lower school room. The largest portion of the current run along the ridgepole, tearing off the slates and throwing them to a great distance. Thence descending to the under school room, passing to the porch, it entered a 2 cheap, at the closet in which were books and a globe, playing sad pranks with the books, smashing all the world to pieces, as exhibited on the globe, and wound up the performance by tearing away the back of the closet, letting daylight into the porch through an TUST opened, one of the finest Stocks of BOOTS and opening as large as a common sized window, be- SHOES ever imported into this place. 5 cases daily sides ripping up the walls and ceilings generally. expected from New York. It also passed through both spouts at each end of may 28. the building, making several perforations in each. Strange to say no one was killed, although two little girls in the lower school were severely shocked. In the upper (boys) school room a lad named Merrill was stunned, and a lad named Frank W. Fer- &c. &c. nald had a perfect miniature imprint of an elm tree, its branches and leaves, stamped upon his left shoulder, which, however, has disappeared this morning. One-half of his foot was also as white as snow for an hour and a half.

MIXING BABIES .- Some time ago there was a dancing party given "up north," near Weaverville, Cal. Most of the ladies present had little babies, whose noisy perversity required too much attention to allow the mothers to enjoy the dance. A number of gallant young men volunteered to watch the young ones while the parents indulged in a "breakdown." No sooner had the women left their babies in charge of the mischievous BOOTS and SHOES, comprising all the requisite descriprascals, than they stripped the infants, changed tions for Ladies, Gentlemen, Girls, Boys and Children their clothes, giving to one the apparel of another. which they offer for sale very cheap, to suit the times. The dance over, it was time to go home, and the mothers hurriedly took each a baby, in the dress of her own, and started, some to their homes, ten or fifteen miles off, and were far on their way before daylight. But the day following there was a prodigious row in the settlement. Mothers discovered that a single day had changed the sex of their babies. Observation disclosed startling phynaturally sweet dispositions. To this day, it is unsafe for any one of the baby mixers to venture ever offered in this part of the Province. Also, within the territory .- Boston Post.

MILAN .- This city, the capital of the Lombardo Venetian kingdom, which the French and Sardinian troops have now entered, is situated on a wide and fertile plain, less than twenty miles from the Ticino. The latest census gave the population at 161,966. The ordinary garrison force is about 8000 men. The city is nearly in a circular shape, enclosed on three sides by a wall, surrounded by broad ramparts, nearly eight miles in circumference, and entered by ten gates. Its importance in war is rather that of a capital and a convenient centre for directing operations, than as a stronghold. It is very favorably situated for trade owing to its position on the great routes across the Alps, Earthenware, China, and Glass. and its connection by means of canals with the principle rivers in Italy. The city was founded 400 B. C., and was inhabited and embellished by many of the Roman Emperors. The poet Virgil studied there. Its history in modern times has Manufacturer and Importer of Earthenware been exceedingly varied. It has now been under the dominion of Austria since 1815.

"THE LAST OF THE HUGGERMUGGERS."-A sprightly school-girl, who attends the "Central High School," where the teachers have a way of inciting procuring Goods for this market, from all parts of Europe, the pupils to understand what they say to the class, was reading in the "Last of the Huggermuggers;" and stirred by the spirit of inquiry stimulated by her teachers, if not by natural feminine curiosity, asked a boy cousin of hers the meaning of Huggermugger. John looked thoughtful for a moment, then said; "1'll show you." And before the incipient woman had time to make any further remark, John had his arm around her waist, and subjected it to a gentle pressure-" That's hugger, and this (putting his lips to hers in affectionate collision) is mugger." "Yes," said the not more than half displeased Sarah Ann, "and this is the last of the huggermuggers; for if ever you attempt to give me another such a definition, I'll box your ears.

An Irishman, driven to desperation by the stringency of the money market and the high price of provisions, procured a pistol and took to the road. Meeting a traveller, he stopped him with, "Your money or your life!" Seeing that Pat was green, he said, "I'll tell you what I'll do. I'll give you all my money for that pistol." "Agreed." Pat received the money and handed over the pistol. "Now," said the traveller, "hand back that money or I'll blow out your brains." "Blaze away, my honey," said Pat; "nary a dhrop of powther there's in it."

LETTERS FROM RESIDENTS.

The following is a letter from Dr. North, late of Waterville, Maine, who is now located at Hammonton. Coming from such authority it is important in the way of giving satisfactory information.

WEST WATERVILLE, Me., Nov. 8th, 1838. DEAR SIR:—I have travelled much in the northern counties of New Jersey. Monmouth county has long been celebrated as one of the finest agricultural counties in the Middle States. It is the great fruit and market garden which largely supplies New York city with fruit and vegetables. The lands bounded by Staten Island closely resemble the light lands of Hammonton, while the aluminous soils of Freehold are of precisely the same character and quality as your land, located on Oak, Walker, and many parts of Maine road. The uncultivated land in Keyport is valued at \$150 per acre, while the cultivated commands from \$200 to \$400 per acre. A good farm, containing 1000 acres of land, in the town of Freehold, would seil for from \$10,000 to \$20,000. It is my candid opinion, founded upon a careful examination and comparison of the soils, that the lands of Atlantic county are, in an agricultural point of view, as rich and valuable as those of Monmouth county. I hope that many emigrants from this State may be induced to visit Hamonton. Lands which they may now purchase for the insignificant price of \$20 per acre will, with skilful and well directed industry, command, in ten years, as high prices as the Monmouth counand market garden which largely supplies New York city with fruit dustry, command, in ten years, as high prices as the Monmouth county lands. They can found homes there amidst New England neighbors, New England churches and schoolhouses; homes in a climate as genwew England churches and schoolhouses; homes in a chinate as genial as that of Italy, and surrounded by an atmosphere uncontaminated with malarias; homes abundantly supplied with the purest and sweetest of water; homes in the immediate neighborhood of the great cities of New York and Philadelphia, which will afford a ready market, at the highest prices, for every product of the earth. To invalids laboring under asthma, rheumatism, indigestion, and kindred diseases, I can give assurance, founded upon my own experience, and the testimony of many settlers that they will recover their health by a residence at Hammonton. I left my home in Waterville last summer to dence at Hammonton. I left my home in Waterville last summer to visit New Jersey, for the benefit of my health. At that time I was so debilitated by rheumatism I could not walk half a mile without stopmy recovery doubtful. I had not been in New Jersey a week, before the rheumatic pain left me entirely. I soon recovered my appetite, and the day before I left Hammonton to return to Maine I walked 24 miles. I conversed with many intelligent residents at Hammonton, who, in other homes, had been afflicted with various diseases, which were cured by their removal to H. One gentleman, who had suffered severely in a northorn home, from asthma, recovered entirely soon after he moved to New Jersey. He told me of numerous cases analagous to his own, both as to symptoms and cure. I think the equability of the climate, the purity and absence of all irritating matters in

Letter from a settler from Union, Maine-been there the entire seasonhas seen the crops grow—contrast between this place and the West. Hammonton, N. J., Oct. 24th, 1858. HAMMONTON, N. J., Oct. 24th, 1893.

Sirs:—Thinking you would like to hear from one of the settiers of Maine, I take the liberty to inform you of my preference for this place to any other that I have become acquainted with; also wishing to use my influence with all my friends to settle here, rather than in the far off West, or other wilderness places. I look upon this place in manifold ways parely in the being located in the investigate vicinity of one fold ways, namely: its being located in the immediate vicinity of one of the largest cities in the United States, and having all the facilities thus afforded; also, located along the Camden and Atlantic Railroad, within an hour's ride of the city of Philadelphia, and all produce raised forenarketing in this section of the country can be sent to the market has fresh condition. I have travelled during the past year in the Western and Middle I have travelled during the past year in the Western and Middle States, to find a place to settle, where I could enjoy a mild climate and the length of season suitable to raise all kinds of crops, particularly, including fruits of all kinds, and none could I find that suited me so well as this which I now enjoy. As is common to all desirable locations, the land is held at such exorbitant prices that it takes a fortune to make a comfortable home; but as the land is held here within the reach of every working, industrious man, there can be no doubt of his success, and at such uniform prices, which is always the great effect in all business. There can be no doubt in my opinion, as well as of others experienced, of the fertilizing of the soil, and that it takes less fertilizing to produce a good crop, than on any land in Maine that I have any I have seen some corn raised this season on the farm of Mr. Erie Willis, formerly of Augusta, Maine, equal to any I ever saw in any other State. His land was covered with standing wood on the last of April last, as you are well aware, and his corn was planted about the first of June, and endured the severe drought we all experienced, ex-

the atmosphere, may account for these recoveries from sickness.

Respectfully yours, &c., JOS. N. NORTH.

first of June, and endured the severe drought we all experienced, extremely well.

I am also glad to hear from experienced men that this is the kind of soil adapted to the culture of grapes, which I have a great desire to grow, which is always a very profitable crop to raise, and I intend to plant all my means will allow.

As regards health and climate, it satisfies me beyond expectation. I have heard of no cases of those interminable fevers subject to the Western clime, which is certainly a great advantage over the West. My family were all in delicate health when we came here, and now are well and hearty.

The construction of houses and other buildings, which is an important item, I had always supposed in this section of the country must cost exceedingly beyond New England prices; but on the contrary. A comfortable residence can be constructed, I have ascertained, for three hundred and fifty dollars, sufficiently comfortable for any farmer; but those having means can build as expensive as they wish.

Having lived here for the last six months, and noticed all the movements of settling, and the rapid growth of the place, which, six months ago, was nearly covered with living trees, and now quite a business place and village, and seen the crops growing in the adjacent towns, as well as this, with so little fertilizing, I feel satisfied with all these facilities, and think I can make a happy home, as well as profitable, by facilities, and think I can make a happy home, as well as profitable, by attention to farming. Yours, respectfully, JOS. MILLER. Letter from E. J. Delano, formerly of Frankfort, Maine-Contrast between Hammonton and Western Virginia.

Hammonton, N. J., Oct. 23, 1853.

Mr. Editor: Dear Sir,-I wish to give you my ideas of this place: as my learning is limited, you must excuse this letter, although I think it my duty to all, to encourage people to come here and settle. I have travelled in twelve States, and as far South as Kentucky. I have spent some time in the southern part of the States of New York

I have travelled in twelve States, and as far South as Kentucky. I have spent some time in the southern part of the States of New York and Pennsylvania, also Virginia, and I must say that this is the healthiest place I have been in yet. In New York State it is as changeable as in Maine,—it is warmer in Pennsylvania, but from spring till late in the fall they have a great deal of fog—it comes in the latter part of the night, and lasts until from 9 to 12 o'clock, M., then the sun will shine and it will be very warm indeed.

Then you are troubled with billious fever, and also fever and ague, and consumptions, which the people in the East dread very much. Then you are troubled with billious fever, and also fever and agus, and consumptions, which the people in the East dread very much. I have travelled about 3,000 miles in Pennsylvania, 940 miles in Virginia. Western Virginia is highly spoken of by Eastern people as a fine climate, but I have walked 260 miles, and travelled by steam 350 miles in Western Virginia, but I find it is not so.

In the first place, after you leave the valley of Virginia, it is mountainous until you reach the Ohio river, with the exception of the river bottom langs that make into the State, these bottoms are about quarter wide. I found that fever and ague prevailed along my travels, mile wide. I found that fever and ague prevailed along my travels, and fog in abundance. Then I came here, and glad am I for coming. I have taken particular pains to inquire about the health of this place, and find it to surpass any other place that I have been in, or can hear of. We have no particular diseases here. I have talked with the elder of. We have no particular diseases here. I have talked with the elder settlers, they say that the fever and ague never was known here; as for my family, they never were so healthy before. We are out early and late, and expose ourselves very much, and have not taken cold yet this season, the instance I never knew before; and as for myself, I was quite thin when I left Maine, since coming here my appetite is good, and I am able to do a good day's labor.

The people from the East, after living here a while, may take this appetite, they call it the Jersey appetite—it is the only disease that prevails here. As for the soil, it is very good. I have seen corn grow as stout here as in any other State. Mr. Hays told me that he raised 60 bushels to the acre. He raised 6,000 bushels in one season. I have been in a number of places where the soil is like this, and I see they all have good crops. Fruit trees do well here—and we can raise any all have good crops. Fruit trees do well here—and we can raise any quantity of vegetables. Sweet potatoes do well, and so do the Irish potatoes. Cabbage, squashes, turnips, and all kinds of vegetables will grow here, that I ever seen grow in the East.

People are coming here from the hastern and Middle States, and are buying land to farm. Mr. Henry, from Ohio, a grape grower, the boards with many is reasonable arrangements for his vines. with me,) is making preparations for his vines. I also heard him praising the soil to every stranger that comes here.

praising the soil to every stranger that comes here.

A farmer from Vermont, after stopping here a number of days and examining the soil, told me that half of the goodness of the soil had not been discovered yet. I asked him if he was coming to live with us? Said he, I am coming for this one reason, I have a good farm in Vermont, and enough to earry me through, but I am going to sell my farm and come here, to settle my boys, for I would rather have them settle here than in Vermont.

Farmers from Pennsylvania are here; they say they can raise more truck on the acre than in Pennsylvania.

The soil is light and easy, and requires but little dressing. It requires muck, marl, lime, or ashes, and some guano; all can be procured very easy and cheap.

Respectfully yours,

L. J. DELANO. Letter from Mr. Eri Willis, of Augusta, Me. Has raised crops-Re-Mr. Editor:—I came here last April, and took up twenty acres of land; I cut and burnt over eight acres that was covered with green oaks. I ploughed it up, and planted it with corn, potatoes, buckwheat, &c. I have harvested it, and find some very nice corn, considering the newness of the land, and the dryness of the season. I am satisfied with the climate and soil—and am satisfied that a mate can realize more money from twenty acres of land here by farming with

alize more money from twenty acres of land here, by farming, with the same amount of money expended, than he can upon any farm in the New England States. Yours respectfully, ERI WILLIS. Letter from Eli Hanson., from North Vassaboro-His impressions of Mr. Editor:—I came to this place on the 12th of last June, from Kennebeck, Maine, and town of North Vasselboro, to work for C. J. Tray, on his steam mili that he had commenced, and was so much pleased with the prospects of the place, while working for him, that I concluded to purchase a building lot, and upon which I have erected a house, and have it nearly completed, and intend to make this my future home; as I have never seen any new place flourish like this, and present so much interest in so short a time—and I cheerfully say that I am so far satisfied, that my attention was turned to this Hammonton enterprise. As to the location of the place, it is most certainly very desirable. The quality of the soil has already been proved and pronounced good by all judges. The climate is all that can be wished for. And as health is the predominant, it is hardly-juse to mention, but I must say, it is a poor place for physicians. And I, like all others here, have a desire that this place should thrive, and encourage my friends to give it a call and examine for themselves. HAMMONTON, N. J., Oct. 20, 1858. friends to give it a call and examine for themselves.
Yours, truly, ELI HANSON. Letter from a settler from Portland, Me .- The climate-Health-Rapid

HAMMONTON, Oct. 20, 1858. I have been in Hammonton about two months, and I sm satisfied that the soil is of the best kind; and I learn from others who have tried it, that it requires but very little dressing. The climate is the most healthy I was ever in. I have exposed myself more since I have been here than I have all the rest of my life, and never was so well and and hearty.

The water is excellent. I saw some corn that grew on Messrs. Wells and Lombard's farm last season, with but little or no dressing, that knocks the down-east corn all to nothing.

We have some squashes and melons that grew here, that would make a man groan to lift them. Potatoes turn out well in most places, but it has been too dry for them to do much. A large portion of the settlers are from Maine and Massachusetts, and of the best kind as far as I know. Land that was bought a year ago for \$30 an acre, has since been sold at the rate of \$400 per acre.

The land I bought two months since for \$25 per acre, I will not now sell for \$70 per acre. The place is growing very fast, and is destined, in my opinion, to be a large place. CHAS. E. ROBERTS. Letter from a settler from Worcester, Mass. - The soil, climate, Water, &c. HAMMONTON, N. J., Oct 20, 1868. SIR,-In regard to my views of this place, I will say that I came here last April, with the intention of locating if I liked it. I was pleased with the place from the first time I came; I have purchased a lot and with the place from the first time I came; I have purchased a lot and built me a house, and intend to reside here.

The soil and climate I think unsurpassed in any State in the Union; being situated between the hot and debilitating South and the cold and changeable North, we escape the extremities of both, and enjoy a climate mild, temperate, and delightful. In the hottest days of last summer we almost invariably had a cool refreshing breeze through the middle of the day. Of the fertility of the soil, and its capacity to produce, I am more convinced each day, and all I regret is, that I had not known of the place years ago, instead of a few mouths. The water is excellent, soft, pure, and abundant, and appears quite free from mineral substances. And from the past season's products, I should be unwilling to change my ten acres here, for any twenty acres in New willing to change my ten acres here, for any twenty acres in New England, my native land.

Letter from John Nowell, formerly of Augusta, Maine-His impressions SIRS,—I came to this place last April to work for Mr. Wm. Black, when there was scarcely a comfortable dwelling on this tract of land, and continued to work for him for four months, and was so impressed in favor of the place, that I concluded to purchase a town lot, and intend to cultivate it as a gardn.

I returned to Augusta, Maine, my native home, to remain during the I returned to Augusta, Maine, my native home, to remain during the winter, but could not content myself there, and have come back with the intention to improve my lot; and I can truly say, things here look very inviting. As to the soil, it is most decidedly fertile, and will produce, with very little dressing. The climate is very excellent, and health could not be better; and I do continually advise my friends to give Hammonton an examination before going elsewhere, as I know this place will suit them.

Yours, truly,

JOHN NOWELLL
