NEW-YEAR'S HYMN. Ring out, wild bells, to the wild sky, The flying cloud, the frosty light: The year is dying in the night; Ring out, wild bells, and let him die.

Ring out the old, ring in the new, Ring, happy bells, across the snow: The year is going-let him go; Ring out the false, ring in the true.

Ring out the grief that saps the mind, For those that here we see no more; Ring out the feud of rich and poor, Ring in redress to all mankind. Ring out a slowly-dying cause,

And ancient forms of party strife; Ring in the nebler modes of life, With sweeter manners, purer laws. Ring out the want, the care, the sin, The faithless coldness of the times;

And bring the fuller minstrel in. Ring out felse pride in place and blood, The civic slander and the spite; Ring in the love of truth and right, Ring in the common love of good.

Ring out, ring out my mournful rhymes,

Ring out old shapes of foul disease, Ring out the narrowing lust of gold; Ring out the thousand wars of old, Ring in the thousand years of peace.

Ring in the valiant man and free, The larger heart, the kindlier hand; Ring out the darkness of the land, Ring in the Christ that is to be. Tennyson.

> > THE RICHEST MAN IN ENGLAND .- He is the Maruis of Westminster. His wealth is estimated at £21,000,000 sterling, or \$105,000,000. How he became so immensely rich is explained by Shelton MacKenzie, the well-informed literary editor of the at all. Just as well do it in a hurry.

Philadelphia Press: Some people may desire to know how the Maruis of Westminster comes to possess his immense property, equal to the fabulous wealth of the Count De Monte Christo. More than half of it has acpeeting, innocent girl! your lips then pronounced crued within the last fifty years. The Marquisate of Westminster is of modern creation, dating no further back than the time of the Reform Bill, when Earl Grey rewarded many of his political supporters with new peerages, and with advance-

> Thus the Earl of Grosvenor was changed into The most noble the Marquis of Westminster.' and originally inherited, with his father's earldom, the estates,—at that time consisting of land the west, as most great cities do, this land. for building purposes. George IV., ashamed of uch a residence as St. James' Palace, (which originally was an hospital, and looks like one to this day,) and tired of Carleton House, obtained anthorization from Parliament to build another palace on the site of Buckingham House, in Pimlico, formerly the property of his mother, Queen Charlotte. In the centre of a swamp, and only a few feet above the level of the Thames, from which it is not far distant, this was, perhaps, the very worst site in London for a dwelling.

But upon it arose the present Buckingham Palace, the town residence of Queen Victoria, around which, with due rapidity, soon accumulated new squares and streets, the habitation of the rich and fashionable people of the West End. Many of these squares and streets, consisting of palatial houses, were built on the Grosvenor Ground, but not with the Grosvenor money. The London practice is to lease out the building lots at so much annual ground rent; for the tenant to build the houses according to certain architectural plans supplied by the ground landlord, so as to secure uniformity of appearance and construction. The ground is generally leased ninety-nine years, at the expiration of which time it reverts to the landlord, together with whatever edifice has been constructed

Of course, as each of these houses comes back to the landlord, the grandson of the present Marquis of Westminster, who may be living when these reversions come into operation, will find his London income marvellously augmented; for if the rent for the mere ground of a fashionable dwelling in "Belgravia" (so called because the Marquis is also Baron Belgrave), be estimated at £300 a year, the dwelling itself, when it falls back, literally for nothing, as part of the Grosvenor estate, will be worth ten times as much. Whoever may be Marquis of Westminster in the year 1900 may estimate his London property at £1,000,000 to £1,500,000 of ranks shall have become things of the past-to be philosophically contemplated by Macaulay's Australian citizen, as he sits on the ruins of St. Paul's, calmly smoking his pipe, and musing on the deeny of great empires.

AUSTRALIAN LIFE .- A LEGUBRIOUS PICTURE .-Take any day of Australian life. You come home after a hard dusty day's work, and you long for a quiet evening with your wife and children, such as you could get once in dear old England. When you sit down to dinner, which your wife has to cook, and your children to prepare for, you see the partner of your domestic joys with a face (from flea and mosquite bites) like a pottle of prize strawberries at Chiswick, a pleasant object to contemplate of an evening. During your dinner you are tormented by flies and bitten by fleas; your very slice of roast mutton on your plate, before you have time to dispose of it, is blown by the yellow n Cheshire and Dorsetshire. But he also was bottle full of live maggots-you push your plate owner of a large tract of land in Westminster, stretching from the houses of Parliament to Chel half your pale ale, and in a moment your glass is sea—land which originally belonged to the Crown eramined with ten thousand departed flies, who and was sold to the Grosvenor family for a trifle. die in drunken happiness. You may have made a very fortunate speculation that day; but it takes a vast amount of money to compensate you for so much domestic misery. When you retire to bed it will be only a second torture of fleas and other vermin, and you will pass a restless, feverish, sleepless night; your children will cry and call for mamma half the night long; and you will get up to another day of speculation. gain or loss, a jaded wife, tired children, and thorough discomfort. Hence it is not just of those people who write books for the purpose of inducing emigration to Australia, to give an estimate only of the milk and honey the country offers. We believe a great quantity of the household milk to be sour, and most of its honey nought but gall and

Every disinterested person is pleased that the Company's old humdrum system has come to an end-tumbled to prices from want of cohesion. Even in the matter of transporting troops across the Isthmus, when the danger became serious, the East India Company, it now appears, were the great obstructives. The following passage from the first leader in the Times of yesterday seals the doom of the " Merchant Princes" in their capacity as rulers of India :- " The double Government which is the type of obstruction and circumlocution has had its day, and must now give way to something better suited to the present time and to actual wants. We are happy to say as soon as Parliament meets for the dispatch of general business the total abolition of Company's Government will be proposed by Ministers. India will be brought immediatly under the control of the Crown and Parliament, with such a machinery of administration as shall be thought conducive to its welfare. The greatest dependency of the empire will receive the benefits of direct Parliamentary supervision and direct Ministerial responsibility. Under such a sys tem we cannot doubt that the nation which has conquered and reconquered India will soon urge it onward with new force in the path of improve-
