**In the Probate Court**  
**Of Queens County.**

To the Sheriff of the County of Queens or any Constable within the said County,  
 GREETING:  
 Whereas Robert F. Davis, a creditor of Henry J. DuVernet, late of the Parish of Gagetown, in the County of Queens, Farmer, deceased, hath filed a Petition in the said Court praying that Letters of Administration of the estate and effects of the said Henry J. DuVernet should be granted to him.

You are therefore required to cite the heirs next of kin, creditors and all others interested to appear before me at a Court of Probate to be held at my office, in Gagetown, within and for said County of Queens, on SATURDAY, THE FIFTEENTH DAY OF APRIL, next, at two o'clock in the afternoon, to show cause if any they have why Letters of Administration of the said estate and effects should not be granted to the said Robert F. Davis as prayed for.

Given under my hand and the seal of the said Court, this twenty-fifth day of February, A. D. 1899.  
 A. W. EBBETT,  
 Judge of Probate in and for the County of Queens.  
 JOHN W. DICKIE,  
 Registrar of Probates.  
 JOHN R. DUNN,  
 Proctor for Petitioner.

**Probate Court.**  
 County of Queens Province of New Brunswick.

To the Sheriff of the County of Queens or any Constable of the said County, Greeting:  
 Whereas Ruth J. Hopewell of the Parish of Gagetown in the County of Queens, has prayed that letters of administration of the estate and effects of Lucy Ann Hopewell, late of the Parish of Hampstead, in Queens County, deceased, may be granted to her.

You are therefore required to cite the heirs and next of kin of the said Lucy Ann Hopewell, deceased, and all others whom it may concern, to appear before me at a Court of Probate, to be held at my office, in the Parish of Gagetown, in the said County of Queens, on WEDNESDAY, THE FIRST DAY OF MARCH NEXT, at ten o'clock in the forenoon, to show cause if any they have why Letters of Administration should not be granted to the said Ruth J. Hopewell as prayed for.

Given under my hand and the seal of the said Probate Court, this thirty-first day of December, A. D. 1898.  
 [Signed] A. W. EBBETT,  
 Judge of Probate in and for Queens County.  
 [Signed] JOHN W. DICKIE,  
 Registrar of Probates.

**In the Probate Court**  
**Of Queens County,**

To the Sheriff of the County of Queens or any Constable within the said County,  
 GREETING:  
 Whereas Charles W. White and Laughlan P. Ferris, Executors of the last Will and Testament of Samuel V. White, late of the Parish of Cambridge, in the County of Queens, farmer have filed an account of their administration of said estate and hath prayed that the same may be passed and allowed. You are therefore required to cite the heirs next of kin, and all others interested to appear before me at a Court of Probate to be held at the office of the Judge of Probate within and for the said County of Queens, at Gagetown, on SATURDAY, THE 25TH DAY OF MARCH next, at ten o'clock in the forenoon to show cause if any they have why said accounts should not be passed and allowed as prayed for.

Given under my hand and the Seal of the said Court this 23rd day of January A. D. 1899.  
 A. W. EBBETT,  
 Judge of Probate in and for Queens County.

**COOK'S NEW BLOOD PILLS.**  
 Turnips are a valuable winter food for sheep and cattle, particularly the former. When fed to milk cows give just after milking, otherwise the milk may be given an unpleasant odor, and the butter an undesirable taint.  
 Three good meals a day are needed for growing children.

**FATTENING EARLY.**

This Plan's Advantages Considered and Pointed Out.  
 In nearly all cases it will pay to push the growth of all of the pigs now, so as to be able to fatten them early.  
 After cool weather sets in to fail is rather the most favorable time to secure a rapid gain at a low cost.  
 With care to keep the stock in good, thrifty condition now, it will be much easier to fatten rapidly. The principal advantage in this is that it affords a better opportunity of taking advantage of the market. To a very considerable extent the cost of production is the same and any difference in the price means that much difference in the profit.

So far as can be done conveniently, it is best to give hogs the range of a good pasture. Even in winter this will be better than to confine them closely, as they will pick up more or less of a variety of food, and the exercise they will take is always beneficial. At the same time it will be good economy to provide dry, comfortable quarters for them to feed, rest and sleep under. This place should be provided with a light feeding floor from which to feed grain and with troughs for supplying slops and water. A dry earth floor is best for the sleeping quarters and to insure being dry it is a good plan to fill with dry soil until the inside is five or six inches higher than the outside. There should be room enough on the feeding floor and at the trough so that each animal can readily secure its share of feed, slops and water. Keep the quarters clean, washing out the feed troughs, sweeping the feeding floors and changing the bedding as often as necessary. This is essential if the best health is maintained.

It is best, as cool weather comes on, gradually to increase the ration until they are given all that they will eat clean at each feeding. It is in waste to give more than they can consume, and overfeeding both add to the cost without increasing the gain, and care should always be taken to avoid either extreme.

**The Right Milker.**  
 A herd of good dairy cows deserves to have good care, and this care only be secured by having the right kind of attendants. If the owner is unable to either attend the cows himself or give the matter personal supervision twice a day or more, it is to his interest and profit to be certain that his employees are trustworthy and that the milking system and regularity—stable cleaning, grooming, exercise, watering, feeding, milking—a fixed time for everything, and everything at its appointed time.  
 Nothing has been produced which begins to compare with the human hand as a milking machine. Cleanliness and regularity are the first requisites in good milking. Next, quiet and gentleness should be accompanied by quickness. Two milkers, one rapid and one slow (the cow being accustomed to both), will get about the same quantity of milk in any given number of days, but the former will get the more fat. The quicker the milking the richer the milk, if the work is done well and completely; the difference may not be great, but it is measurable in butter or cream. Again, two milking like quantities in 30 minutes, from the same cows or animals giving milk usually just alike, will get different results as to richness, and if they change places the richer milk is secured by the same man. The milk that is not taken from the cow comes from him, but it is the expert milker that gets the most of it.

**Potatoes for Eggs.**  
 A mess of two-thirds boiled potatoes and one third meal and bran is recommended as a good food for laying hens in France and Germany. One man says: Owing to the immense quantity of potatoes raised last year and the cheapness at which they could be bought, we thought it advisable to try the use of them as a steady diet for fowls. We have been warmly advocated as a one-week ration with good results, but did not know what the result would be if fed daily. Some thought it would be a failure; we were told there was too much starch in potatoes for a steady diet and that the continual feeding of same would result in cholera; but determined to try it, we did. The day before they were wanted to feed, were placed in a kettle on the stove and there allowed to cook and boil until they were soft and mealy. In the morning they were again placed on the stove and heated thoroughly through. They were then mashed and enough water left in to make the mess very thin. It was then thickened with meal and bran until of the right texture, making about two-thirds potatoes and one-third meal and bran. The fowls were perfectly satisfied with it, and other food would hardly be touched if given all they wanted of the potatoes. A good big feed of this in the morning sufficed for the day, but they were also given a light feed of grain at night. The diet was kept up all winter and now no heavier weighing lot of birds of the same breed can be found in any man's yard.

**White Specks in Butter.**  
 Mottles in butter and "white specks" are sometimes confounded, and by some are considered the same, but there is a difference. Mottled or streaky butter has been explained as being caused by an unequal distribution of the salt; but "white specks" have a different cause or causes. Sometimes, when the milk is set in shallow pans, they result from the cream drying on top, so there are small portions that are hard they do not churn into butter, and the "specks" are thus caused. This may be remedied by carefully straining the cream when it is put into the churn.  
 Another cause of "white specks" is this: When some milk is skimmed off with the cream, as is usually done in the case of deep cold-setting, this milk settles to the bottom, gets over-ripe, and forms a curd, which will be so hard as not to break up in churning and will not run off with the buttermilk, but will remain with the butter as "white specks," as they are sometimes called. This can be remedied by not letting the cream stand so long before churning, or by frequent and thorough stirring of the cream during the process of ripening. These hard, white particles can also be taken out by straining the cream.

**Turnips for Sheep.**  
 Turnips are a valuable winter food for sheep and cattle, particularly the former. When fed to milk cows give just after milking, otherwise the milk may be given an unpleasant odor, and the butter an undesirable taint.  
 Three good meals a day are needed for growing children.

**COOK'S SURE COUGH CURE.**  
 The early morning of Thursday, the last day of January, was clear and still. The heavy snowstorm of the day before had ceased during the night, leaving a new layer, a foot in depth, upon that which already lay deep over mountain and lake, and pling itself high upon every branch and twig of the dense forest about us, writes C. Grant La Farge, in the Atlantic. I had awakened at 3, still conscious of the effects of yesterday's long tramp of eight hours following fresh caribou tracks through heavy timber and in deep, soft snow, only to find that the waning day had us strike out for camp for the further route of our game was still to be disentangled from a labyrinth of tracks, made where they had stopped to feed. We had eaten our lunch as we marched, delay being a thing to avoid and fire out of the question on so fresh a trail, and when we reached camp again, just as darkness closed in, we were a tired and hungry pair. So it was with difficulty now that I summoned up resolution to perform the duty of which the biting cold upon my face and the snapping of the log walls of our camp appalled me, and resisted the insidious argument that I really was not awake. To leave the snug shelter of warm blankets in order to rake together a few almost extinct embers, nurse them into a glow and pile the stove full of wood is not an alluring task at such a time, but campfire etiquette, sometimes relaxed in the milder autumn season, must be rigidly adhered to, even indoors, in these long, frigid winter nights. Therefore my companion and I had made the usual agreement that he who awoke should forthwith replenish the fire, and as his deep breathing was now proof that nothing was to be expected of him I conquered my slothful disinclination and a roaring blaze at last rewarded my efforts. I opened the door upon such a night as only the northern winter can show.

Silence, absolute and supreme; the rich purple-black of the sky revealing its immeasurable depth, in which hung, clear and round and at many distances, the myriad stars which filled it; in the north the great pale arc of the aurora reflected faintly on the white snow lying over the open spaces of the river in front of us. But the keen air allowed little time for more than a swift glance, then a match lighted showed the mercury at 18 degrees below zero—not extreme, but cold enough to make blankets desirable; so I got back into them without further delay and fell asleep.

**A Home Kindergarten.**  
 Every house that has one or more little children should own, if possible, one of the low tables and several of the small, low chairs that are used in the kindergarten. If there is no regular nursery the tables may be kept in one corner of the living room, as they provide a most convenient place for the work and games of children, a place to rest their books when reading, and because they are their own special property give great satisfaction in many ways. Another piece of furniture that helps the children to keep an orderly nursery is a "window seat"—that is, a large, long box with a hinged top, where their toys may be placed when they are through using them. In one nursery, where there are three children, each one has her own special treasure chest placed under a window and her own low shelf for books.

**Exploring Australia.**  
 In June last an expedition started with the object of exploring central Australia, says the Detroit News. It is not generally known that there is an unexplored region in that island continent six times the size of England. The great difficulty of pushing into this terra incognita has always been its waterless character. The new expedition, under the command of Mr. L. A. Wells, is provided with camels and equipped with all necessities.  
**Height at Which Meteors Burn.**  
 It is supposed that meteors begin to burn when they are within about 125 miles of the earth, and the combustion is completed as they disappear from 35 to 50 miles above the earth. When we see a falling star, therefore, we may consider that we have watched it through a flight of about 100 miles before it finally burns out and disappears from view.  
**Vesuvius in an Active State Again.**  
 Vesuvius is officially reported to be in an unusually active condition; lava issues copiously from the largest crater of the volcano, filling completely the Atrio del Cavallo, and running some hundreds of meters down the north-west side of the mountain, seriously threatening the observatory.  
**An Ancient Hog.**  
 The fossil remains of a hog have been recently discovered in the "bad lands" by an expedition led by Professor J. E. Todd, State Geologist of South Dakota, and are said to prove that the animal must have been as large as a medium-sized elephant.  
**His Profession.**  
 "Does the gentleman you just saluted as 'professor' occupy a chair in one of our colleges?"  
 "No; he's a chiropodist."

**CAMPING OUT IN WINTER.**

The Rare Pleasure of Tening in the Ice and Snow

The early morning of Thursday, the last day of January, was clear and still. The heavy snowstorm of the day before had ceased during the night, leaving a new layer, a foot in depth, upon that which already lay deep over mountain and lake, and pling itself high upon every branch and twig of the dense forest about us, writes C. Grant La Farge, in the Atlantic. I had awakened at 3, still conscious of the effects of yesterday's long tramp of eight hours following fresh caribou tracks through heavy timber and in deep, soft snow, only to find that the waning day had us strike out for camp for the further route of our game was still to be disentangled from a labyrinth of tracks, made where they had stopped to feed. We had eaten our lunch as we marched, delay being a thing to avoid and fire out of the question on so fresh a trail, and when we reached camp again, just as darkness closed in, we were a tired and hungry pair. So it was with difficulty now that I summoned up resolution to perform the duty of which the biting cold upon my face and the snapping of the log walls of our camp appalled me, and resisted the insidious argument that I really was not awake. To leave the snug shelter of warm blankets in order to rake together a few almost extinct embers, nurse them into a glow and pile the stove full of wood is not an alluring task at such a time, but campfire etiquette, sometimes relaxed in the milder autumn season, must be rigidly adhered to, even indoors, in these long, frigid winter nights. Therefore my companion and I had made the usual agreement that he who awoke should forthwith replenish the fire, and as his deep breathing was now proof that nothing was to be expected of him I conquered my slothful disinclination and a roaring blaze at last rewarded my efforts. I opened the door upon such a night as only the northern winter can show.

Silence, absolute and supreme; the rich purple-black of the sky revealing its immeasurable depth, in which hung, clear and round and at many distances, the myriad stars which filled it; in the north the great pale arc of the aurora reflected faintly on the white snow lying over the open spaces of the river in front of us. But the keen air allowed little time for more than a swift glance, then a match lighted showed the mercury at 18 degrees below zero—not extreme, but cold enough to make blankets desirable; so I got back into them without further delay and fell asleep.

**Farming in the Maritime Provinces**

Differs materially from farming in Ontario and the West. Conditions are different and our markets not the same. A product profitable in those sections would not pay the tillage here, and a suggestion valuable to a westerner, would prove disastrous if followed by our farmers. In subscribing for an agricultural publication it is well to bear this in mind. There's only one paper that treats of farming from a Maritime Province standpoint. It is the

GAGETOWN, JULY 2TH, 1897  
 E. G. SCOVIL, Agent Pelee Wine Co.,  
 Dear Sir:—My wife has been afflicted with nervous prostration for several years, using every kind of medicine recommended, but obtaining no relief until I procured some of your Pelee Wine, which I am delighted to say, has had the desired effect. It is the greatest tonic of the age, I think too much cannot be said in its praise and no house should be without it. We have recommended it to several suffering from a gripe debility, with like good results.  
 I am, yours gratefully,  
 JOHN C. CLOWS.
