You'll Have to Avoid the Saloon.

LAURA C. GIBBONS, IN UNION SIGNAL.

You stand on the threshold of youth, boys,
Your future lies out in the years;
You're learning your parts for life's work, boys,

You're planning your future careers.
You'll have to fill places of trust, boys,
Your fathers will pass away soon;
And if you'd be trustworthy men, boys,
You'll have to avoid the saloon.

If you would be honored in life, boys;
If joy and contentment you'd know;
If you would have plenty of cash, boys,
And bask in Prosperity's glow;
If you would enjoy robust health, boys,
That priceless but much abused boon;
If God's benediction you'd have, boys,
You'll have to avoid the saloon.

You'll have to avoid the saloon, boys,
Or sorrow and shame you will share.
And Poverty's crust you will eat, boys,
And Poverty's rags you will wear.
Your future will end in disgrace, boys,
Your life be cut off at its noon,
Both body and soul will be lost, boys,
Unless you avoid the saloon.

As You Will.

Do you wish for kindness? be kind;
Do you ask for truth? be true;
What you give of yourself, you find;
Your world is a reflex of you.

For life is a mirror. You smile,
And a smile is your sure return.
Bear hate in your heart, and erewhile
All the world with hatred will burn.

Set love against love. Every deed
Shall, armed as a fate, recoil;
You shall gather the fruit from the seed
That you cast yourself in the soil.

Like answers to like. No power
Can free from the force of the law
That fashions the perfect flower
From the definite germ. No flaw

In the mould but will reappear
In the finished cast, to your shame;
Each kindling of anger or fear
Will wrap your best deed with its flame.

Each act is a separate link
In the chain of your weal or your woe;
Cups you offer another to drink,
The taste of your dregs you shall know.

Look without. What you are, doubt it not
You will see, you will feel in another
Be your charity staidless of blot,
And how loving the heart of your brother!

—Western Advocate.

As You Go Through Life.

Don't look for flaws as you go through life
And even when you find them
It is wise and kind to be somewhat blind,
And look for virtue behind them;
For the cloudiest night has a hint of light
Somewhere in its shadows hiding;
It is better by far to hunt for a star
Than the spots on the sun abiding.

The current of life runs either way
To the bottom of God's great ocean;
Don't set your force 'gainst the river's course
And think to alter its motion.
Don't waste a curse on the universe—
Remember it lived before you;
Don't butt at the storm with your punny
form,
But bend and let it go o'er you.

The world will never adjust itself
To suit your whims to the letter,
Some things must go wrong your whole life
long—
And the sooner you know it the better,
It is folly to fight the Infinite
And go under at last in the wrestle;
The wisest man shapes into God's plan,
As the water shapes into a vessel.

Give me Drink!

McLeod, an English writer, puts the following language into the mouth of those who thirst for rum: "There's my money—give me drink! There is my clothing and food—give me drink! There's the clothing, food and fire of my children—give me drink! There's the education of the family and peace of the house—give me drink! There's the money I have robbed from the school master and innumerable articles I have robbed from the storekeeper—give me drink! Pour me out a drink for more will I pay for it. There's my health of body and peace of mind—there's my character as a man and my profession as a Christian—I will give up all—give me drink! More yet have I to give. There is my heavenly inheritance, the everlasting friendship of the redeemed—there is all my hope of salvation. I give up my Saviour. I give up my God! I resign all! All that is good, great and glorious in the universe I resign forever that I may get drunk!"

San Francisco has 4,500 saloons or places where liquor is sold at retail.

In Ireland the number of arrests for drunkenness steadily increase. In 1887 there were 87,000 arrests for that cause. In 1888 the number reaches 89,000 and in 1889 climbs up to 92,000.

Household Hints.

The Uses of the Lemon.

Lemonade from the juice of the lemon is one of the best and safest drinks for any person. It is suitable for all stomach diseases, gravel, liver complaint, inflammation of the bowels and fevers. It is a specific against worms and skin complaint. Lemon juice is the best antiscorbutic remedy known. It not only cures the disease, but prevents it. Sailors make daily use of it for this purpose. I advise everyone to rub their gums with lemon juice to keep them in good condition.

The hands and face are kept clean, white, soft and supple by the daily use of lemon instead of soap. It also prevents chilblains.

Lemon is used in intermittent fevers, mixed with strong, hot, black coffee, without sugar; neuralgia may also be cured by rubbing the part affected with cut lemon. It is valuable also to cure warts, and dandruff on the head, by rubbing the roots of the hair. It will alleviate and finally cure coughs and colds, and heal diseased lungs, if taken hot on going to bed at night.

Its uses are manifold, and the more we employ it internally and externally, the better we find ourselves. Lemon juice is useful in removing tartar from the teeth, and is anti febrile. A doctor in Rome is trying it experimentally in malarial fever with great success, and thinks it will in time supersede quinine.

How to Use Onions.

This excellent and valuable, but often times despised, vegetable may frequently be used as a household remedy in cases of sickness. For coughs, colds and hoarseness, peel and cut in very thin slices sufficient onions to fill a glass tumbler, scatter a little fine sugar on each slice, cover the top of the tumbler, and set on the stove-heat or in any warm place. There will soon be a thick syrup formed, of which a tablespoonful should be taken every half hour. The syrup is also good for children who are croupy. If you have a cold on the chest or lungs, and feel a pressure or tightness there, apply an onion poultice. Either roast or boil the onions soft in a small quantity of water, mash fine, add hen's or goose oil, or lard in small quantity, put in bag, apply to the affected spot and keep warm.

Onions are said to be excellent as a soporific. One way to use them to eat one or two just before retiring; or, to a good handful of dried lettuce leaves add two sliced onions and a pint of boiling water, boil over a brisk fire until there is but a half-pint of liquid, of which take an ounce, repeating the dose if necessary. It is said that onions given to children two or three times a week will prevent worms, and their use is certainly conducive to a good complexion. As a remedy for several internal disorders the taking of lemon-juice and the free use of the raw vegetable is recommended. As a medicine onions are certainly frequently efficacious and always harmless; as a flavor for soups, dressing, etc., they are much liked by most people, consequently I should advise all housekeepers to lay in a good stock of them.

Inexpensive Cookery.

The following rules are not recommended as novelties, but as old acquaintances tried and true.

LEMON CREAM PIE.—Grated rind and juice of one lemon, butter size of an egg, one egg, one cup of sugar, one tablespoonful of corn starch; wet with a cup of boiling water. This will make two good sized pies. Bake with or without top crust.

PLAIN CAKE.—One cup of milk, one cup of water, one cup of sugar, two cups of sifted flour, two teaspoonfuls of baking powder, one tablespoonful of butter, one egg. Cream the butter and sugar, sift the baking powder with the sifted flour and beat the egg to a foam. This is the foundation of several kinds of cake, various flavorings and fruit may be added at will, and it may be baked in a variety of forms.

WHIPPED CREAM PIE.—Line a deep pie tin with a moderately rich crust. Bake in a quick oven, then spread it with any soft jam or jelly, and on this pour a teaspoonful of cream beaten or whipped to a stiff foam, then sweeten and flavor to taste. The cream will beat more easily if very cold at first.

MOLASSES GINGERBREAD.—Two thirds of a cupful of butter, two-thirds of a cupful of sugar, two-thirds of a cupful of molasses, two cupfuls and a half of flour, one cupful of milk, one egg, one heaping teaspoonful of soda (just rounded over, but not as full as one can take it up), one even teaspoonful of cream tartar, one tablespoonful of vinegar, one tablespoonful of ginger. Beat the egg until very light; add the sugar, the softened butter, being careful not to melt it, and the molasses, beating well after each addition. Mix the soda and milk and add to the mixture. Mix the flour, cream of tartar, and ginger, and pour the mixture over it. Beat well and add the vinegar last. The gingerbread must be baked at once.

LAND OF PERPETUAL FIRE.

Strange and Interesting Features of Terra del Fuego.

"The most interesting and strangest people in the world who ever came under my notice are the natives inhabiting the great island of Terra del Fuego," said Capt. Terrenby Jameson of the British army when at the Palmer House yesterday. The Captain's regiment is stationed at India, but the soldier is away on a three months' furlough. He is returning home from a trip through South America.

"The island, which is situated at the southern end of the continent, is called the 'Land of Fire,' because of the fires which the natives never permit to go out," continued Capt. Jameson. "In every hut or hole in the ground along the coast where the natives live a fire is kept perpetually burning, and on a calm day, when viewed from the ocean, hundreds of streaks of smoke can be seen circling toward the sky. The fires are kept burning, some say, on account of a strange religious belief of the Fuegians, as the natives are called, but the real reason, I think, is because they have no way of making fire if the blaze becomes extinguished. It is supposed the fire was originally brought from a volcano in the Cordilleras centuries ago."

"The Fuegians are the most brutal tribe in the world, and are as fierce and savage as tigers. They have no forehead to speak of, their hair growing down to their eyes. They are large people, and no other tribe ventures too close to their territory. They live like beasts, however, always eating everything raw. Their chief diet is the fish that are washed up on the beach during the storms, and frequently they secure the carcass of a whale that becomes stranded on the beach. The bodies of sailors also furnish them with food. Shipwrecks are frequent along the coast there, for some of the most severe hurricanes pass over that part of the country."

"The fires the Fuegians keep burning are used for warmth. The climate is quite cold, but the natives are thinly clad, the only garment used being a cloak of some kind of skin. This they always wear over the shoulder on the windward side. But even this they will sell for a cheap ornament or a choice piece of food. When I was there I saw a Fuegian woman sell a sailor the cloak off her back for a string of beads, and she walked away in a snow storm in a nude condition, content with her bargain."

"I visited the country with a party of miners from the Argentine Republic, who were there prospecting under the protection of Government troops. It was necessary to kill fifty or sixty natives in order to protect the prospectors, but the strange people could not be subdued."

"The island is claimed by both Chili and the Argentine Republic, and I suppose it will be necessary some day for the latter nation to kill off a few thousand Chilians in order to settle the dispute." — Chicago Tribune.

Twenty Pound Salmon for a Cent Apiece.

The present wonderful run of salmon has so glutted the market that for some time these silver-sided beauties have been selling at five cents apiece, but the price took a tumble yesterday and several fishermen sold a boat load of fine salmon, weighing about twenty pounds each, at the pitiful price of one cent apiece. One cent for a twenty pound silver salmon, the finest quality of that excellent fish, is the lowest price perhaps that a food fish ever sold for in this or any other country, but salmon are so plentiful that people do not know what to do with them.

It is estimated that enough fish could be taken here in one day to fill 1,000 barrels. Fishermen say they can make big money by selling salmon at a cent apiece to the canneries if they will only buy all they can catch. One man caught fourteen with a grill hook attached to a hoe handle yesterday, and another man claims to have found them in such numbers in shallow water in the Dungeness that he threw them out with a pitchfork and soon got fish enough to last for a month. — Port Townsend Leader.

Already a Giant and Still Growing.

Allegany can boast of perhaps one of the largest boys of his age to be found in the State. His name is William W. Wittig, and he resides with his parents in Frostburg. He is a little over 16 years and eight months old. For the past two years he has been growing at the rate of one-half an inch per month. His height is six feet 4 1/2 inches and he weighs 183 pounds. He wears a No. 7 1/2 hat and No. 11 shoe. His hand measures 13 1/2 inches around the knuckles when closed. His chest measure is 44, and his waist 41 inches. He has always enjoyed excellent health, and possesses an appetite which would alarm most people, as it calls for about what would satisfy three ordinary laboring men at each meal. He lifts 350 pounds with ease. The young giant is still growing. — Baltimore Sun.

Passing Events.

The Czar of Russia is reported to have presented the Stanford University, in California, with a complete collection of Russian and Siberian materials.

The returns of the pensioned veterans who fought under the great Napoleon, who now receive \$50 a year, put their number at 112, instead of 180 as in 1888.

The Farmers' Alliance victory in Kentucky recently, is expected to cause an influx of membership in numerous parts of the country.

A woman 71 years old, and many times a grandmother, has begun a breach of promise suit in New York. The defendant is just one year her junior.

Generosity is a natural trait of the Chilians, and the American tramps who drift into Santiago are reputed to make from \$10 to \$20 a day by begging at the doors of the wealthy.

It keeps three large Chicago factories busy to manufacture the locomotive headlights and railroad lanterns that are used in this country. The factories give employment to 1,100 men and boys.

It is said that in Munich, which consumes more beer than any other German city, the family allowance of the amber fluid amounts to 566 quarts a year for every man, woman and child.

A Pittsburg man has designed a pleasure boat to be made of aluminum. It will have a screw propeller, and although it will carry six persons, it will not weigh more than 70 pounds.

It is reported that a nugget of gold in one mass weighing 35 pounds has recently been found in the newly-explored gold district in British Guiana, and has been sent to England as a specimen of the auriferous deposits in that country.
