BOSTON ADVERTISEMENTS. A New England Settlement IN NEW JERSEY.

THE HAMMONTON TRACT

- 0 F -LAND IN NEW JERSEY

Has become the central point of an extensive emigration from the New England States, and the British Provinces, with large accessions from Pennsylvania, and even Illinois, Ohio, and other Western States. During the year 1858 over 200 farms were purchased, and 150 houses built and occupied in the settlement. The second and last division of this tract, consisting

FIFTEEN THOUSAND ACRES, Has been surveyed, and is now offered for sale, in FARMS OF TWENTY ACRES,

And upwards, on terms favorable to all actual settlers. Titles perfect. For price of farms, terms, &c., apply personally, or by letter, enclosing stamp, to J HN STILES, 18 State-street, Bost n, or to RICHARD I. BYRNES, at Hammonton, who will promptly reply to all letters.

LETTERS FROM RESIDENTS. The following is a letter from Dr. North, late of Waterville, Maine,

Who is now located at Hammonton. Coming from such authority it is important in the way of giving satisfactory information.
WEST WATERVILLE, Me., Nov. 8th, 1858. DEAR SIR :- I have travelled much in the northern cou ties of New Jersey. Monmouth county has long been celebrated as one of the finest agricultural counties in the Middle States. It is the great fruit and market garden which largely supplies New York city with fruit and vegetables. The lands bounded by Staten Island closely resemble the light lands of Hammonton, while the aluminous soils of Freehold are of precisely the same character and quality as your land, located on the Walter and was a property of Mains road. The macuality and on Oak, Walker, and many parts of Maine road. The uncultivated land in Key port is valued at \$150 per acre, while the cultivated commands from \$200 to \$400 per acre. A good farm, containing 1000 acres of land, in the town of rrechold, would sell for from \$19,000 to \$20,000. It is my candid opinion, founded upon a caleful examination and comparison of the soils, that the lands of Atlan ic county are, in an agricultural point of view, as rich and valuable as those of monmouth county. I hope that many emigrants from this State may be induced to visit Hamonton. Lands which they may now purchase for the insignificant price of \$20 per acre will, with skifful and well directed industry, command, in ten years, as high prices as the Monmouth county lands. They can found homesthere aimdst New England neighbors, New England churches and schoolhouses; homes in a climate as genial as that of Italy, and surrounded by an atmosphere uncontaminated with malarias; homes abundantly supplied with the purest and sweetest of water; homes in the immediate neighbo hood of the great cities of New York and Philade phia, which will afford a ready market, at the highest prices, for every product of the earth. To invalids laboring under asthma, rheumatism, indigestion, and kindred diseases, I can give a surance, founded upon my own experience, and the testi-mony of many settlers that they will recover their health by a residence at Hammonton. Heft my home in Waterville last summer to visit New Jersey, for the benefit or my health. At that time I was so debiniated by rheumatism I could not walk half a mile without stopping often to rest. I was much emaciated, and my friends considered recovery doubtful. I had not been in New Jersey a week, before the rheumatic pain left me entirely. I soon recovered my appetite, and the day before I left Hammonton to return to Maine I walked 24 miles. I conversed with many intelligent residents at Hammonton, who, in other homes, had been afflicted with various diseases, which were cured by their removal to H. One gentieman, who had suffered severely in a northorn home, from asthma, recovered entirely soon after he moved to New Jersey. He told me of numerous cases analagous to his own, both as to symptoms and cure. I think the equability of the climate, the purit, and assence of all irritating matters in the atmosphere, may account for these recoveries from sickness.

Respectfully yours, &c., JOS. N. NORTH.

Letter from a sett'er from Union, Maine-been there the entire seasonhas seen the crops grow-contrast oct ocen this place and the West.
HAMMONTON, N. J., oct. 24th, 1888.
Sires:—Thinking you would like to hear from one of the settlers of Maine, I take the liberty to inform you of my preference for this place to an, other that I have become acquainted with; also wishing to use my influence with all my friends to settle here, rather than in the far off West, or other wilderness places. I look upon this place in manifold ways, namely : its being located in the immediate vicinity of one of the largest ci ies in the United States, and having all the facilities thus afforded, also, located along the Cam ien and Atlantic Railroad, within an hour's ride of the city of Philadelphia, and all produce raised for marketing in this section of the country can be sent to the market in a fresh condition.

I have travelled during the past year in the Western and Middle States, to and a place to settle, where I could enjoy a mild chimate and the length of season suitable to raise all kinds of crops, particularly, including fruits of all kinds, and none could I find that suned me so well as this which I now enjoy. As is common to all desirable locations, the land is held at such exorbitant prices that it takes a forume to make a sum fortable home. But as the land is held here within he to make a comfortable home; but as the land is held here within the reach of every working, industrious man, there can be no doubt of his success, and at such uniform prices, which is always the great effect in There can be no doubt in my opinion, as well as of others experienced, of the fertility of the soil, and that it takes less fertilizing to produce a good crop, than on any land in Maine that I have any knowledge of. I have seen some corn raised this season on the farm of Mr. Erie Willis, fo merty of Augusta, Maine, equal to any I ever saw in any other State. His land was covered with standing wood on the last of April last, as you are well aware, and his corn was planted about the first of Jane, and endured the severe drought we all experienced, extermally wall. I am also glad to hear from experienced men that this is the kind of soil a lapted to the culture of grapes, which I have a great desire to grow, which is always a very profitable crop to raise, and I intend to plant all my means will allow. As regards health and chimate, it satisfies me beyond expectation. I have heard of no cases of those interminable fevers subject to the Western clime, which is certainly a great advant ge over the West. My tamily were all in delicate health when we come here, and now are well and hearty.

The construction of houses and other buildings, which is an important item, I had a ways supposed in this section of the country must cost exceedingly beyond New England prices; but on the contrary. A comfortable residence can be constructed, I have ascertained, for three hundred and fifty donars, sufficiently comfortable for any farmer; but those having means can build as expensive as they wish. Having fived here for the last six months, and noticed all the movements of settling, and the rapid growth of the place, which, six months ago, was nearly covered with living trees, and now quite a business place and village, and seen the crops growing in the adjacent towns, as well as this, with so little fertilizing, I feer satisfied with all these facilities, and think I can make a happy home, as well as profitable, by attention to farming.

Yours, respectfully, JOS. MILLER. Letter from E. J. Delamo, formerly of Frankfort, Maine-Contrast between Hammonton and Western Virginia.

HAMMONTON, N. J., Oct. 23, 1858. Mr. Editor: Dear Sir,—I wish to give you my ideas of this piace; as my learning is limited, you must excuse this letter, although I think it my duty to all, to encourage people to come here and settle. I have travelled in twelve States, and as far South as Kentucky. I have spent some time in the southern part of the States of New York and Penns, lvania, also Virginia, and I must say that this is the healthiest place I have been in yet. In New York State it is as changeable as in Maine, —it is warmer in Pennsylvania, but from spring till late in the fall they have a great deal of fog—it comes in the latter part of the night, and lasts until from 9 to 12 o'clock, M., then the sun will shine and it will be very warm indeed. Then you are troubled with billious fever, and also fever and ague, and consumptions, which the people in the East dread very much. I have travelled about 3.000 miles in Pennsylvania, 940 miles in Virginia. Western Virginia is highly spoken of by Eastern 1 eople as a fine climate, but I have walked 260 miles, and travelled by steam 350 miles in Western Virginia, but I find it is not so.

In the first place, after you leave the valley of Virginia, it is mountainous until you reach the Ohio river, with the exception of the river bottom langs that make into the State, these bottoms are about quarter mile wide. I found that fever and ague prevailed along my travels mile wide. I found that fever and ague prevailed along my travels, and fog in abundance. Then I came here, and glad am I for coming. I have taken particular pains to inquire about the health of this place, and find it to surpass any other place that I have been in, or can hear of. We have no particular diseases here. I have taked with the elder settlers, the, say that the fever and ague never was known here; as for my family, they never were so healthy before. We are out early and late, and expose ourselves very much, and have not taken cold yet this season, the instance I never knew before ; and us for myself, ! was quite thin when I left Maine, since coming here my appetite is good, and I am able to do a good day's labor. appetite, they call it the Jersey appetite-it is the only disease that prevaishere. As for the soil, it is very good. I have seen coin grow as stout here as in any other State Mr. Hays told me that he raised 60 bushels to the acre. He raised 6,000 bushels in one season. I have been in a number of places where the soil is like this, and I see they all have good crops. Fruit trees do well here-and we can raise an quantity of vegetables. Sweet potatoes do well, and so do the Irish potatoes. Cabbage, squashes, turnips, and all kinds of vegetables will People are coming here from the Last.

People are coming here from the Lastern and Middle States, and are buying land to tarm. Mr. tienry, from Ohio, a grape grower, (he boards with me,) is making preparations for his vines. I also heard him praising the soil to every stranger that comes here.

A farmer from Vermont, after stopping here a number of days and examining the soil, told me that half of the goodness of the soil had not been discovered yet. I ask a him if he was coming to live with us? Eat h. I am coming for this one reason, I have a good farm in Vermont, and enough to carry me through, but I am going to sell my farm and come here, to settle my boys, for I would rather have them settle here than in Vermont. harmers from Fennsylvania are here; they say they can raise more truck on the acre than in Pennsylvania. The soil is light and easy, and requires but little dressing. It re-Quires muck, marl, hme, or asher, and some guano; all can be procured very easy and cheap.

Respectfully yours, Respectfully yours, E. J. DELANO.

Letter from Mr. Eri Willis, of Augusta, Me. Has raised crops-Re-HAMMONTON, N. J., Oct. 20, 1858. Mr. Editor: - I came here last April, and took up twenty acres of land; I cut and burnt over eight acres that was covered with green oaks. I ploughed it up, and planted it with corn, potatoes, buckwheat, &c. I have harvested it, and find some very nice corn, considering the newness of the land, and the dryness of the season. I am satished with the climate and soil-and am satisfied that a man can realize more money from twenty acres of land here, by farming, with the same amount of money expended, than he can upon any farm in the New England States. Yours respectfully, ERI WILLIS.

Letter from Eli Hanson., from North Vassalboro-His impressions of HAMMONTON, N. J, Oct. 20, 1858. Mr. EDIIOR:—I came to this place on the 12th of last June, from Kenneb ck, Maine, and town of North Vasselboro, to work for C. J. Tray, on his steam mile that he had commenced, and was so much pleased with the plospects of the place, while working for him, that I concluded to purchase a building lot, and upon which I have erected a house, and have it nearly completed, and intend to make this my future home; as I have never seen any new place flourish like this and present so much interest in so short a time-and I cheerfully say that I am so far satisfied, that my attention was turned to this Hammonton enterprise. As to the location of the piace, it is most certainly very desirable. The quality of the soin has already been proved and pronounced good by all judges. The crimate is all that can be wished for. And as health is the predominant, it is hardly use to mention, but I must say, it is a poor place for physicians. And I, like an others here, have a desire that this place should thrive, and encourage my friends to give it a call and oversions. friends to give it a call and examine for themseives.

ELI HANSON.

Letter from a settler from Portland, Me .- The climate-Health-Rapid HAMMONTON, Oct. 20, 1858. I have been in Hammonton about two mentus, and I am satisfied that the soil is of the best kind; and I learn from others who have tried it, that it requires but very little dressing. The climate is the most healthy I was ever in. I have expessed myself more since I have been here than I have like the little and the little and the little and the little and little an here than I have all the rest of my life, and never was so well and and hearty.

The water is excellent. I saw some corn that grew on Messrs. Wells and Lombard's farm last season, with but little or no dressing, that knocks the down-east corn all to nothing.
We have some squashes and melons that grew here, that would be have some squashes and melons that grew here, that would be have some squashes and melons that grew here, that would be have some squashes and melons that grew here, that would be have some squashes and melons that grew here, that would be have some squashes and melons that grew here, that would be have some squashes and melons that grew here, that would be have some squashes and melons that grew here, that would be have some squashes and melons that grew here, that would be have some squashes and melons that grew here, that would be have some squashes and melons that grew here. make a man groan to hit them. Potatoes turn out well in most places, but it has been too dry for them to do much. A large portion of the settler, are from Maine and Massachuset's, and of the best kind as far as I know. Land that was bought a year ago for \$30 an acre, has since been sold at the rate of \$400 per acre. The land I bought two months since for \$25 per acre, I will not now sell for \$70 per acre. The place is growing very fast, and is destined, in my opinion, to be a large place.

Letter from a settler from Worcester, Mass. - The soil, clima e, Water, &c. Hammonton, N. J., Oct 20, 1858.

Sir,—In regard to my views of this place, I will say that I came here last April, with the intention of locating if I liked it. I was pleased with the place from the first time I came; I have purchased a lot and built me a house, and intend to reside here.

The soil and climate I think unsurpassed in any State in the Union; being situated between the hot and debimating South and the cold and changeable North, we escape the extremutes of both, and enjoy a climater unild, temperate, and delightful. In the housest day, of last sumchangeable North, we escape the extremittes of both, and enjoy a climate mild, temperate, and delightful. In the houset day, of last summer we asmost invariably had a cool refreshing breaze through the middle of the day. Of the terulity of the soil, and its capacity to produce. I am more convinced each day, and an I regret is, that I had not known of the place years ago, instead of a few months. The water is excellent, soft, pure, and a bure ant, and a peans quite free from mineral substances. And from the past season's products, I should be unwilling to change my ten acres here, tor any twenty acres in New Yours respectfully, J. WOODBURN: England, my native land.

Letter from John Nowell, formerly of Augusta, Naine-His impressions HAMMONTON. N. J., Oct. 20th, 1853. SIRS,—I came to this place last April to work for M.. Wm. Black, when there was scarcely a comfortable cwelling on this tact of land, and continued to work for him for four months, and was so impressed favor of the place, that I concluded to purchase a town lot, and intend to cultivate i. as a garda.

I returned to Augusta, Maine, my native home, to remain during the winter, but could not content myself there, and have come back with the intention to improve my lot; and I can truly say, things here look very inviting. As to the soil, it is most decidedly fertile, and will produce, with very little dressing. The climate is very excellent, and health could not be better; and I do continually advise my friends to give Hammonton an examination before going elsewhere, as I know this place will suit them.

Yours, truly.
