Desultory.

OLD MAIDS. BY B. H. BACON.

I am a lover of all womenkind, And maidens old are not old maids to me; When beauty flees, there still remains the mind-And mind is surely better company. What though the hasp be new and trimmed with

gold, Does richer music tremble in its tens. Than when the gaudy polish has grown old, And nanght is left save sweet accord alone? Or is the genn held in less esteem

Because the casket is defeed by time? A woman's mind a priceless gem I doom; Her heart a harp that music yields sublime; So wonder not that years hide not from me The jewel's glow, the harp's rich melody.

Kossuth in Italy .- Kosseth, having arrived on the 22d at Genoa, proceeded on the following day to Turin. All along the way, on every station, a crowd of Italians assembled to cheer him; a convoy at the OLD STAND known as the of Hungarian prisoners mes him at one place, and, recognizing the great leader of their country, shouted their eljens. At another place a wounded Italian broke through the crowd; he had belonged, in 1848, to Col. Monti's Italian Legion in Hungary, and wished to express his delight at seeing once more the arms of Italy and Hungary joined. At for persons travelling by the river boats. Asti the military commander bimself acted as fugleman to the oheering multitude. At Allessandria Kossuth had to address the crowd in Italian. After two long interviews with Count Cayour at Turin, the Hungarian exile, in company with a confidential friend of the Sardinian Minister, secout for Parma, to the headquarters of Prince Napoleon. Up to Stradella, where the railway communication comes Corner Queen & Regent Streets, Fredericton. to an end, same seenes of onthusiasm were witnessed ceived him with a blurt, " Che diavolo fate cosi which they offer for sale very cheap, to suit the times. tardi." He could quietly go to an hotel without being recognized.

At breakfast, however, the waiter brought the foreigners' book to get the names of the guests inscribed, and seeing the name "Kossuth," he rushed out of the room like a madman. Not five minutes passed, and all the thirty thousand inhab- FIHE Subscriber returns his sincere thanks to friends itants of Piazenza knew it already, and, as if called together by an alarm bell, they rushed under his windows and shouted their vivas with the heartiest good will. The mayor and municipality appeared in his room to offer their compliments and their services. Montanelli arrived, -the respected late Minister of Tuscany, who lost his arm in 1848, fighting at Custatone for the liberty. The room is soon overcrowded with visitors. Kossuth must take a drive with them; but as he comes down the stairs the crowd rushes to him, kissing his hands and garments; the horses are unbarnessed, the Italians urag the carriage along; thousands and thousands follow; flowers are showered from the windows, and with all the enthusiasm of renascent liberty the population lavishes its caresses on the stranger whose name is connected with liberty, and therefore is taken by them for a pledge of their own freedom.

At 2 o'clock, P.M., Kossuth arrived at Parma. The town was gaudily adorned in expectation of the arrival of Prince Napoleon. Kossuth's companion having been recognized by some Italian standing before the hotel, he asked, "Count Cavour?" Kossuth said, "No," when suddenly the Earthenware, China, and Glass. eye of the Italian lighted up, and he began to shout, "Kossuth! evviva Kossuth!" In a few minutes all the town was alive with the news; the crowds assembled outside the hotel; the visitors thronged the parlor; and a guard of honor was Manufacturer and Importer of Earthenware placed before the door. The Governor of the Province invited him to his box in the theatre, which people on that day, and Kossuth would not divert the attention of the Italians.

In fact, if sympathy alone could save Hungary, it would already be safe. But, of course, the liberation of a country requires something more. On best Stock of Goods ever offered in this Market-amongst the 28th, Kossuth set out for the headquarters of Napoleon, provided with letters of Count Cavour and Prince Napoleon to the Emperor.

FANNY FERN ON SERMONS .- I want a human sermon. I don't care what Melchisadek, or Zerubbabel, or Kerenhappuck didages ago, I want to know what I am to do, and I want somebody besides a bookworm to tell me-somebody who is sometimes tempted and tried, and is not too dignified to own it; somebody like me, who is sinning and repenting; somebody who is glad and sorry, and cries and laughs, and eats and drinks, and wants to fight and don't! That's the minister for me. I don't want a spiritual abstraction, with stony eyes and petrified fingers, and no blood to battle with. What credit is it to him to be proper? How can he understand me? Were there only such ministers in the pulpit, I wouldn't go to church either, because my impatitnt feet would only beat a tattoo on the pew floor till service was over; but thank God there are! And while they preach I shall go to hear them and come home better and happier for having done it.

THE GOOD OF RECREATION .- No enjoyment however, inconsiderable, is confined to the present moment. A man is the happier for life from having made once an agreeable tour or lived for any length of time with pleasant people, or enjoyed a considerable interval of innocent pleasure. - Sidney apr 30.

Benevolence is kept in motion by its own acts. When it is genuine, nothing impedes its progress and a trifle preserves the spirit of its action; nay, the very acknowledgments of the relieved are fresh and irresistible motives to additional exertion.

TWO HUNDRED PLOUGHS! A New England Settlement IN NEW JERSEY.

Has become the central point of an extensive emigration from the New England States, and the British Provinces, with large accessions from Pennsylvania, and even Illinois, Ohio, and other Western States. During the year 1858 THE Subscriber would beg to call attention to his large over 200 farms were purchased, and 150 houses built and occupied in the settlement. FIFTEEN THOUSAND ACRES,

> Has been surveyed, and is now offered for sale, in FARMS OF TWENTY ACRES. And upwards, on terms favorable to all actual settlers For price of farms, terms, &c., apply personally, or by letter, enclosing stamp, to John Stiles, 18 State-street, Boston, or to RICHARD I. BYRNES, at Hammonton, who

will promptly reply to all letters.

LETTERS FROM RESIDENTS.

The following is a letter from Dr. North, late of Waterville, Maine, who is now located at Hammonton. Coming from such authority it is important in the way of giving satisfactory information.

WEST WATERVILLE, Me., Nov. 8th, 1858. DEAR SIR: —I have travelled much in the northern counties of New Jersey. Monmouth county has long been celebrated as one of the finest agricultural counties in the Middle States. It is the great fruit and market garden which largely supplies New York city with fruit and vegetables. The lands bounded by Staten Island closely resemble the light lands of Hammonton, while the aluminous soils of Freehold are of precisely the same character and quality as your land, located on Oak, Walker, and many parts of Maine road. The uncultivated land in Keyport is valued at \$150 per acre, while the cultivated commands from \$200 to \$400 per acre. A good farm, containing 1600 acres of land, in the town of Freehold, would sell for from \$19,000 to \$20,000. It is my candid opinion, founded upon a careful examination and comparison of the soils, that the lands of Atlantic county are, in an agricultural point of view, as rich and valuable as those of Monmouth county. I hope that many emigrants from this State may be induced to view Harmonton. to visit Hamonton. Lands which they may now purchase for the insignificant price of \$20 per acre will, with skilful and well directed industry, command, in ten years, as high prices as the Monmouth county lands. They can found komes there amidst New England neighbors, New England churches and schoolhouses; homes in a climate as genial as that of Italy, and surrounded by an atmosphere uncontaminated. with malarias; homes abundantly supplied with the purest and sweetest of water; homes in the immediate neighborhood of the great cities of New York and Philadelphia, which will afford a ready market, at the highest prices, for every product of the earth. To invalids laboring under asthma, rheumatism, indigestion, and kindred diseases, I can give assurance, founded upon my own experience, and the testimony of market in the invalid and the sexigence. mony of many settlers that they will recover their health by a residence at Hammonton. I left my home in Waterville last summer to visit New Jersey, for the benefit of my health. At that time I was so ping often to rest. I was much emaciated, and my friends considered my recovery doubtful. I had not been in New Jersey a week, before the rheumatic pain left me entirely. I soon recovered my appetite and the day before I left Hammonton to return to Maine I waiked 24 miles. I conversed with many intelligent residents at Hammonton, who, in other homes, had been afflicted with various diseases, which who, in other homes, had been afficted with various diseases, which were cured by their removal to H. One gentleman, who had suffered severely in a northorn home, from asthma, recovered entirely soon after he moved to New Jersey. He told me of numerous cases analagous to his own, both as to symptoms and cure. I think the equability of the climate, the purity and absence of all irritating matters in the atmosphere, may account for these recoveries from sickness. Respectfully yours, &c., JOS. N. NORTH.

Letter from a settler from Union, Maine-been there the entire seasonhas seen the crops grow-contrast between this place and the West.

HAMMONTON, N. J., Oct. 24th, 1853.

Sirs:—Thinking you would like to hear from one of the settlers of Maine, I take the liberty to inform you of my preference for this place to any other that I have become acquainted with; also wishing to use to any other that I have become acquainted with; also wishing to use my influence with all my friends to settle here, rather than in the far off West, or other wilderness places. I look upon this place in manifold ways, namely: its being located in the immediate vicinity of one of the largest ciries in the United States, and having all the facilities thus afforded; also, located along the Camden and Atlantis Railroad, within an hour's ride of the city of Philadelphia, and all produce raised for marketing in this section of the country can be sent to the market in a fresh condition. I have travelled during the past year in the Western and Middle States, to find a place to settle, where I could enjoy a mild climate and the length of season suitable to raise all kinds of crops, particularly, including fruits of all kinds, and none could I find that suited me so well as this which I now enjoy. As is common to all desirable locations, the land is held at such exorbitant prices that it takes a fortune to make a comfortable home; but as the land is held here within the reach of every working, industrious man, there can be no doubt of his success, and at such uniform prices, which is always the great effect in all business.

There can be no doubt in my opinion, as well as of others experienced, of the fertility of the soil, and that it takes less fertilizing to produce a good crop, than on any land in Maine that I have any I have seen some corn raised this season on the farm of Mr. Erie Willis, formerly of Augusta, Maine, equal to any I ever saw in any other State. His land was covered with standing wood on the last of April last, as you are well aware, and his corn was planted about the first of June, and endured the severe drought we all experienced, ex-I am also glad to hear from experienced men that this is the kind of soil adapted to the culture of grapes, which I have a great desire to grow, which is always a very profitable crop to raise, and I intend to plant all my means will allow.

As regards health and climate, it satisfies me beyond expectation. I have heard of no cases of those interminable fevers subject to the Western clime, which is certainly a great advantage over the West. My family were all in delicate health when we came here, and now are well and hearty. The construction of houses and other buildings, which is an important item, I had always supposed in this section of the country must cost exceedingly beyond New England prices; but on the coned. for three hundred and fifty dollars, sufficiently comfortable for any farmer; but those having means can build as expensive as they wish. Having lived here for the last six months, and noticed all the movements of settling, and the rapid growth of the place, which, six months ago, was nearly covered with living trees, and now quite a business place and village, and seen the crops growing in the adjacent towns, as well as this, with so little fertilizing, I feel satisfied with all these facilities, and think I can make a happy home, as well as profitable, by attention to farming. Yours, respectfully, JOS. MILLER. Letter from E. J. Delamo, formerly of Frankfort, Maine-Contrast be-tween Hammonton and Western Virginia. HAMMONTON, N. J., Oct. 23, 1858.

Mr. EDITOR: Dear Sir,-I wish to give you my ideas of this place as my learning is limited, you must excuse this letter, although I as my learning is limited, you must excuse this letter, although I think it my duty to all, to encourage people to come here and settle. I have travelled in twelve States, and as far South as Kentucky. I have spent some time in the southern part of the States of New York and Pennsylvania, also Virginia, and I must say that this is the healthiest place I have been in yet. In New York State it is as changeable as in Maine,—it is warmer in Pennsylvania, but from spring till late in the fall they have a great deal of fog—it comes in the latter part of the night, and lasts until from 9 to 12 o'clock, M., then the sun will shine and it will be very warm indeed.

Then you are troubled with billious fever, and also fever and ague. Then you are troubled with billious fever, and also fever and ague, and consumptions, which the people in the East dread very much. I have travelled about 3.000 miles in Pennsylvania, 940 miles in Virginia. Watern Virginia is highly spoken of by Eastern people as a fine climate, but I have walked 260 miles, and travelled by steam 350 miles in Western Virginia, but I find it is not so. In the first place, after you leave the valley of Virginia, it is mountainous until you reach the Ohio river, with the exception of the river bottom lands that make into the State, these bottoms are about quarter mile wide. I found that fever and ague prevailed along my travels, and fog in abundance. Then I came here, and glad am I for coming. I have taken particular pains to inquire about the health of this place, and find it to surpass any other place that I have been in, or can hear of. We have no particular diseases here. I have talked with the elder settlers, they say that the fever and ague never was known here; as for my family, they never were so healthy before. We are out early and late, and expose ourselves very much, and have not taken cold yet this season, the instance I never knew before; and as for myself, I was quite thin when I left Maine, since coming here my appetite is good, and I am able to do a good day's labor.

The people from the kast, after living here a while, may take this appetite, they call it the Jersey appetite—it is the only disease that prevails here. As for the soil, it is very good. I have seen corn grow as stout here as in any other State. Mr. Hays told me that he raised to bushels to the acre. He raised 6,000 bushels in one scaon. I have been in a number of places where the soil is like this and I see they been in a number of places where the soil is like this, and I see they all have good crops. Fruit trees do well here—and we can raise any quantity of vegetables. Sweet potatoes do well, and so do the Irish potatoes. Cabbage, squashes, turnips, and all kinds of vegetables will grow here, that I ever seen grow in the East.

People are coming here from the Eastern and Middle States, and are People are coming here from the Eastern and Middle States, and are buying land to farm. Mr. Henry, from Ohio, a grape grower, the boards with me,) is making preparations for his vines. I also heard him praising the soil to every stranger that comes here.

A farmer from Vermont, after stopping here a number of days and examining the soil, told me that half of the goodness of the mill had not been discovered yet. I asked him if he was coming to the with us? Said he, I am coming for this one reason, I have a good farm in Vermont, and enough to corry me through but I are going to sell my mont, and enough to carry me through, but I am going to sell my farm and come here, to settle my boys, for I would rather have them settle here than in Vermont. Farmers from Pennsylvania are here; they say they can raise more truck on the acre than in Pennsylvania.

The soil is light and easy, and requires but little dressing. It requires muck, marl, lime, or ashes, and some guano; all can be procured

Letter from Mr. Eri Willis, of Augusta, Me. Has raised crops-Re-HAMMONTON, N. J., Oct. 20, 1858. Mr. Editor:—I came here last April, and took up twenty acres of land; I cut and burnt over eight acres that was covered with green oaks. I ploughed it up, and planted it with corn, potatoes, buckwheat, &c. I have harvested it, and find some very nice corn, considering the newness of the land, and the dryness of the season. I am satisfied with the climate and soil—and am satisfied that a man can realize more money from twenty acres of land here, by farming, with the same amount of money expended, than he can upon any farm in Yours respectfully, ERI WILLIS. the New England States.

Letter from Eli Hanson., from North Vassalboro-His impressions of the place. HAMMONTON, N. J., Oct. 20, 1853. Mr. EDITOR:—I came to this place on the 12th of last June, from Kennebeck, Maine, and town of North Vasselboro, to work for C. J. Tray, on his steam mill that he had commenced, and was so much pleased with the prospects of the place, while working for him, that I concluded to purchase a building lot, and upon which I have erected concluded to purchase a building lot, and upon which I have erected a house, and have it nearly completed, and intend to make this my future home; as I have never seen any new place flourish like this, and present so much interest in so short a time—and I cheerfully say that I am so far satisfied, that my attention was turned to this Hammonton enterprise. As to the location of the place, it is most certainly very desirable. The quality of the soil has already been proved and pronounced good by all judges. The climate is all that can be wished for. And as health is the predominant, it is hardly use to mention, but I must say, it is a poor place for physicians. And I, like all others here, have a desire that this place should thrive, and encourage my friends to give it a call and examine for themselves. friends to give it a call and examine for themselves.
Yours, truly, ELI HANSON. Letter from a settler from Portland, Me. - The climate - Health - Rapid HAMMONTON, Oct. 20, 1858. I have been in Hammonton about two months, and I am satisfied that the soil is of the best kind; and I learn from others who have tried it, that it requires but very little dressing. The climate is the most healthy I was ever in. I have exposed myself more since I have been here than I have all the rest of my life, and never was so well and and hearty.

The water is excellent. I saw some corn that grew on Messrs. Wells, and Lombard's farm last season, with but little or no dressing, that knocks the down-east corn all to nothing.

We have some squashes and melons that grew here, that would make a man groun to lift them. Potatoes turn out well in most places, but it has been too dry for them to do much. A large portion of the settlers are from Maine and Massachusetts, and of the best kind as far test is know. Land that we hought a year age for \$200 cm at a starter. us I know. Land that was bought a year ago for \$30 an acre, has since been sold at the rate of \$400 per acre.

The land I bought two months since for \$25 per acre, I will not now

sell for \$70 per acre. The place is growing very fast, and is destined, in my openion, to be a large place. Letter from a settler from Worcester, Mass. - The soil, climate, Water, &c.

HAMMONTON, N. J., Oct 20, 1858.

Sir, -In regard to my views of this place, I will say that I came here last April, with the intention of locating if I liked it. I was pleased with the place from the first time I came; I have purchased a lot and locality me a house and intend to reside here. built me a house, and intend to reside here. The soil and climate I think unsurpassed in any State in the Union; being situated between the hot and debilitating South and the cold and changeable North, we escape the extremities of both, and enjoy a climate mild, temperate, and delightful. In the hottest days of last summer we almost invariably had a cool refreshing breeze through the middle of the day. Of the fertility of the soil, and its capacity to produce, I am more convinced each day, and all I regret is, that I had not known of the place ware ago instead of a few months. The water is known of the piace years ago, instead of a few months. The water is excellent, soft, pure, and abundant, and appears quite free from mineral substances. And from the past season's products, I should be unwilling to change my ten acres here, for any twenty acres in New England, try parties land. England, my native land.

Yours respectfully, J. WOODBURN. Letter from John Nowell, formerly of Augusta, Maine-His impressions
-Buys a farm. SIRS,—I came to this place last April to work for Mr. Wim. Black, when there was scarcely a comfortable dwelling on this tract of land, and continued to work for him for four months, and was so impressed in favor of the place, that I concluded to purchase a town lot, and intend to cultivate it as a gardu. tend to cultivate it as a gardn.

I returned to Augusta, Maine, my native home, to remain during the winter, but could not content myself there, and have come back with the intention to improve my lot; and I can truly say, things here look very inviting. As to the soil, it is most decidedly fertile, and will produce, with very little dressing. The climate is very excellent, and health could not be better; and I do continually advise my friends to give Hammonton an examination before going elsewhere, as I know this place will suit them.

Yours, truly,

JOHN NOWELL.
