Poetry.				
	BE A WOMAN.	-		
	Oft I've heard a gentle mother,			
	As the twilight hours began,			
	Pleading with a son, on duty,			
	Urging him to be a man.			
	But unto her blue-eyed daughter,			
	Though with love's words quite as ready,			
	Points she out the other duty,			
	"Strive, my dear, to be a lady."			
	What's a lady? Is it something			
	Made of hoops, and silks, and airs,			
	Used to decorate the parlor,			
	Like the fancy rugs and chairs?			
	Is it one that wastes on novels			
	Every feeling that is human?			
	If 'tis this to be a lady,			
	'Tis not this to be a woman.			
	Mother, then, unto your daughter			
	Speak of something higher far,			
	Than to be mere fashion's lady-			
	"Woman" is the brighter star.			
	If ye, in your strong affection,			
	These many son to be a time man			

Carleton

Urge your son to be a true man, Urge your daughter no less strongly To arise and be a woman.

Blend to work out life's great duty-Be a woman-nought is higher On the gilded list of fame; On the catalogue of virtue There's no brighter, holier name.

Be a woman-on to duty, Raise the world from all that's low, Place high in the social heaven Virtue's fair and radiant bow ! Lend thy influence to each effort That shall raise our nature human; Be not fashion's gilded lady-Be a brave, whole-souled, true woman.

## THE SALT MINES OF CRACOW.

#### BY BAYARD TAYLOR.

After descending 210 feet we saw the first veins of rock salt, in a bed of clay and crumbled sand. stone. Thirty feet more and we were in a world of salt. Level galleries branched off from the foot to the staircase; overhead a ceiling of solid salt, under foot a floor of salt, and on either side dark gray walls of salt, sparkling here and there with minute crystals. Lights glimmered ahead, and on turning the corner we came upon a gang of workmen, some hacking away at the solid floor, others trundling wheelbarrows, full of the precious cubes. Here was the chapel of St. Anthony, the oldest in the mines-a Byzantine excavation, supported by columns, with altar, crucifix, and life-sized statues of saints, apparently in black marble, but all as salt as Lot's wife, as I discovered by touching my tongue to the nose of John the Baptist. The humid air of this upper story of the mines has damaged

except his chin. The limbs of Joseph are dropping off as if he had if it had never been seen.

of hewn logs had been built up to support some threatening roof, or vast chasms, left in quarrying. had been bridged across. As we descended to lower regions, the air became more dry and agreeable, and the saline walls more pure and brilliant. One hall, 106 feet in height, resembled a Grecian thea-

#### PERUVIAN SYRUP! OR, PROTECTED Solution of Protoxide of Iron.

Having successfully passed the ordeal to which new discoveries in the Materia Medica are subjected, must now be received as an established medicine. ITS EFFICACY IN CURING

### DYSPEPSIA.

Affections of the Liver, Dropsy, Neuralgia, Bronchitis and Consumptive Tendencies, Disordered State of the Blood, Boils, Scurvy, and the Prostrative Effects of Lead or Mercury, General Debility, and all Diseases requiring a tonic, or alterative Medicine, is now beyond question.

The proofs of its efficacy are so numerous, so well authenticated, and of such peculiar character, that sufferers cannot reasonably hesitate to receive the proffered aid. The Peruvian Syrup does not profess to be a cure-all, but its range is extensive, because many diseases, apparently unlike, are inti-mately related, and, proceeding from one cause, may be cured by one remedy. The class of diseases for which the Syrup

enough to supply the 40,000,000 inhabitants of

Two obelisks of salt commemorated the visit of Francis I. and his empress, in another spacious irregular vault, through which we passed by means of a wooden bridge resting on piers of crystaline rock. After we had descended to the bottom of this chamber, a boy ran along the bridge above with a Bengal light, throwing the flashes of blue lustre on the obelisks, on the scarred walls, vast arches, the entrance to deeper halls, and the flat roof, fretted with the picks of the workmen. The effect was magical-wonderful. Even the old Prussian, who had the face of an exchange broker, exclaimed, as he pointed upwards-" it is like a sky full of cloud lambkins." Presently we entered another and loftier chamber, yawning downward like the mouth of hell, with cadaverous tunnels opening out of the further end. In the tunnels the workmen, half naked, with torches in their hands. wild cries, fireworks and the firing of gans (which here so reverberate in the imprisoned air that one can feel every wave of sound) gave a rough representation of the infernal regions, for the benefit of the crowned heads who visit the mines. The effect

must be indeed diabolical. Even we, unexceptionable characters as we were, looked truly unearthly in our ghostly garments, amid the livid glare of the fire-works.

A little further we struck upon a lake four fathoms deep, upon which we embarked in a heavy square boat and entered a gloomy tunnel, over the centre of which was inscribed (in salt letter) "good luck to you !" In such a place the motto seemed ironical. "Abandon hope, all ye who enter here," would have been more appropriate. Midway in the tunnel, the halls at either end were suddenly illuminated, and a crash, as of a hundred cannon bellowing through the hollow vaults, shook the air and water in such wise that our boat had not ceased trembling when we landed in the farther hall.
