The essential object of this treatisee is to point out the fearful consequences resulting from certain habits, irregularities and excesses, which have produced more misery in Youth, degradation in Manhood, and premature de- Doeskins, Satinetts. cay at all stages of Life, than, perhaps, any other class of disease known to modern pathologists. Its perusal is particularly recommended to persons entertaining secret doubts of their physical condition, and who are conscious of having hazarded the health, happiness, and privileges to which every human being is entitled.

It is absolutely necessary that all menshould know that there are principles of personal management which cannot be violated without incurring grievous penalties, and when wisdom and regret succeed the heydey of inconsiderate self-indulgence, how these penaltles may be mitigated now the sting of their bitterness may be removed, w the evil and its consequences may be avoided, , above all, that there is scarcely any degree of physical infirmity on functional derangement to which the

timely aid of science cannot apply a cure. The work may be had in St. John, N. B., of Massrs. H. Jan. 26, '55. Chubb & Co. Price 2s stg.
