SENTINEL. THE CARLETON

Charles Mackay in a Slave-Pen. The following is from a recent letter of Charles Mackay to the London Illustrated News On my first arrival at New Orleans, I lingered for a few moments at the open door of a slave depot, without daring to go in, lest I should be sus pected of espionage or mere curiosity, and expelled. But seeing among the company an eminent merchant of New York, whose friendship I had been fortunate enough to make, and whom I knew to be no slave dealer or supporter of slavery. I walked in and joined his party, drawn thither like myself by curiosity: On one side of the room the male slaves, with clean linen and shining new hats and boots, were arranged; and on the other the females were disposed in their best attire, most of them exceedingly neat, but some bedizened with ribbons, of colors more flaring and tawdry than elegant or appropriate. I was immediately beset with entrea- tion Pewders, Dadd's Urine Powders, Dadd's Healing ties to purchase.

The following remedies are offered to the public as the treating Spermatorrhea, Nervous Debility, best, most perfect, which medical science can afford. AYER S CATHARTIC PILLS have been prepared with the utmost skill which the medical profession of this age pos-sesses, and their effects show they have virtues which surpass any combination of medicines hitherto known. Other medicines do more or less good ; but this cures such dangerous complaints, so quick and so surely, as to prove an efficacy and a power to uproot disease beyond anything which men have known before. By removing the obstructions of the internal organs, and stimulating them into healthy action, they renovate the fountains of life and vigor .- health courses anew through the body, and the sick man is well again. They are adapted to disease, and disease only; for when taken by one in health they produce but little effect. This is the perfection of medicine. It is antagonistic to disease, and no more. Tender children may take them with impunity ;-if they are sick, they will cure them ; if they are well, they will do them no harm.
