore a dress of Russian gray satin duchesse, draped with guipure lace and velvet of the same rich shade. Headdress, diamonds, plumes and lappets.

What Iowa Girls are Taught. At the Iowa Agricultural College every

girl in the junior class has learned how to make good bread, weighing and measuring their ingredients, mixing, kneading and baking, and regulating her fire. Each has also been taught to make yeast and bake biscuit, puddings, pies and cake of various kinds; how to cook a roast, broil a steak and make a fragrant cup of coffee; how to stuff and roast a turkey, make oyster soup, prepare stock for other soups, steam and mash potatoes so that they will melt in the mouth, and, in short, to get up a first-class meal, combining both substantial and fancy dishes, in good style. Theory and manual skill have gone hand in hand. Vast stores of learning have been accumulated in the arts of canning, preserving and pickling fruits, and they have taken practical lessons in all the details of household management, such as house-furnishing, care of beds and bedding, washing and ironing, care of the sick, care of children, etc. The girls, we are informed, are also thoroughly grounded in science, mathematics and English literature; but this is of siight moment compared with the foregoing catalogue of virtues. If there is anything that challenges the unlimited respect and devotion of the masculine mind it is ability in woman to order well her own household. Each one of these charming Iowa girls, it is safe to say, will marry within six weeks after graduation.—St. Paul Pioneer Press.

Automatic Machinery.

An extraordinary statement in regard to the introduction of automatic machinery into some factories not far from Low Moor, near Bradford, England, has appeared in the Warehouseman and Drapers' Trade Journal. The writer says "We have visited the Oak mills by night, in company with Mr. Burns and a friend.
The building itself was in darkness, but

In company with Mr. Burns and a friend.
The building itself was in darkness, but we could hear the rumble of machinery as we approached. The door was unlocked and couple of candles were lighted. By the dim light we saw the maproducing. There was no possibility of deception, and no room for doubt. We The SECRET of MAKING ARTIFICIAL HONEY were not there to examine the construct tion of the machinery; it was sufficient to be able to verify the main fact—which is that when the working hours of the mills are over, the lights are put out, the building is locked up and the machines are left working all through the night, producing large quantities of beautiful articles in great variety of patterns in silk, cotton and wool." The method by which this result has been attained remains a secret. The only night attendant at the factory appears to be an engineer, inasmuch as the engine and boiler cannot be left to themselves,
